# Who We Are

WizeFulfill is a trusted provider of warehouse management solutions, built on over 25 years of expertise. As a product-driven company, we go beyond standard WMS offerings by enabling businesses to adapt their operations seamlessly. WizeFulfill is designed to accommodate diverse workflows, ensuring warehouses can configure processes to fit their unique needs without complex custom development. With a focus on flexibility and efficiency, we empower businesses of all sizes to optimize fulfillment and scale with ease.

# Mission

Our mission is to simplify warehouse management through innovative, adaptable technology. We focus on creating cost-effective, user-centric tools designed to optimize warehouse operations with intuitive, accessible features for diverse users.

# Our Unique Strengths

## 01 Configurable Workflows & Rules Engine

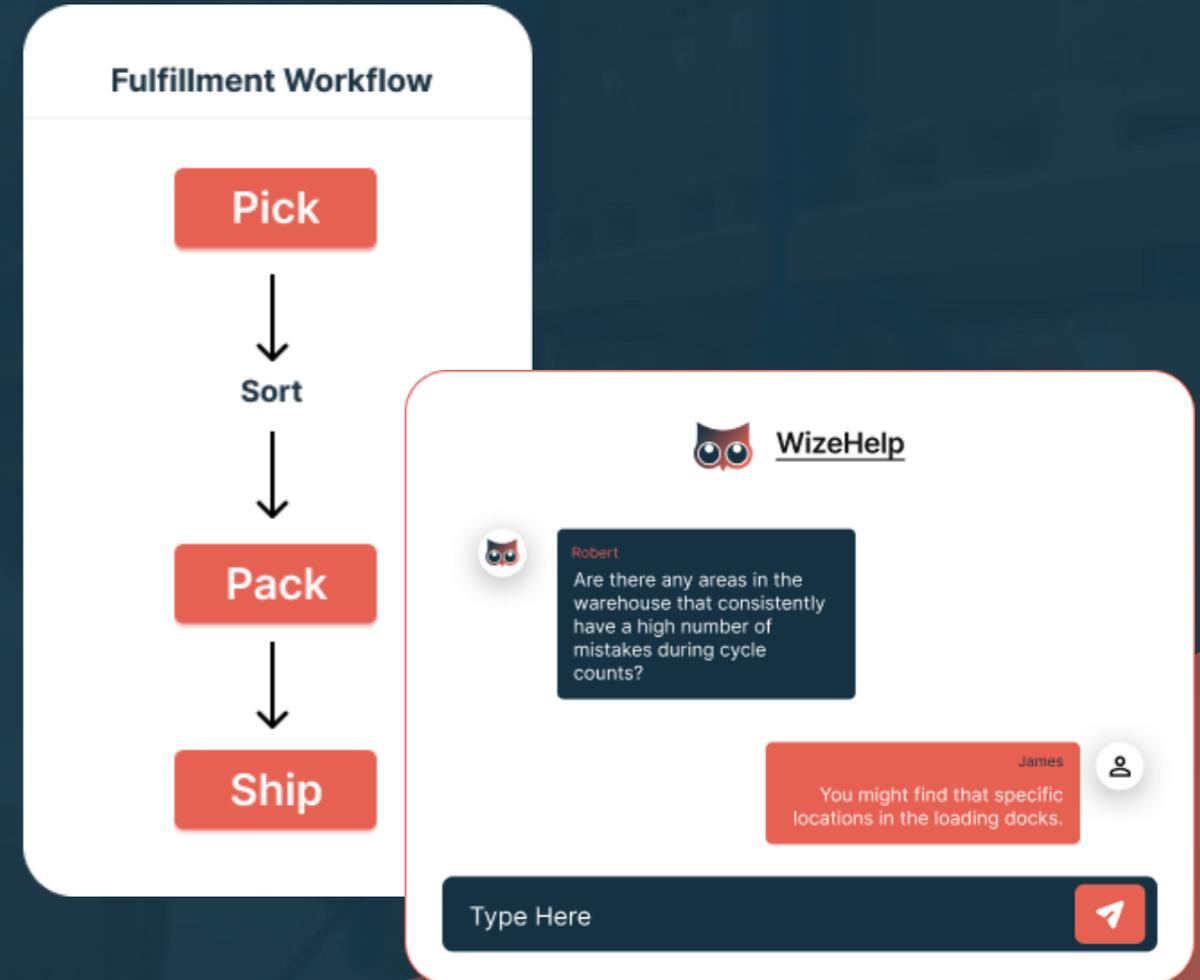

Adjust workflows to fit your business needs and manage operations effectively.

