1992 : purchase by Stephane Heurlier

at 25 years old after a first experience in NYC.

No running water in the inhabited house! Everything has to be done or redone in the vineyard and the winery!

Every year with my team, we replant vines. Like any enthusiast, **we want the best!** So we increase the densities, rebalance and energize the soils, adapt my farming methods by practicing **sustainable** agriculture.

We practice sustainable agriculture that respects the environment and biodiversity.

Our vineyard is HVE4 certified by the French Agricultural ministry
(High Environmental Value, highest level)

2000 : construction of a new winery

1000 square meters in order to supply major customers such as Carrefour supermarkets in France

2008 : I meet a TOP specialist, Mr. Christian Prud'homme, former manager of a First Classified Growth of PAUILLAC

With him, **we make our wines as naturally as possible.**
Fermentations are now made from **indigenous yeasts.**
We make and bottle them according to the **lunar cycles.**

Independent winegrower, passionate and guided by our convictions, we produce **artisanal** Bordeaux wines (white, claret and red) that meet consumer demands : **fruity, unique, authentic and refined.**
