

ENEHUB Smart Wellness Cabin — User Manual & Operation Guide

AI Self Health
Screening

High Privacy
& Security

Easy to
Use

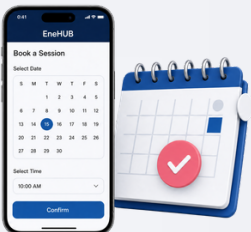

! Operation Guidelines & Precautions

【Automatic Hatch Door Reminder】 : The hatch door features an auto smart sensor system that opens and closes after unlocking and session completion. Avoid forcing the door handle to prevent damage to internal sensor parts.

【High-Grade Privacy Protection】 : The smart auto-dimming glass turns opaque once your session starts. Equipped with professional sound insulation blocking up to 50dB external noise, the cabin prevents outside sight and sound for complete privacy.

+ Smart Unlock, Total Refresh : EneHUB Operation Guidelines & Precautions

1 Book Your Session

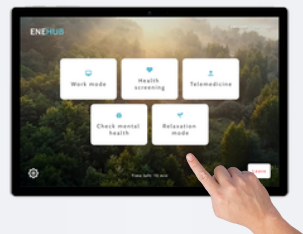

Register your exclusive 15-minute experience session via the reservation system in advance.

2 Scan QR Code to Enter the cabin

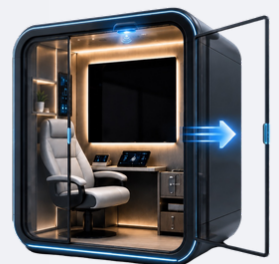

The door will unlock and open automatically, with no manual handling required. It will close automatically once you are seated.

3 Select Your Smart Experience Mode

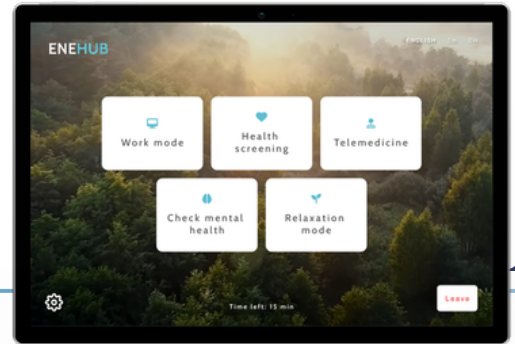

Once you are seated, the system will activate AI-guided operation with audio prompts to guide you to select one experience mode on the screen

4 Auto Exit

The cabin door will open automatically once your 15-minute booked session finishes. Please stay seated and avoid opening the door manually. Kindly take all your personal belongings with you before leaving.

Select Your Smart Experience Mode

ModeA Health Self-Screening Mode

This dedicated daily health management solution combines medical-grade testing equipment and allowing you to check your complete personal health profile all at once.

Operation Instructions

Please follow the voice prompts from the on-screen virtual avatar to complete the following screenings step by step using the built-in devices.

Core Vital Signs:

thermometer, sphygmomanometer, oximeter

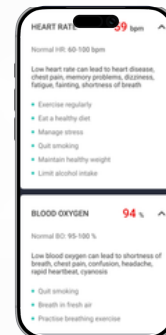

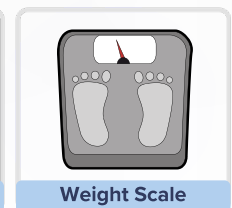

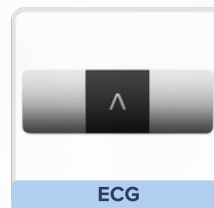

Cardiac Health Functions:

ECG tests, Heart Rate Variability (HRV)

Body Composition Function:

Simply enter your height and weight, and the system will automatically calculate your BMI index.

ModeB

Mental Wellness & Relaxation Mode

This mode helps relieve stress from daily life, work and studies, offering rapid physical and mental rejuvenation through immersive 3D experiences.

Operation Instructions

Smart prompts analyze your Stress Index to auto-suggest tailored stress relief plans:

Visual & Audio Therapy

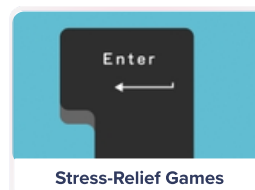

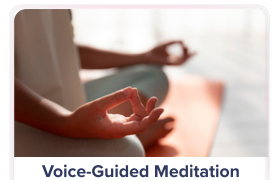

Voice-Guided Meditation

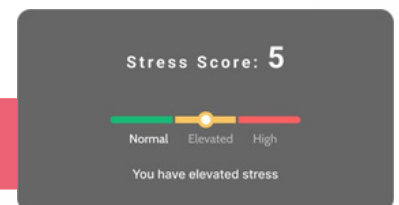

AI Confidant Chatbot

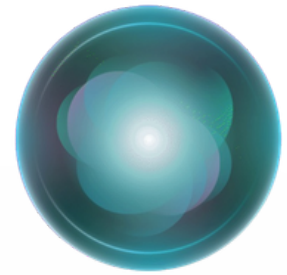

Stress-Relief Games

Before your session ends, the system generates a Mental Wellness Scorecard tracking your concentration, relaxation and stress levels clearly.
