

PRESENTATION BY

MRM INTERNATIONAL, INC.

CURRENT TRANSPORTATION TECHNOLOGY

- Surface Transit Contributing to Congestion
- Limit Access
- Lack Consistent Reliable Service
- Expensive to Construct and Operate

- Old Technology
- Have Not Solved Congestion
- Stop at Every Station Making Them Inefficient

MRM Management

Mario Galler

• Mario started his first business at... And is a serical entrepreneur with multiple successes. Expertise in Business Development

Regard Yakou

 Regard is a Profession Engineer with expertise in running Billion Dollar development construction project and Metro Transit systems World Wide

Mike Lester

• Mike has 20 years experience in the automated transit industry and is a leading expert in the automated rapid transit industry.

HOW THE TECHNOLOGY WORKS

- Asynchronous Control
- Variable Speed
- On Vehicle Switch
- Off-Line Stations

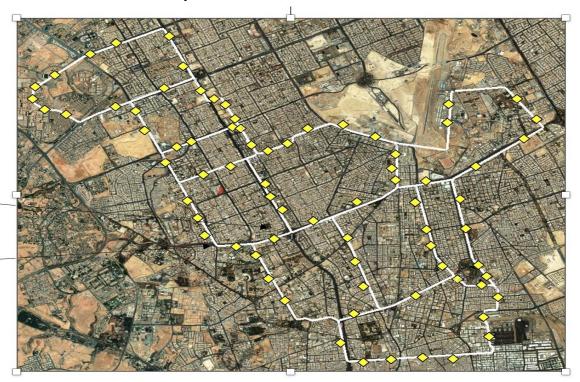

SHYWEB EXPRESS

TRANSPORTATION FOR THE 215T CENTURY

SKYWEB NETWORK EFFECT

- Direct Access From Any Station to Any Station
- Increases System Capacity
- Decrease Operational Costs

KAFD

<u>Diriyah</u> Gate

SKYWEB TO INCREASE ROI

PHYSICAL RESULTS	FINANCIAL RESULTS
Dramatic Increase in System Capacity and EfficiencyAll Locations on Network Accessible	Network Effect Attracts Users and Increases Fare Revenue
 Network Access Results in Frequent Repeated Use Greater Patronage Makes Business Location More Desirable 	Desirability Increases Value of Locations
Small Footprint Very Large Throughput	Reduced Capital and Operating Costs and has a Less Disruptive Effect on Business

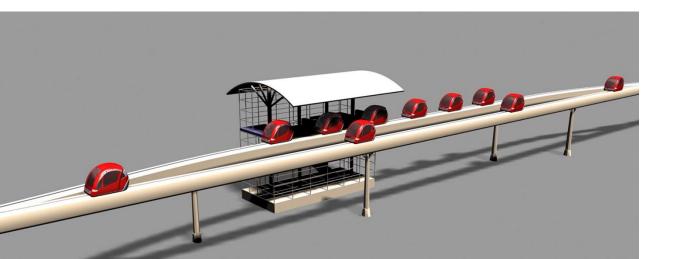

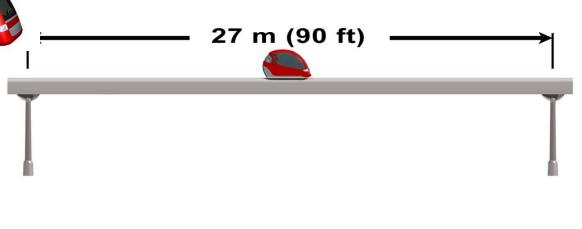

TRANSPORTATION FOR THE 21ST CENTURY

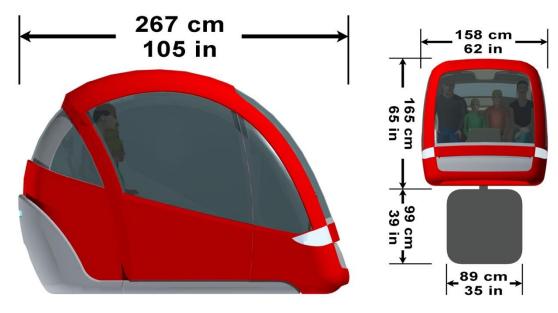

SKYWEB IS FLEXABLE, EXPLANABLE AND REPEATABLE TO MEET ALL DEMAND

- Modular Seamless Expansion
- Repeatable Implementable in Other Locations
- System Component Designed to:
 - Move Passengers
 - Light Freight
 - Refuse

SKYWEB can make Riad a 15 Minute City

- A System Length of 80 Km
- Fleet Size : 2,900
- 72 Stations
- Allows 13,000 Trips per Hour
- Moving 39,000 Passengers per Hour.

SKYWEB AUTOMATED TRANSPORTATION VEHICLE

SKYWEB COMMERCIALIZATION

- Developed State of the Art Software Audited and Tested by Honeywell
- Full Size Prototype System Constructed and Operated
- Built a 1/15 Scale System Using Commercial Control Software
- Engineering Specifications Complete
- Off the Shelf Components

Excerpt from Honeywell Automated Automated Controls Evaluation:

"... there are no conceptual flaws in the current version of the control system. ..."

