**Kalstein**<sup>®</sup>

A different accompaniment, at your service

**At Kalstein France, located in Paris - France, we are a company that has extensive experience in the Manufacture, export and distribution of high quality medical and laboratory equipment,** having honesty, responsibility and communication as the main pillars in the development of each one. of our products. Today, our team has established itself as a leading company in the development of laboratory equipments human oriented in a close relationship with each client.

**Our team is made up of professionals and technicians with extensive experience in various fields: scientific, medical and industrial.** This team has participated in recent years in the development and assessment of research, diagnostic and quality control laboratories at the national and international level. At Kalstein, our premise is innovation, creation and research on new technologies in our production lines, so that each of our clients can have a product of the highest quality and sustainability.

Kalstein provides a 01-year warranty on each of its products at its plant facilities, this warranty is generated through the company's Production and Development Management, thus ensuring the supply of original spare parts throughout the product line. **Great advances have also been made at the metallurgical level and important transformation in production, with the manufacture of all our products in stainless steels, thus offering a range of equipment for the medical and laboratory areas, with the most demanding quality controls.**

The company is characterized by its services to the community in addition to its international recognition thanks to the social responsibility program created by the company, #Letsgivemore. **Similarly, Kalstein constantly participates in National and International Congresses and Fairs. On the other hand, trainings are also carried out for distributors and users directly and according to their needs.** With a wide range of Products, Spare Parts and Services as part of the customer service, both for distributors and end customers, always backed by a specialized and personalized technical service.

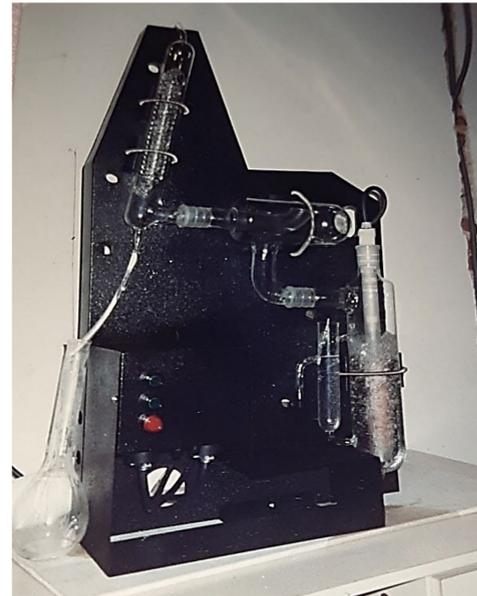

The company is characterized by its services to the community in addition to its **international recognition thanks to the social responsibility program created by the company, #Letsgivemore.**

## HISTORICAL REVIEW

In 1994, the opening of the Kalstein company began, which takes its name from the surname of a family of Polish immigrants who arrived in Venezuela at the end of the 1890s. The creation of this industry arises from the scientific and technological needs present in this country; for manufacturing in laboratory areas. These products met the basic requirements to supply the needs and demands of the sector, such as the laboratories for the control of sterility in each and every one of the areas that are worked, (pharmacy, cosmetology, bioanalysis, agronomy, veterinary , microbiology, dentistry, genetics, nursing, medicine, etc.)

Today, we count with metallurgic machinery as turnery, milting cutter, special welds (argon), plasma cuts and electrolytic baths to electro polishing, to make the manufacturing, finishing and quality control of our products.

The first Kalstein catalog was published in the year 2001 when our manufacturing beginnings started building fiberglass equipment. By year 2004 with the third edition, we step up to 304 stainless steel products and its parts meeting high quality products with strictest sterility rules.

## THE ORIGIN OF THE FAMILY NAME KALSTEIN

The family name Kalstein has its origins in Poland since the 18th century, then for war reasons some members of the family emigrated to Venezuela. Germanía Kalstein procreated María De los Santos, Isidora and Rosa Cristina. At the beginning of the 19th century, 7 brothers were born from the Marriage of María De los Santos Kalstein, but only the three sisters survive: Catalina Kalstein, Rosa Julia Kalstein and Luz Eugenia Kalstein (the girl in the center who hides a peach during the photo session). Only from the latter a single daughter born, Irene Maria Kalstein, who gives the continuity to the family name to this date.

All original content from Kalstein thanks to our editorial team of professionals and specialized writers in the medical, laboratory, rehabilitation and odontology area.

### How to keep your spectrophotometer?

The spectrophotometer, built using advanced manufacturing processes, is one of the main diagnostic and research instruments developed by humans. It is used in the laboratory in order to determine the concentration of a substance in a solution, thus allowing quantitative analysis.

### pH Meter: Technology and accuracy

The measurement of pH (hydrogen potential) in the laboratory is one of the most important parameters that are performed for quality control and, according to specialists in the field, it is the second most important after temperature. The determination of the pH has a great field of application: res...

## INTERNATIONAL SOCIAL RESPONSIBILITY PROGRAM

Kalstein has developed an international social responsibility program, which consists of supporting different foundations, institutions and / or non-profit organizations, following the objectives of our philanthropic mission:

### FREE MEDICAL ASSISTANCE

To contribute to the improvement of the National Public Health System, through free access to specialized diagnostic services in chronic and infectious diseases for the most vulnerable communities.

### RESEARCH AND DEVELOPMENT

To encourage and collaborate with the scientific community in priority areas of health and research, thus generating social development and contributing to the advances in science and investigation worldwide.

### TRAINING AND FORMATIONS

For the training of students and professionals in various areas related to medicine, science, research, among others, as well to contribute to pedagogic formations of children in these same areas, worldwide.

Therefore, every Kalstein equipment sold helps to provide different types of contributions in the world. **Mission that we share beyond profit, we believe in the strength of a true social responsibility program that can contribute in facts that will guarantee important results for the future.**

”

On behalf of the Jacinto Convit Foundation, we deeply appreciate the valuable support that they have given us since 2016, with the donation of laboratory equipment and instruments corresponding to the Foundation's research area. We recommend your company as a socially responsible organization, interested in supporting non-profit projects in favor of the development of the country.
