

REAL-TIME RISK INTELLIGENCE

Hozint is a situational awareness monitoring platform powered by human and Artificial Intelligence

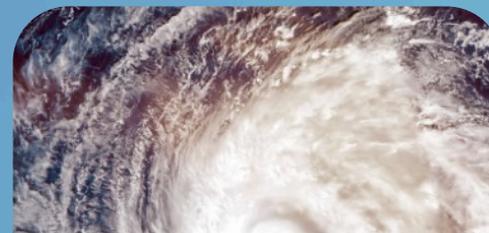

Hozint – Horizon Intelligence is a leading threat intelligence solution provider based in Brussels, Belgium.

Organisations face a wide range of threats to their security & business continuity

- Conflicts
- Crime
- Terrorism
- Protests
- Epidemic
- Natural disaster
- Travel disruptions
- Supply chain disruptions
- Political instability
- Sanctions
- Etc.

**We provide the most cost-effective solution
for real-time alerts on physical security &
situational awareness by combining
human and Artificial Intelligence**

Our AI technology has been trained on over 500,000 incidents to identify current and future threats that may impact your physical security and business continuity.

Our solutions

Hozint provides access to the latest safety, security & travel risk alerts via both a user-friendly online platform and APIs.

Platform

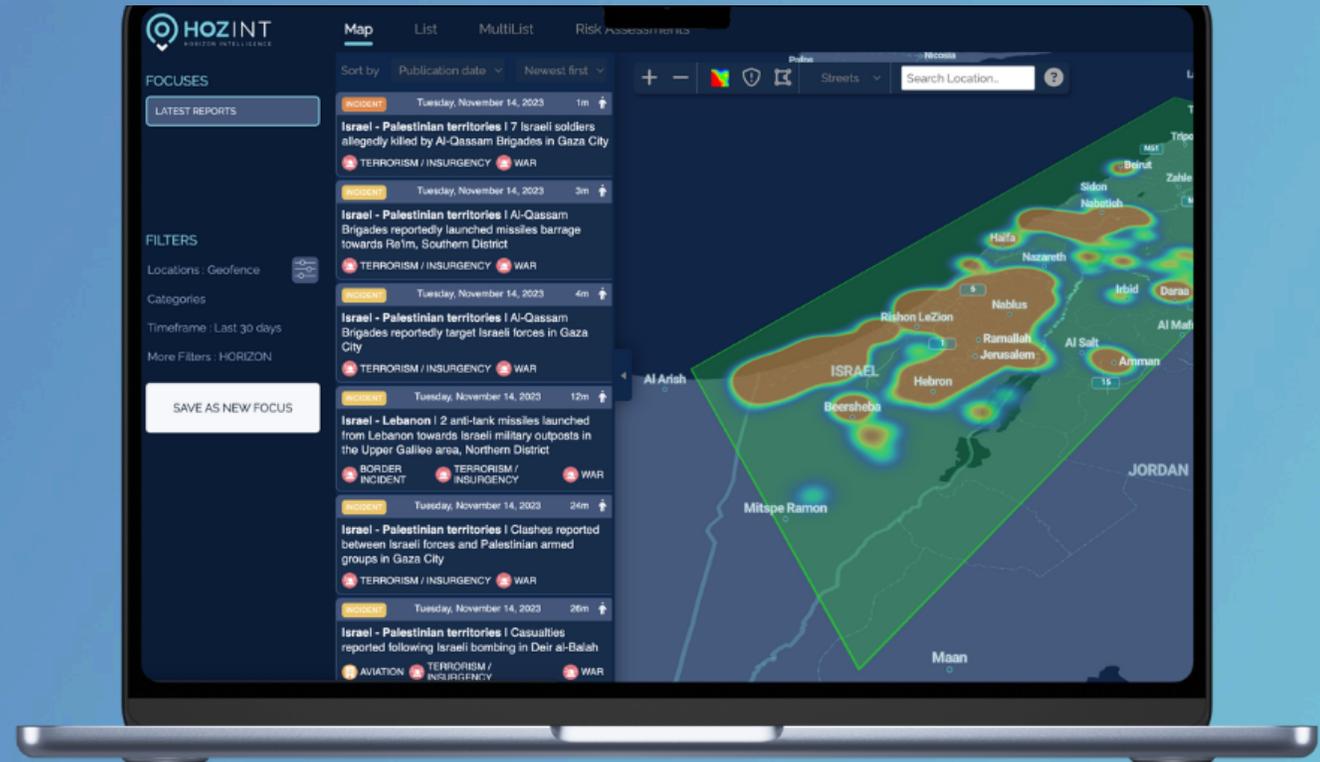

Our all-in-one dashboard provides user-friendly access to both analyst-verified reports and real-time alerts generated by our proprietary AI technology.

