

OBJECTIVE

The objective of the Fund Raising for the incoming future projects in Gas exploitation, Geothermal Exploration, RDF Plant / Waste Municipal Treatment, Solar Power and some feasibility studies stage of early stage of the project.

FUND RAISING REQUIREMENTS :

Offshore Gas Dev : USD 35 Millions
Geothermal Dev. : USD 15 Millions
RDF Plant : USD 40 Millions
Feasibility Studies 3 projects USD 1 M
Solar Power Development 300 MW :
USD 400 Millions
Oil and Gas exploitation : USD 40 M

BACKGROUND

Petronesia Global Holdings Limited was established by 2018 which focus on Energy Investment and Development. The company focus on the conventional energy development and also the renewables energy. Currently , The companies cooperates exclusively with the major player in the world for Drilling Rig manufacture and technologies, Geological and Geophysical studies and analysis , processing and interpretation and the environmental Waste Municipal Treatment.

ASSET DEVELOPMENTS AS UNDERLYING OFFSHORE GAS DEVELOPMENT

Petronesia is processing to acquire the 70 percents Black Box Energy in Sumatera Island territory. The project is Offshore project which drilling for 1000 meters and has the indication from the previous drilling. The Reserve of Methane could achieve the 500 BCF and could reserve for 15 years. Petronesia will conduct the 2 wells offshore drilling and creates the processing facilities to process the LNG plants , Gas Power plant and Fuels cells facilities.

REFUSED DERIVATIVE FUELS (WASTE MUNICIPAL TREATMENT)

Petronesia is processing the Pre feasibilities study for the RDF plant in Central Java for 500 Ton per day capacity to treat the municipal waste and proceeds to the RDF plant. With the area for 10 ha , we will convert the waste to RDF product and also the compost product. And the plant will expand to another surrounding area which total additional to become 1000 Ton per day.

Petronesia

Global Holdings Limited

OIL AND GAS

Petronesia is processing for exploitation the Central Sumatera Basin which number of wells is 10 wells. The method is using Unconventional Method and also Low Carbon Reservoir which Utilization on the Fracturing and Direct

GEOTHERMAL

Petronesia is processing for the one project for study in Sumatera And another direct negotiation for Sangkala Block in East Java. The preliminary study of the block informs that the capacity of Geothermal in the area could achieve 40 MW capacity. And all Production will be supply to National Electric Grid. At this first stage of process, we will do the study of the Sangkala Block and 1 well drilling for further evaluation of the reserve.

SOLAR POWER

Petronesia is final negotiation of the development of 300 MW Solar Power in Africa. We will take 70 percent Major stakes and Responsible for Engineering, Procurement and Construction , Operation and Maintenance. The first stage of the project is 300 MW and there are additional of The capacity 300 MW for second stage.