VALUE PROPOSITION

INCREASE

- Ridership by utility
- Access to the city
- Revenue

CREATE

- Individual Choice
- Access & Connectivity
- Quality Experience
- Expandable Network
- Economic Value

ELIMINATE

- Operation & Maintenance Subsidies
- Transfers

REDUCE

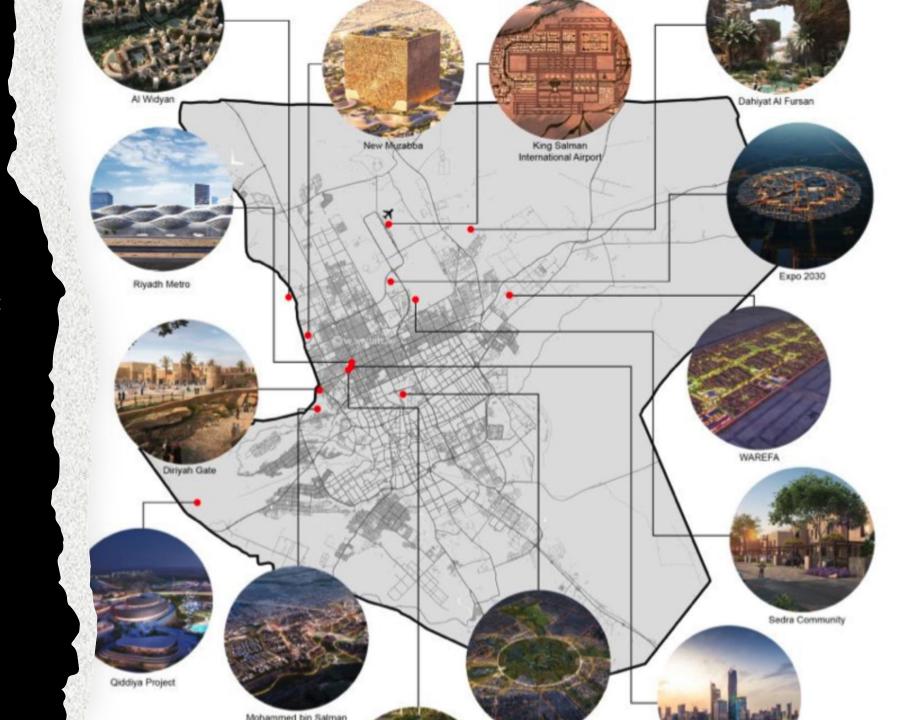

- Construction Time
- Construction Disruption
- Capital Cost
- O & M Costs
- Congestion
- CO2 Emissions

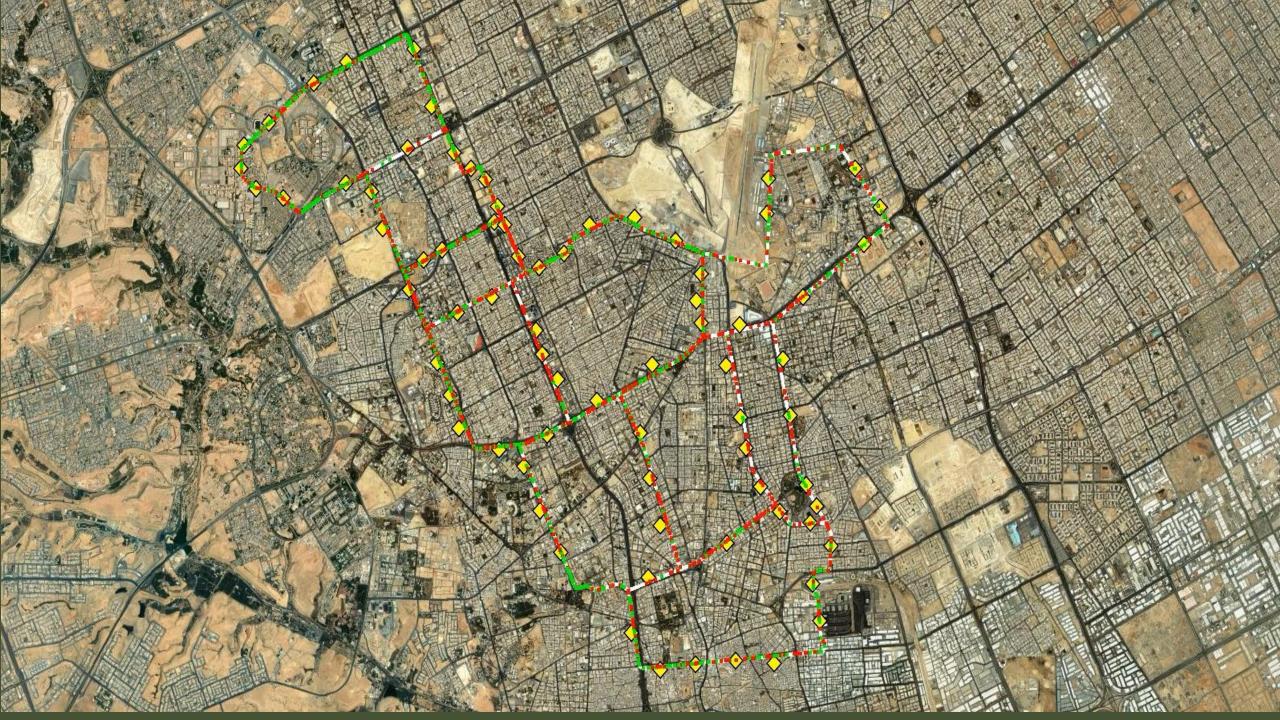

- Al Widyan
- Riyadh Metro
- Qiddya Project
- Mohammed bin Salman City
- King Salman Park
- King Salman Int. Airport
- King Abdullah Financial District
- Warefa
- Expo 2030
- New Murabba
- Sedra Community
