

Skylights

Elevate your standards with roof solutions designed for uncompromising quality. Built for tradespeople who demand peak performance on every project, our skylights and roof access hatches deliver optimal natural lighting, superior ventilation, and safe, dependable exit points.

Engineered for exceptional durability and seamless roof integration, our metal roof windows are precision deep-drawn from premium steel sheet and hot-dip galvanized in full compliance with DIN EN ISO 1461. Featuring customizable bases designed either for specific tile profiles or as universal all-roof solutions, they adapt effortlessly to any roofing material.

From time-tested, heavy-duty metal skylights to advanced, fully thermally insulated exits tailored for energy-efficient modern architecture, we provide the perfect high-performance match for any structural requirement.

For tailored aesthetic and thermal demands, options include custom RAL powder-color coatings, solid copper craftsmanship, and high-efficiency thermal skylights with PUR insulation frames and double glazing. Complete with a wide array of practical accessories, we deliver the ultimate, long-lasting solution tailored to your exact specifications.

The cold room specialist: Any-Roof or Roof-Tile Specific

The universal and roof-tile specific metal roof windows offer the ideal solution for unheated attic spaces and cold rooms. Featuring tile-specific or universal bases, they fit seamlessly onto any roof profile. Fully customizable to preserve historic aesthetics, they are the perfect choice for heritage restoration, renovation, and complete rebuilding projects.

The living space specialist: Wingopan "wra"

The "wra 0.8" and "wra 1.4" roof exits set the standard for energy-efficient new builds and renovations. By meeting the strictest thermal regulations, they maximize energy savings while delivering premium daylight and safe, seamless roof access.
