

**Hungarian Association
of Environmental Enterprises**

#Jointhegreenteam

About us...

Since 1992

The Hungarian Association of Environmental Enterprises (HAEE) is the largest Hungarian environmental advocacy organization, whose members are key players in the Hungarian green industry covering the whole range of environmental activities. The HAEE works to promote members' demands at national and international levels.

The Association, with its 280 members has been coordinating and educating the actors of the Hungarian environmental protection and nature conservation scene and the environmental industry for more than 30 years being an outstanding partner of policymakers and almost all actors of the economic life.

conservation

Our clusters

The KEXPORT Cluster is a collaboration of our environmental member companies, which aims to bring together their experience, resources, knowledge and technology to provide a wide range of environmental solutions to the international market. With our extensive international network we are also available as a partner for EU or international projects.

kexport.eu/en

The aim of the Cluster of Hungarian Accredited Organisations (ASZEK) is to improve the accreditation practice in Hungary, to represent the interests of the member organisations in Hungary and internationally, to support the professional work of the members, to provide a forum for the exchange of experience and cooperation between accredited organisations. As of 2019, ASZEK is a full member of EUROCHEM and can delegate Hungarian representatives to its working committees.

INDUSTRY.

THEMATIC WORKING GROUPS

Corporate consulting and awareness-raising

A clean, liveable environment is important for businesses and citizens alike, but we often do not do enough to protect it because of a lack of time, energy or information. **This is why educating and raising awareness about environmental awareness and sustainability is a key task.** For almost 20 years, the Association's experts have been working in this field through advice, lectures, publications, conferences and events.

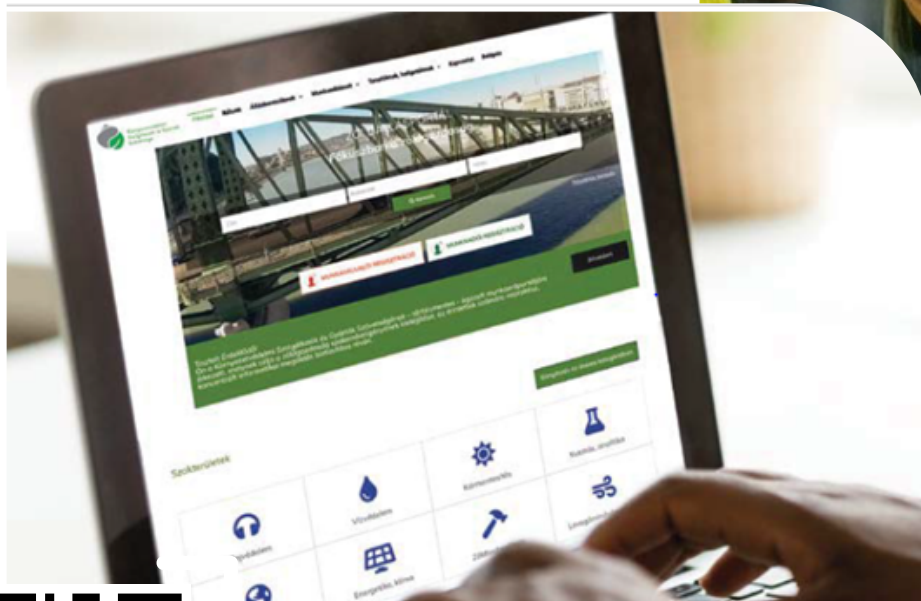

Advisory activity on environmental regulatory affairs

With decades of legislative, law enforcement, and practical expertise, our experts help navigate the of environmental legislation system and interpret the law with professional consulting services. We have comprehensive knowledge of environmental protection procedures, waste management, air cleanliness protection, remediation, measuring and analysis, ESG and data providing services.

GREENJOBS AND TRAININGS

zoldallasportal.hu

Our sectoral job portal was created to meet the demand of green economy professionals, where jobseekers and job suppliers can match each other in an up-to-date, focused interface.

International projects

We are constantly looking for national and international partners for international projects.

RE:Brown Conference

The Remediation Working Group organising professional forums and conferences and regularly contributes to the [RE:Brown Conference](#), which presents the latest techniques and strategies for remediation and brownfield investments. The RE:Brown is a biennial conference and a brand of the Association to make remediation more popular and visible in Hungary.

STUDY BOOK ON THE STATUS AND OPPORTUNITIES OF THE GREEN ECONOMY

Planned publication date:
January 2026.

More than 850 copies of the biannual publication have been distributed to readers, and nearly 1,100 people have downloaded the online version to date. It is not only a record of the development of the domestic green industry, but also a compass pointing the way toward a more sustainable economy.