API

Thanks to our APIs you can easily import real-time alerts and country profiles into your own platforms and mobile applications.

Our online platform **Hozint AI** provides a user-friendly access to the latest safety, security & travel risk alerts, so that you can monitor and assess risks in real-time

The screenshot displays the HOZINT interface with the following elements:

- Navigation:** "Map", "Multi List", and "Risk Assessment" tabs at the top.
- Left Sidebar:** "RESET FILTERS" button, "MY FOCUSES" (+), "SHARED FOCUSES" (+), "FILTERS" (-), and expandable sections for "Location", "Category", "Timeframe" (set to "Last 30 minutes"), "Keywords", and "More Filters".
- Incident List:** A vertical list of incident cards, each starting with "INCIDENT", a timestamp, and a category icon. The visible titles are:
 - India | Bomb threats target hotels in Tirupati, Andhra Pradesh (TERRORISM / INSURGENCY)
 - Turkey | Terror operation in Ankara: 33 detention decision (TERRORISM / INSURGENCY)
 - Turkey | Forest fire in Denizli: Re-start the weather (WILDFIRE)
 - Nigeria | Police arrest 21 'political thugs' over attempt to disrupt Kaduna LG polls (ELECTION)
 - Turkey | 27 civilians were killed with Turkish strikes in Syria (WAR)
 - Mexico | Fire armed men van on the
- Map:** A world map on the right with a red location pin in North America and a green location pin in Europe. A circular overlay with the number "5" is visible over the map.
- Search:** A "Search..." input field at the top right.

HOZINT AI

Our AI alerts help you respond to critical events in near real-time by providing a constant flow of timely and relevant information.

