## Our Story

Metbus began its journey with just two electric buses.

Today, it operates one of the largest electric fleets in the world outside China—nearly 1,000 buses serving millions of passengers every month.

This evolution reflects a long-term vision: to transform urban mobility through innovation, purpose, and people.

## Scale & Impact

- 3,000+ drivers leading the transformation.
- 900+ BYD electric buses in daily operation.
- Zero-emission mobility improving Santiago's air quality.
- Alliances with world-class partners in charging, telemetry, and data analytics.

## Technology & Innovation

We integrate data, people, and processes to design the future of transport:

- Smart charging systems and ISO 50001 energy management.
- Real-time telematics and performance monitoring.
- Optimization of routes, schedules, and energy efficiency.
- OCPP interoperability and advanced fleet analytics.

## Sustainability Leadership

Metbus reduces over 430,000 tons of CO<sub>2</sub>, promoting cleaner air and healthier cities.

Our leadership goes beyond technology — it's about people, resilience, and education for a just energy transition.

---

## The Future We Drive

The next revolution in public transport isn't only electric — it's strategic, data-driven, and human-centered.

Metbus is shaping that future today.

*"We move for you"*
