

# Research and innovation partnership offer

---

# Key facts

- **NeverBlink** – deep-tech IT startup / SME from Poland
- **Core product:** breakthrough platform for **real-time data integration and trustworthy neurosymbolic AI**
- **Main expertise:**
  - Trustworthy and robust AI
  - Scalable knowledge graph (KG) and neurosymbolic AI systems (GraphRAG, agentic systems)
  - Real-time data integration and analytics
  - FAIR-by-design systems, RDF, data management

# R&D excellence

**SEMANTiCS**  
Vienna 2025

- **Technology based on award-winning research**  
(Dieter Fensel Visionary Award and Best Poster @ ESWC 2025)
- **Real-life success stories** – sped up the Nanopublication Network by **>1000x** (nominated to Best Industry Paper @ SEMANTiCS 2025)
- We maintain crucial open-source software: **the fastest knowledge graph streaming protocol** in the world, **Jelly-RDF**
- Excellent Horizon track record – our team led the implementation of an **award-winning H2020 pilot at TRL6/7** (ASSIST-IoT)  
(**Best Professional Research 2024**, buildingSMART International)

# Horizon Europe experience and network

- **Team coordinated large HE proposals** in the past (Cluster 4)
- **Currently coordinating** the implementation of a [3-partner HE project](#)
- **Mixed research/industry team** previously at: TU Berlin, Fraunhofer HHI, TU Wien, Warsaw University of Technology, Polish Academy of Sciences
- Established collaborations with **top EU R&D institutions** (e.g., IMEC)
- Regular contributions to **pre-standardization** ([co-leading a TF in W3C](#))
- **Broad network of EU partners**, including sector-specific SMEs
- **NeverBlink is a full [ADRA](#) member**

# R&D partnership offer (1/2)

- **Open to collaborations on:**
  - Applying robust & trustworthy AI in novel use cases
  - Industrial AI (e.g., energy grid, manufacturing, farming, smart city...)
  - Implementing cutting-edge AI methods: neurosymbolic, frugal, agents
  - FAIR-by-design real-time data integration
  - Data & metadata management (knowledge graphs)
- **Preferred role:** technical partner / technology provider
  - We can support the consortium in building top-of-the-line robust AI and data processing systems
  - We can also do pilot implementation (jointly with end user)

# R&D partnership offer (2/2)

- Extensive experience in proposal writing  
→ **we can make strong contributions to proposals**
- **Can bring additional partners if needed:**
  - End users / pilots (many sectors)
  - Top-tier academia / research (computer science, AI)
- Excellent **open science** and **open source** software track record
- Gender-balanced team, we are a **women-led startup**
- **EU deep-tech startup with large potential to make measurable impact**  
(economic, social, environmental)
- **Super-clear exploitation path** and a scalable business model

