SMART LOCKERS

WHEN DURABILITY OUTPERFORMS ITS RIVALS

FEATURED:

UNIVERSITY OF OREGON | FOOTBALL LOCKER ROOM

This cutting-edge facility is ranked as one of the top ten locker rooms in Division I sports. In **2012**, the football players' locker room was custom-designed with unique player lockers that use Metra smart locking technology. Custom touchscreens provide a personalized player experience when opening their assigned lockers. These lockers were designed to withstand heavy and rugged use. The lockers were upgraded with new touchscreens and software in **2021**.

FEATURED:

BLUE LAGOON, ICELAND

With over 700,000 visitors annually, the Metra smart locking system has helped create a streamlined and convenient visitor experience since **1999**. The locker system was upgraded in **2012** and is still operational today.

INTEGRATIONS

The options for smartphone app integrations are nearly endless. Metra makes it easy for companies to implement smart lockers into their existing methods of access for a seamless onboarding process.

WHAT IT MEANS TO PARTNER

THE METRA WAY

We know that each project is as unique as you are – so each solution is custom-made for you. When it comes to installation, we have exclusive distribution with trained installation and technical teams to make your new lockers operational based on your requirements.

When you partner with us, it means we are partners. We work with you to ensure your smart lockers align with your company strategy and culture. We will continue to support you as your needs change. Including modification changes along the way, whether that is configuration changes, adding more locker banks, or upgrading to the newest technology – we provide a complete and high-quality solution that not only lasts but offers a full range of support.