## 02 Easy-to-Learn System

Intuitive design and detailed guides simplify operations and training.

## 03 WizeHelp(Smart Chatbot)

Get real-time insights and recommendations for faster decision-making.

# Core Product Features

WizeFulfill is packed with powerful features designed to address the most critical needs of modern warehouses.

## Inbound and Outbound Order Management

Streamline receiving, storing, and shipping operations.

01

## Third-Party E-Commerce App Integrations

Seamlessly connect with leading e-commerce platforms.

02

## Job Management

Organize task assignments to enhance operational flow.

03

## Inventory Management

Real-time tracking and control of stock levels.

04

## Roles Management

Configurable roles to suit various warehouse needs.

05

## Kitting

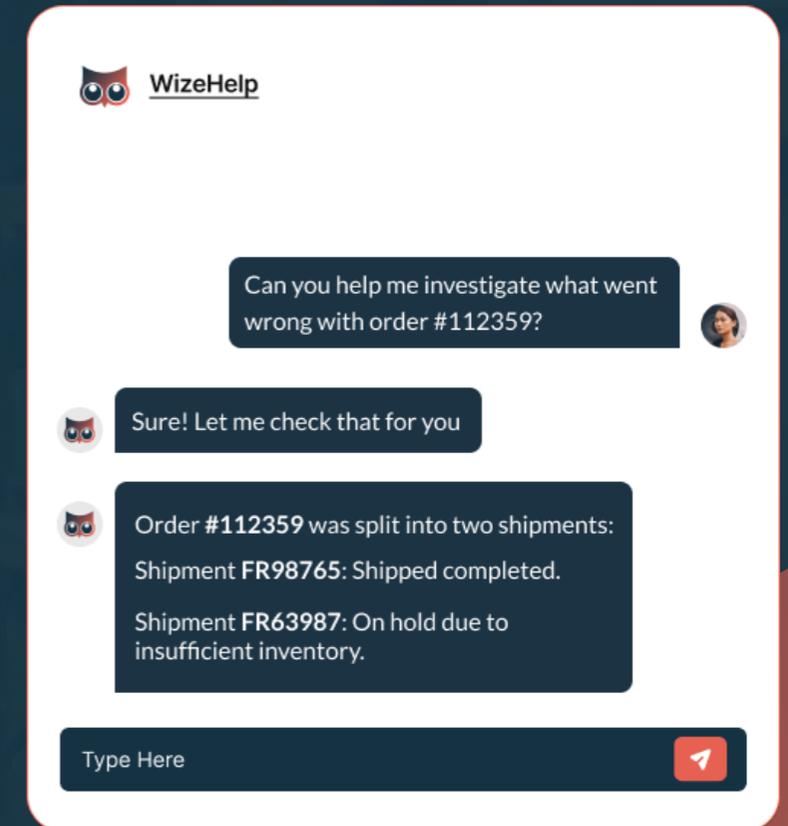

Simplify bundling items for seamless fulfillment.

