## COMPANY DESCRIPTION

GND Partners is a data-driven sustainable finance and technology service provider focused on innovation management and sustainability in financial services, industrial processes, climate, energy, mobility, bioeconomy, natural resources, and environment.

## SKILLS AND EXPERTISE

- **Sustainability Competencies:** Conducting sustainability assessments (i.e., EU Taxonomy, DNSH, ESG due diligence, carbon accounting, life-cycle assessments, etc.), value creation (i.e., transition plans, value creation plans, sustainability risks measurement, management and mitigation, etc.), and sustainability reporting tools (in line with SFDR, CSRD, ESRS, ISSB, TNFD, etc.).
- **Sustainable Energy Competencies:** Providing extensive expertise in sustainable energy projects, focusing on improving energy efficiency of built environment and industry, advancing circularity, and contributing to the development of storage and hydrogen systems.
- **Financial Competencies:** Preparing financial plans, conducting due diligence, financial analysis, valuations, and creating financial models to support informed decision-making, structuring financial solutions by developing capital structures to help finance sustainable transition projects and drive innovation to the market, developing investment instruments and connecting with investors and financial institutions.
- **Digital Transformation:** Providing digital competencies to help businesses uptake the latest digital tools and trends, including artificial intelligence (AI), distributed ledger technology (DLT), and others, supporting enterprises by jointly developing projects that facilitate digital transformation within their organisations.
- **Innovation Management:** Supporting innovation management by addressing the unique needs of R&D projects, including concept development, administrative documentation, project coordination and implementation, assessing innovation performance and developing growth strategies, validating solutions through prototyping and accelerating market adoption.
- **Impact Generation:** Developing impact assessment measures, providing recommendations, and ensuring effective dissemination, communication, and business exploitation to realise the benefits of innovation in enterprises.
- **International Cooperation:** Cooperating with the strongest organisations in every European country and many outside Europe to transfer the best practices, ensure knowledge sharing, and bring breakthrough innovations to the market.

## RELEVANT PROJECTS

### Horizon Europe BIOCAPITAL: 101058693

HORIZON: Unlocking Financial Flows towards Reversing Biodiversity Loss. GND Partners implements the project – Mobilising investments for protecting and restoring biodiversity by harnessing innovative financial solutions (BIOCAPITAL 101135150). The project will develop and implement Biodiversity protection and restoration measures, advanced geospatial data technologies, and biodiversity-friendly Financing mechanisms. The BIOCAPITAL project focuses on measuring biodiversity risks and fostering biodiversity-related investments.

### Horizon Europe WILSON: 101147267

HORIZON: Innovative Uses of Lifecycle Data for the Management of Buildings. GND Partners implements the project – Distributed data modelling and Federated Digital Twinning for lifecycle data-driven sustainable operation and management of buildings and districts (WILSON 101147267). The project will develop cutting-edge technologies and implement innovative and sustainable management practices for buildings' portfolios, improve building operations, and support decision-making on related investments. The WILSON project focuses on the sustainable management of buildings and increasing sustainable energy-related investments.

### Horizon Europe DMaaST: 101138648

HORIZON: Climate Neutral, Circular and Digitised Production. GND Partners implements the project – Innovative modelling and assessment capabilities through MaaS for Manufacturing Ecosystem resiliency (DMaaST 101138648). The project will develop a multi-objective distributed decision support system algorithm for a manufacturing ecosystem combining multi-objective techniques, the Digital Twin approach, and the latest trends in Federated Deep Learning. The DMaaST project focuses on implementing new technological solutions for increasing the circularity of industrial enterprises and promoting the Manufacturing as a Service concept.

### Horizon Europe STAGE: 101058693

HORIZON: A Digitised, Resource-Efficient and Resilient Industry. GND Partners implements the project – Sustainable Transition to the Agile and Green Enterprise (STAGE 101058693). The project will create a sustainability transition ecosystem for European industrial enterprises. The STAGE project focuses on innovation and sustainability, transforming companies into agile and green leaders of the European economy.

### Horizon 2020-LC SEIFA: 101033741

H2020: Building a low-carbon, climate-resilient future. GND Partners implements the project – Sustainable Energy Investing and Financing Activation (SEIFA: 101033741) to incentivise private investments to sustainable energy-related industrial projects. The SEIFA project focuses on developing the investment platform, tools and incentives for private investors.