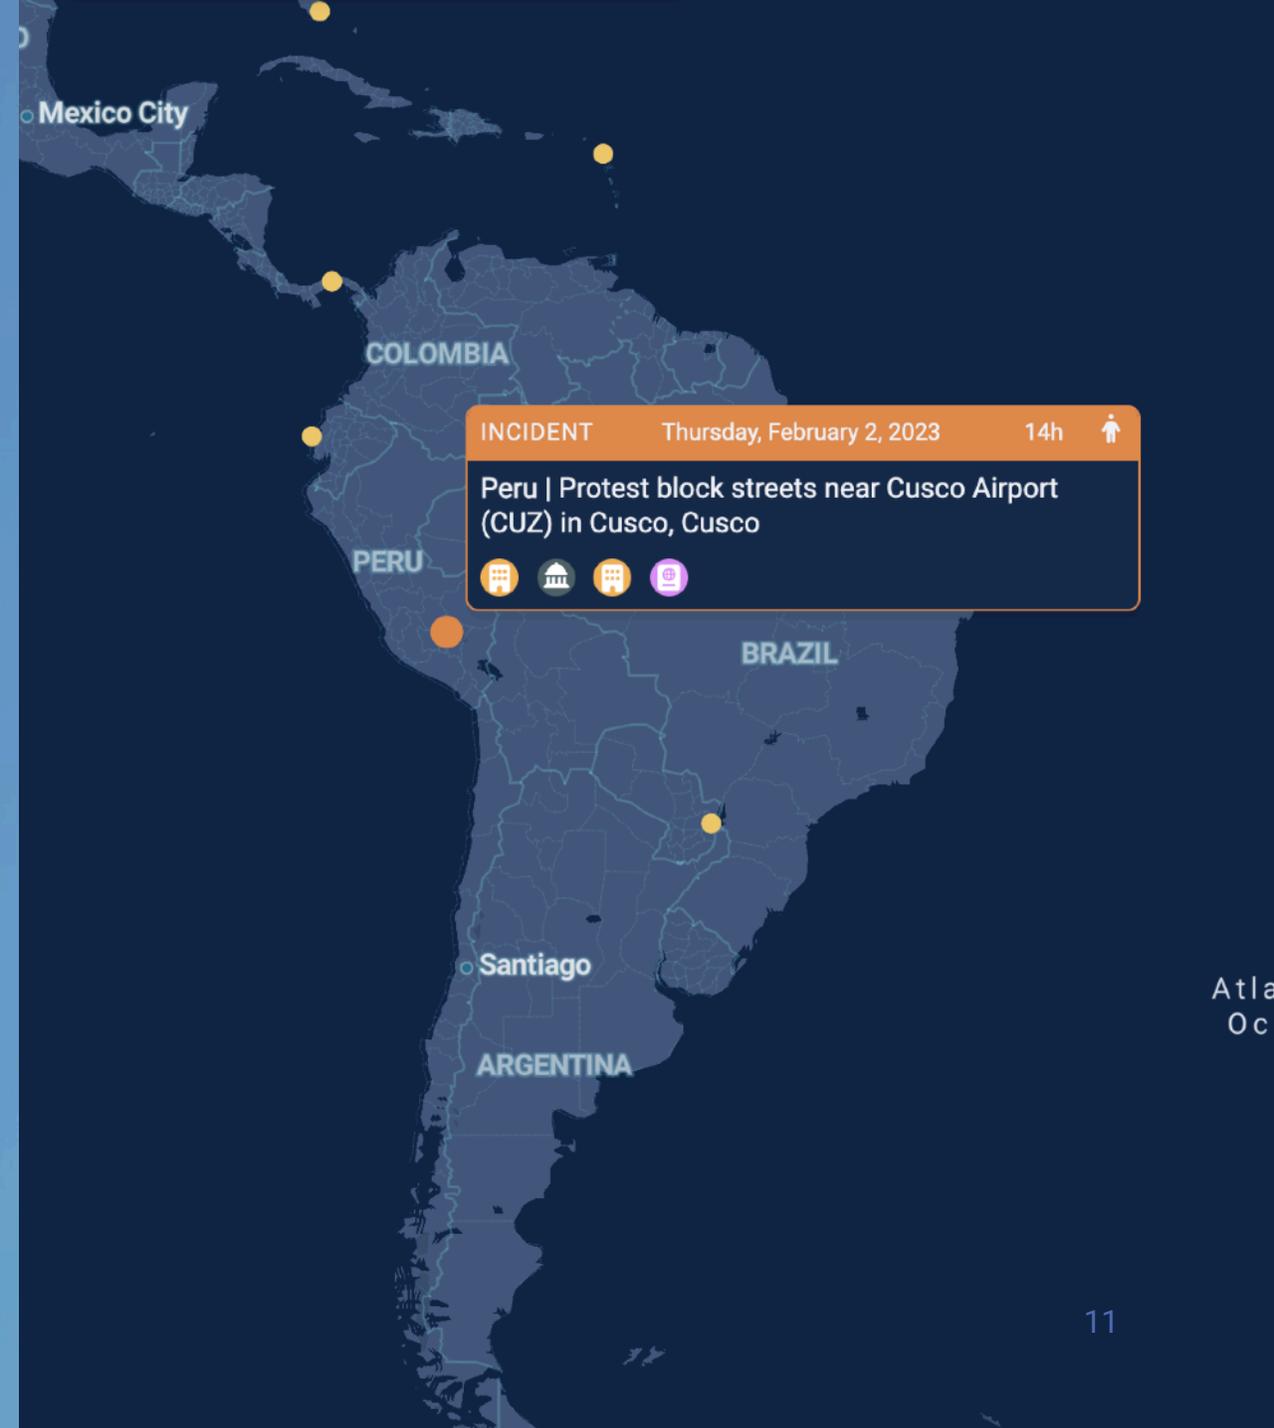

ANALYST-VERIFIED

Our team of analysts fact-checks the information discovered by the AI to ensure veracity and accuracy.

FORWARD-LOOKING THREAT DETECTION

Our forward-looking alerts will notify you about possible disruptions with days or weeks in advance, so that you can plan ahead and mitigate your risks.

