

#### About us:

We are a **custom software development** company that **extends the capabilities of your team** by seamlessly integrating one or more of our experts to tackle complex IT challenges—**primarily for clients in the life sciences field.**

**By partnering with your in-house team,** we ensure projects are delivered on time, within budget, and with the highest level of precision.

#### Experience:

- We have **extensive knowledge in the medical business domain** and **digital health standards.**
- We have experience with **FDA and EU-MDR regulations**, medical certifications and implementing software as a medical device, having worked with clients such as [GPI USA](#), [Charles River Laboratories](#), [Genomate Health](#), [Oncompass](#), and [Medipredict](#).
- Thanks to our partnerships, **we understand the challenges and problems that professionals face** in the HealthTech scene.
- [Explore our digital health focused work and dive into our case studies.](#)

#### Our Journey in Numbers

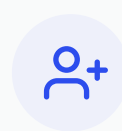

2016 founding

25+ medical projects

8 long term partners

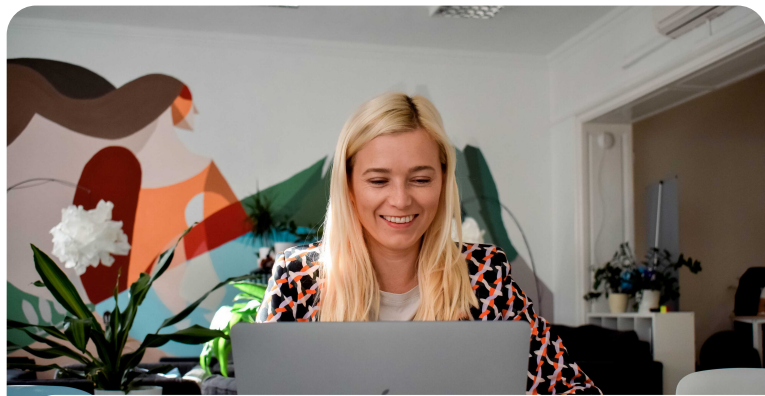

30+ professionals

#### Our Mission

We strive to **add value to society and build a better future** by assisting innovative digital health projects, turning visions into reality with streamlined workflows. We offer a blend of technical expertise **while integrating our experts into your team**, ensuring a seamless project execution process.

#### Benefits of working with us:

- Extend your team's **capabilities** and **knowledge**
- Deliver your project **on time** and **within budget**
- **Protect your rights**, and sign an NDA with us

#### What we value:

- We're agile, which allows us to **react and respond faster than industry giants**
- Our company culture is based on **reliability**, sophisticated work ethics, **transparency**, and **mutual respect**
- We **believe in continuous learning**, and development so that we can implement the latest technologies
- [Check out what our partners think about us](#)

#### How we can help:

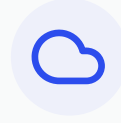

Web and mobile applications

Automatization

Migration

Cloud platforms

Containerization
