- UL Approved Labels

Products

DURABLE LABELLING SOLUTIONS

Membrane Switches

- Durable
- Versatile
- Embossed with a Variety of Finishes
- Embedded LED's
- PCB Assembly
- UV & Chemical Resistant
- Tactile & Non-Tactile Keys
- Simple Connections
- 100% Individually Tested
- Prototype to Full Production Runs

UL Labels Certified

UL stands for Underwriter Laboratories. UL are a third-party certification company founded in the USA in 1894. They certify products and set industry standards to follow when innovating new products with the aim to make our world a safer place in terms of safety, flammability and sustainability. They continually check or test these materials or products to ensure they meet these standards and ensure products are constructed correctly for adequate safety. UL standards certification includes listing certification and recognition certification. Listing certification is generally of an end product, while recognition certification is for component parts included within a product

Just a few samples of the UL mark.
Give us a call we will help you
determine what material and mark to use
