

Transforming agribusiness

Intelligence & connectivity

Integrate your products with **FarmCloud** – the most
advanced agri-food ecosystem driving innovation,
efficiency, and growth.

Integrate your products with FarmCloud

Unlock innovation, scalability, and market growth in digital agriculture. Gain a competitive edge, accelerate your time-to-market, and reach new customers.

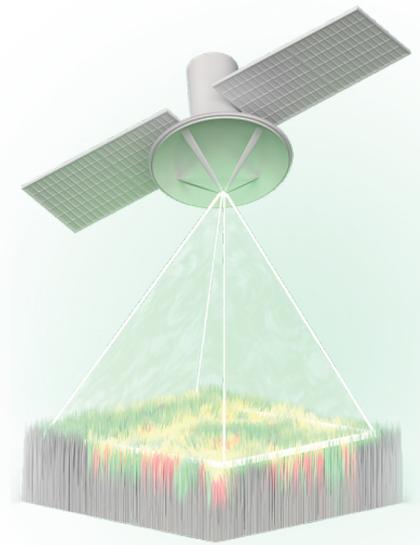

- Plug-and-play operating system for Agriculture 4.0.
- Ready-to-use capabilities including VRA precision fertilization (ISO-XML), advanced decision support, integrated databases, and seamless GIS connectivity.
- Advanced management of machinery, crops, and workforce.
- Increased production efficiency through process automation.
- Bidirectional communication, data security, and scalability.
- Tailored integrations, branded experiences, and white-label availability.

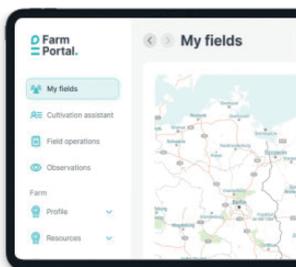

Promote and distribute your products

FarmCloud is a premium marketplace and promotion hub where technology providers and agri-service companies can showcase and deliver their solutions directly to farmers.

- Reach a wide network of verified FarmCloud users.
- Modern loyalty program that drives retention.
- Cross-selling and upselling through smart data-driven recommendations, boosting partner revenue.
- Automated sales and customer needs analysis.
- Specialized service offerings for diverse segments of the agricultural market.

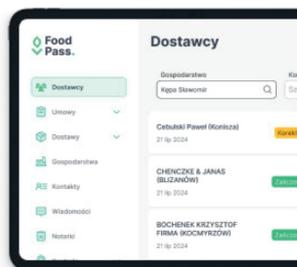

One platform, endless possibilities.

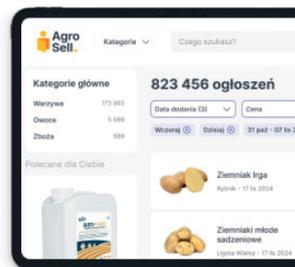

farmportal.eu

Advanced farm management, crop health and safety monitoring, precision fertilization, and advanced decision-support systems.

foodpass.pl

Agri-food production monitoring from farm to fork: contracting and delivery management, grower portal, quality control, agronomic advisory, and ESG & Scope 1 & 3 reporting.

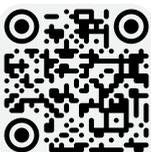

agrosell.eu

A modern system for sales support, service distribution, and brand promotion — fully integrated with FarmPortal.

Advanced reporting, predictive analytics, scoring models, and risk modeling in agri-food production.