06

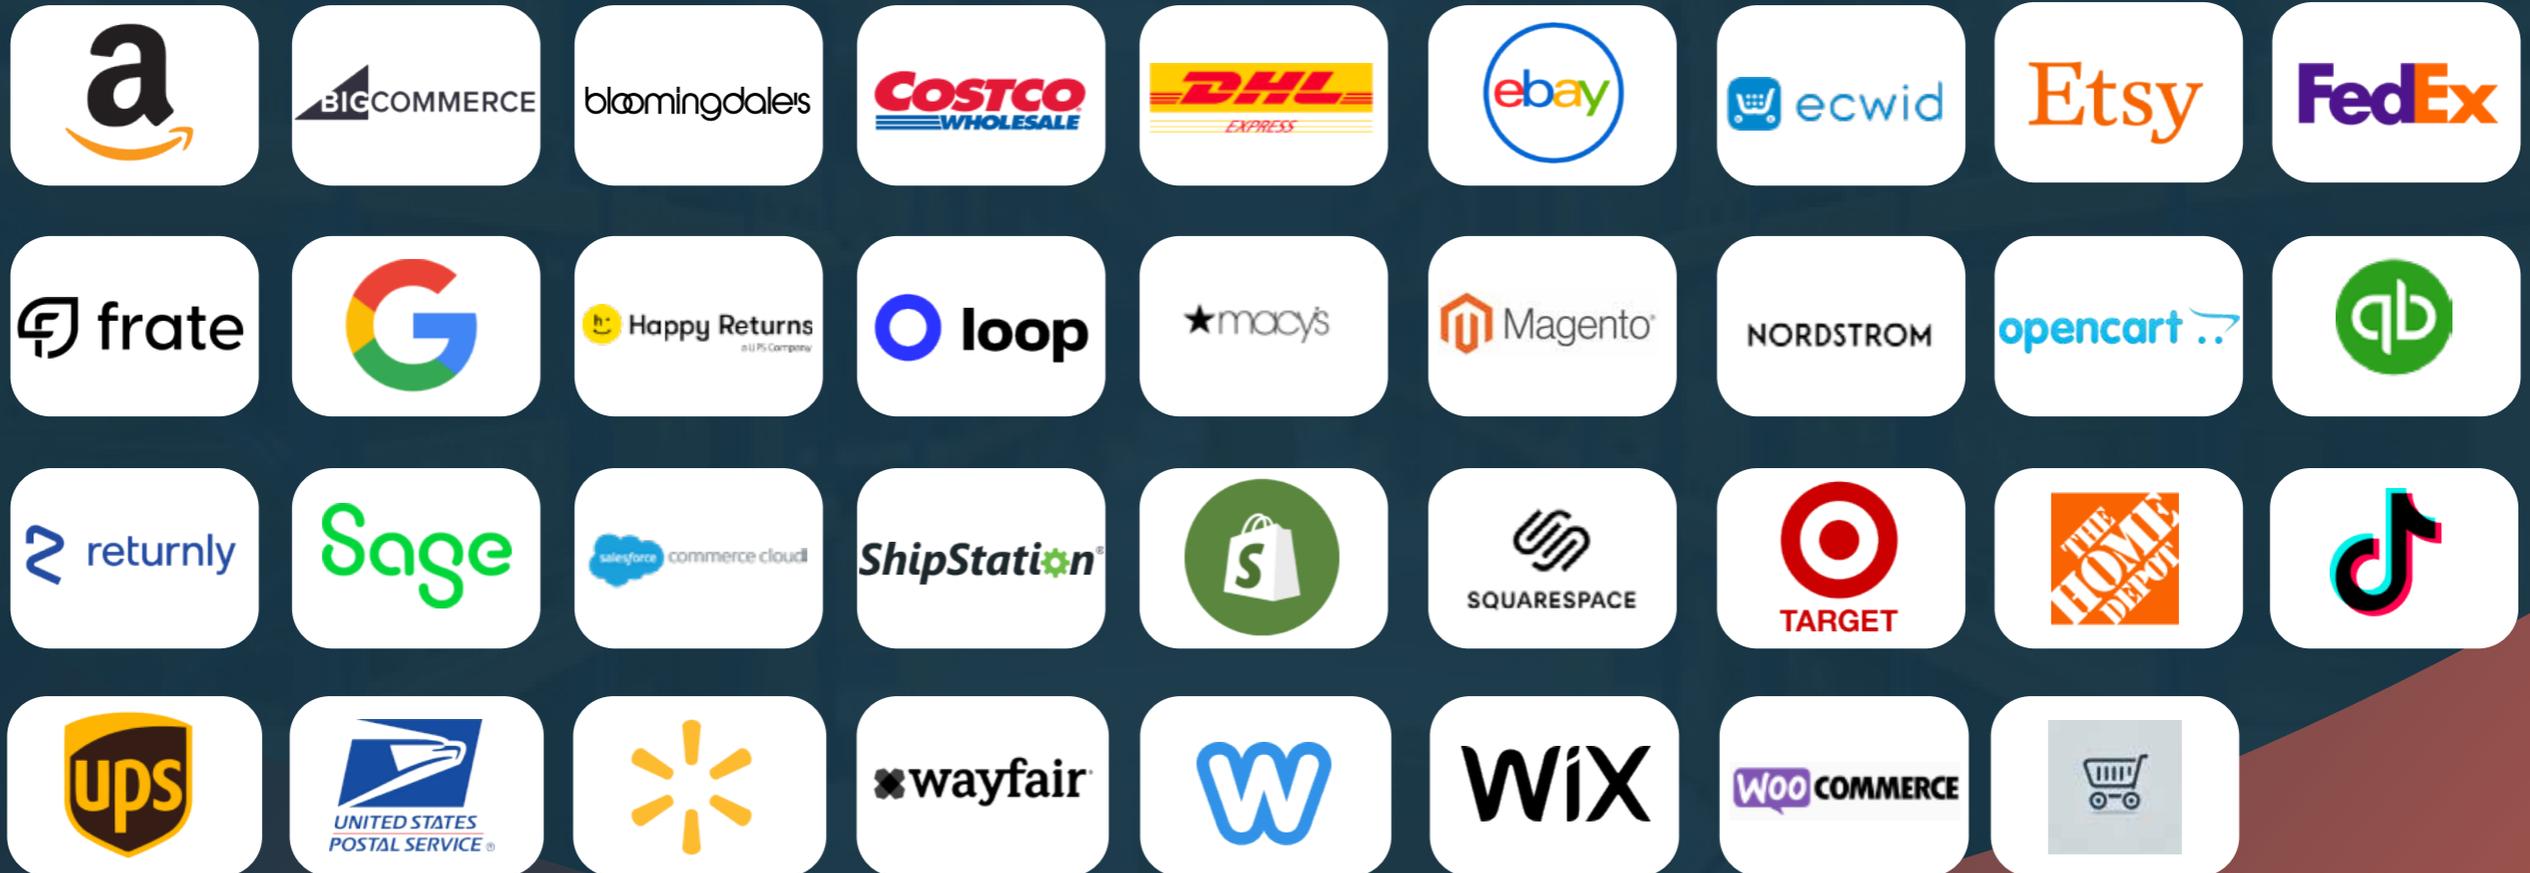

# Special Feature – Our Smart Assistance WizeHelp

WizeHelp is an AI-powered chatbot that enhances warehouse operations with interactive guidance and decision-making support. It provides real-time, step-by-step assistance, helps resolve issues by analyzing system data, and evaluates workflows to recommend adjustments for improved efficiency. By reducing reliance on manual expertise, WizeHelp streamlines operations and empowers warehouse teams with AI-driven insights.

# We Integrate Across Platforms

# Customer Experience and Usability

WizeFulfill is built with the end user in mind, prioritizing simplicity and functionality. Its intuitive design ensures smooth onboarding, while robust features deliver exceptional value to businesses striving for operational excellence.

## User Friendly for All Roles

Minimal prior training required; step-by-step in-app guidance ensures seamless usability.

## Quick and Flexible Implementation

Rapid deployment, scalability, and configuration flexibility make WizeFulfill stand out.

## Affordable and Competitive

Positioned to deliver exceptional value at a cost-effective price point, reducing training costs and optimizing return on investment.

# Our Clients

Businesses trust WizeFulfill for its reliability and innovation. Our clients range from global logistics leaders to specialized 3PL providers relying on our product to transform warehouse operations.