# Appendix: NeverBlink's product & technology

---

# Many sectors – same problem.

# 35% of IT project budgets are spent on data integration

---

Source: Salesforce

# 95% of IT leaders say integration harms effective AI implementation

---

Source: Salesforce

# The solution has to...

Seamlessly integrate data

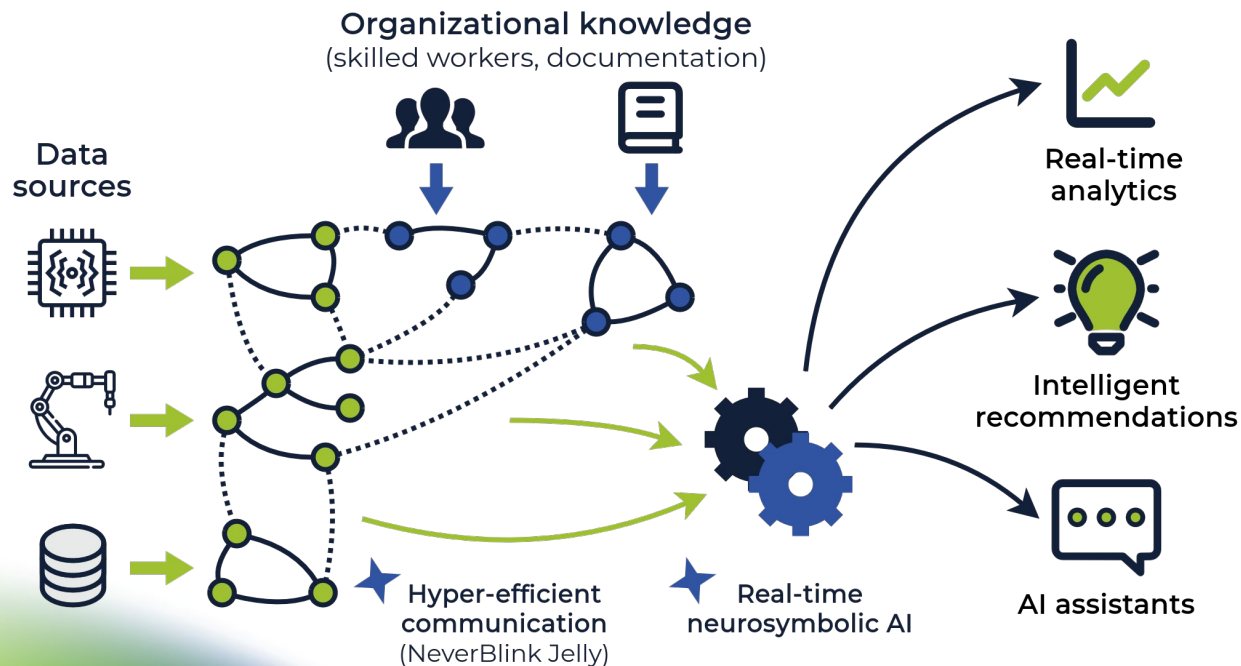

Deliver reliable insights

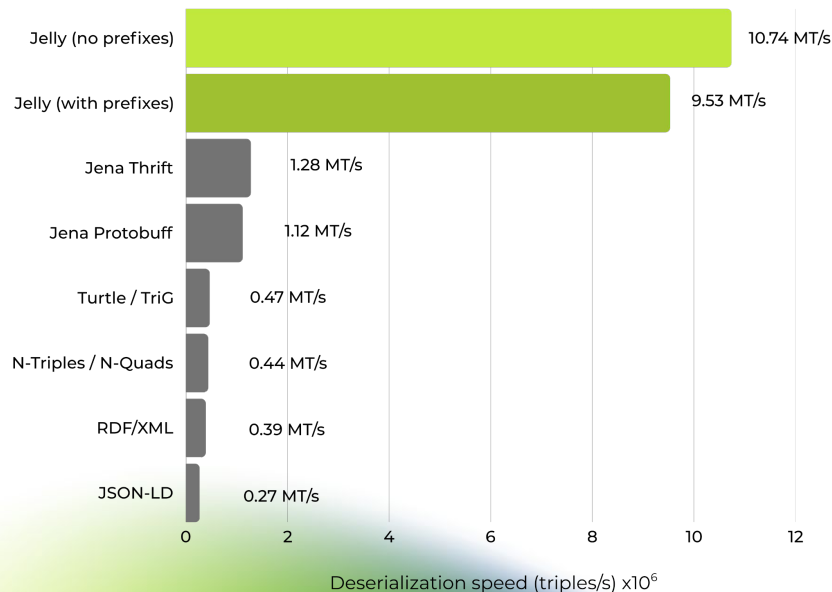

Be extremely fast

# Meet the NeverBlink platform.

# Platform module 1: Jelly

- Up to **8** times faster than any competition
- Time cut from hours to **less than 4 seconds**
- [Customer success story](#) nominated for **Best Industry Presentation** at SEMANTiCS 2025

# Competition

	 NeverBlink	Agentic frameworks	Stream processing frameworks	KG databases
<b>Real-time analytics</b>	✓	✗	✓	✗
<b>Transparent and stable AI</b>	✓	✗	✗	✓
<b>SME-friendly</b>	✓	✓	✓	✗

# Unfair advantage

- **4Y+** of research in fast neurosymbolic AI
- Experienced in moving from research to real-life through an **award-winning pilot**
- Our super-fast OSS tech **is already in the industry tech stack**
