Peter's Land

Date of registration	2025-05-17
Project name	Peter's Land
Project Holder	Bauernmarktfahrer Karmelitermarkt
Project Area in hectares	2.6
Regenerative solutions applied	Humus Production, Cover Crops, Edges of fields - Ecological Focus Area EFA, Hedges - Ecological Focus Area

Voluntary attributes

Area-under-Management Date	2014-04-01
Regeneration Strategy	Humus production through microbial carbonisation. plastic-free and fossil-fuel-free production.
Policy Programs	Green Claims Directive - European Commission, Natürlich gut essen - City of Vienna
Market Makers	Regional Farmer Market – Trader, Farm-gate sale

Project Description

At Peter's Land, we practice sustainable, nature-friendly farming with a strong commitment to organic principles. As an organic market gardener, I take pride in offering you fresh, organically grown vegetables harvested straight from the field—free from chemical additives, for healthy and flavorful food you can trust. In addition, I operate a small, specialized biogas facility that processes 25 to 50 kg of biomass daily. This renewable energy source helps extend the growing season in my greenhouse by several weeks in both spring and autumn. A unique aspect of my farm: my vegetables are grown entirely without agri-diesel, making them not just organic, but also energy-responsible.