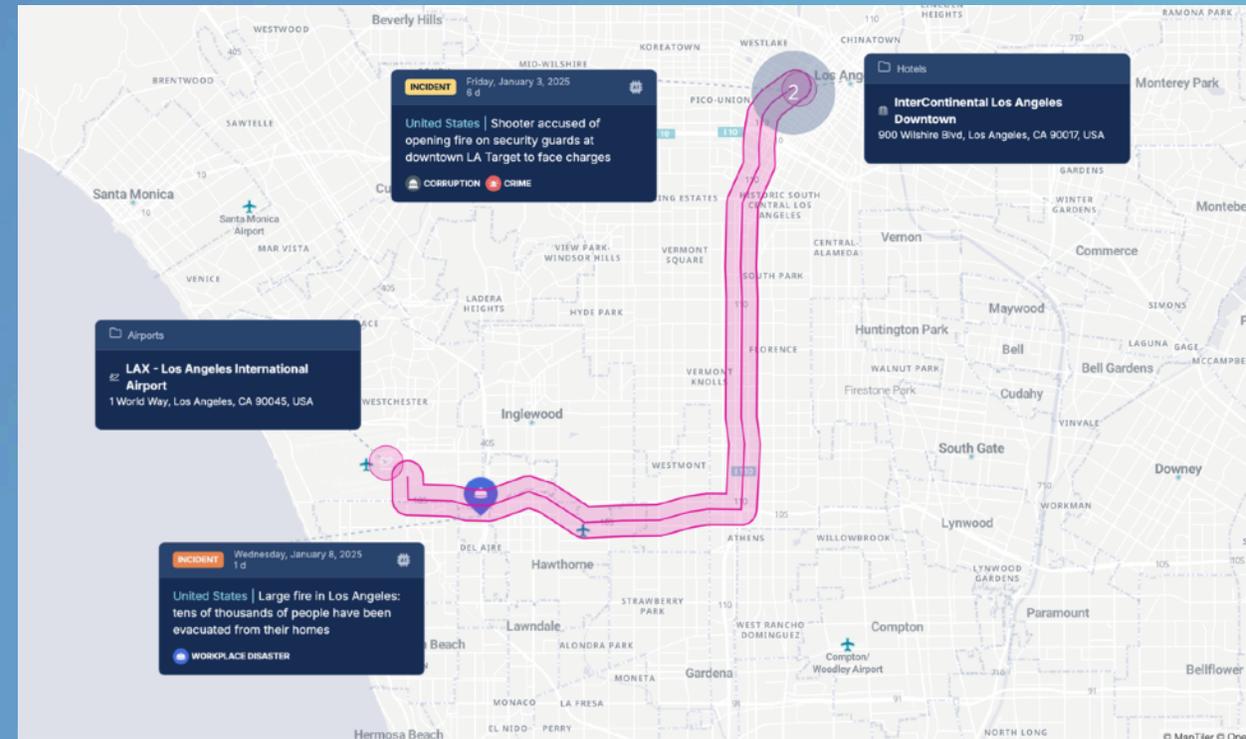

ASSETS MONITORING

Upload your assets (office, hotels, suppliers, etc.) and monitor what is happening in their proximity in real-time with our advanced geofencing tools.

Create custom geofenced itineraries to monitor and receive alerts for security incidents along specific routes or locations of interest.

CRIME

MULTIPLY YOUR FOCUS

With our Multi List view, you can monitor several situations simultaneously and never miss a critical alert.

TRAVEL RISK ASSESSMENTS

Our team provides up-to-date risk assessments on travel security, terrorism, crime, political violence, health & epidemic, natural hazards and transportation.

APPLICATION PROGRAMMING INTERFACE

We provide the following APIs:

- ✓ **Hozint AI:** AI-generated alerts that help you respond to critical events in near real-time by providing a constant flow of timely and relevant information (avg. 5k reports / day).
- ✓ **Verified:** Analysts fact-checks alerts to ensure veracity and accuracy so that you can proceed with speed and confidence (avg. 300 reports / day).
- ✓ **Risk Assessments:** Our team delivers up-to-date risk assessments on travel security, terrorism, crime, political violence, health, natural hazards, and transportation. Compare countries to understand and evaluate their relative risk levels.

Methodology

Verified API

INTELLIGENCE GATHERING

Automated AI crawling of 10K+ sources:

- International & Local media
- Social media: (e.g. Twitter, Facebook, Telegram, etc.)
- Governmental websites
- Possibility to add sources
- Sources are classified by country, language, type and credibility (work in progress)

AI PROCESSING

Our AI software "Hozint AI":

- Selects relevant information
- Translates them into English
- Classifies them by topic, location and impact
- Sends a draft alert to our analysts for verification and to the platform as an "early warning" alert (avg 5 minutes delay)

HUMAN VERIFICATION

Our team of analysts:

- Verifies the information based on our client's needs & requirements in order to provide a customised approach (avg. 15-20 minutes delay)

PLATFORM

Alerts are disseminated via the Platform and APIs:

- **Platform:** Horizon+ displays both early warning alerts generated by the AI, and verified ones by Hozint's analysts.
- **APIs:** we provide APIs for both human-verified alerts (Verified) and AI-generated ones (Hozint AI)

Hozint AI API

Filter information by selecting among more than 50 categories
