

— OUR VISION

Enabling nano-pharmaceutical innovation

PHOENIX SEP will enable the seamless, timely and cost-friendly transfer of nano-pharmaceuticals from lab bench to clinical trials for more effective and faster market entry.

— OUR MISSION

A Single Entry Point

PHOENIX SEP offers an “all-in-one” Single Entry Point to users, providing manufacturing, characterization, testing and consulting services to accelerate maturity of nano-pharmaceuticals and diagnostic agents. The Single Entry Point offers affordable and easy access to a consolidated network of facilities, technologies, services and expertise for all the technology transfer aspects from characterization, testing, verification up to scale-up, GMP compliant manufacturing and regulatory guidance.

— OUR IMPACT

Customized solutions along the entire supply chain

PHOENIX SEP offers customized solutions to your nano-pharmaceutical development needs. A dedicated contact person from our Single Entry Point will evaluate your needs and match you with our relevant experts, creating a comprehensive plan.

Our network covers the entire supply chain from bench to bedside, as well as every administration route.

— OUR CAPABILITY NETWORK

PHOENIX SEP combines broad expertise from partners across Europe

- GMP unit operations (tech transfer and scale-up)
- GMP-compliant services
- Quality-by-Design (QbD)
- Safety-by-Design (SbD)
- Safe-and-Sustainable-by-Design (SSbD)
- Innovation Management
- Innovation Boost
- Regulatory Compliance
- On-Demand Analysis
- Key Enabling Technologies

— OUR SERVICES

Services from early stage to pre-clinical

The PHOENIX SEP service portfolio offers 5 categories of services, covering all the different topics needed for the development of nano-pharmaceuticals from early stage to entry into clinical trials.

**Physico-Chemical
Characterisation**

***in vitro*
Characterisation**

***in vivo*
Characterisation**

Manufacturing
