

## Turn your 3D data into immersive presentations

**Save time, money and  
increase your efficiency.**

### The app

With Virtofy, you can turn your existing 3D data (CAD files, 3D scans) into **immersive presentations**. Simply import it and create interactive tours for VR & beyond. Present in **live meetings** with multiple participants and use interactive presentation tools.

### Industries

Virtofy is suitable for a wide range of industries from urban planning, architecture, construction, machinery, plants, automotive to art & design.

### Use cases

**Planning** | Improve communication to define project goals more clearly and to increase common understanding among all stakeholders.

**Sales** | Showcase your products and services in the best way possible. Increase customer loyalty and sales figures and make your competitors look old.

### Virtofy for Training (in development) |

Use special learning & training features to ensure higher motivation, comprehensibility and a more sustainable transfer of knowledge.
