

XAPI

Effortless Governance for the Digital Enterprise

YOU CAN'T GOVERN WHAT YOU
CAN'T SEE

INTRODUCTION

The New Era of Digital Complexity

01

APIs, data pipelines, and AI models grow faster than teams can govern.

03

Enterprises today operate in a hyper-connected, data-driven world

02

Compliance, trust, and visibility are harder and more critical than ever.

04

Governance has become the foundation for innovation, not a barrier.

THE CHALLENGE

Fragmented Oversight Slows Growth

Data, API, and AI systems often managed in silos.

Manual compliance = friction, blind spots, and high operational cost.

Growing regulations (**GDPR, PDPA, EU AI Act**) create constant pressure.

Teams lose time managing complexity instead of innovating.

THE SOLUTION

Effortless Governance with Xapi

UNIFIED GOVERNANCE

Xapi simplifies governance across data, APIs, and AI — all within a single, unified platform.

AUTOMATED COMPLIANCE

It automates compliance, enforces policies in real-time, and keeps everything audit-ready without human overhead.

POLICY ENFORCEMENT

Enforces policies in real time to maintain consistency and control across all systems.

REALTIME VISIBILITY

Keeps everything audit-ready with continuous monitoring and transparent oversight.

EFFORTLESS OVERSIGHT

Governance happens quietly in the background — simple, seamless, and effortless.

PLATFORM HIGHLIGHTS

Smart, Unified, and Built for Scale

DATA GOVERNANCE

Automated cataloging, lineage tracking, and metadata enrichment.

Real-time compliance monitoring aligned with GDPR, CCPA, and PDPA.

Built-in audit trails and reporting dashboards.

API GOVERNANCE

Design-first governance with embedded policy checks.

Centralized API catalog and version management.

AI-powered API review and lifecycle automation.

AI GOVERNANCE

Model lifecycle management ; versioning, deployment, and retirement.

AI risk, bias, and transparency tools aligned with new AI regulations.

Role-based control and automated documentation.

AI-POWERED INTELLIGENCE

Making Governance Smarter

01

Xapi Inspector

AI auditor that reviews API specs, finds issues, and recommends optimizations before release.

02

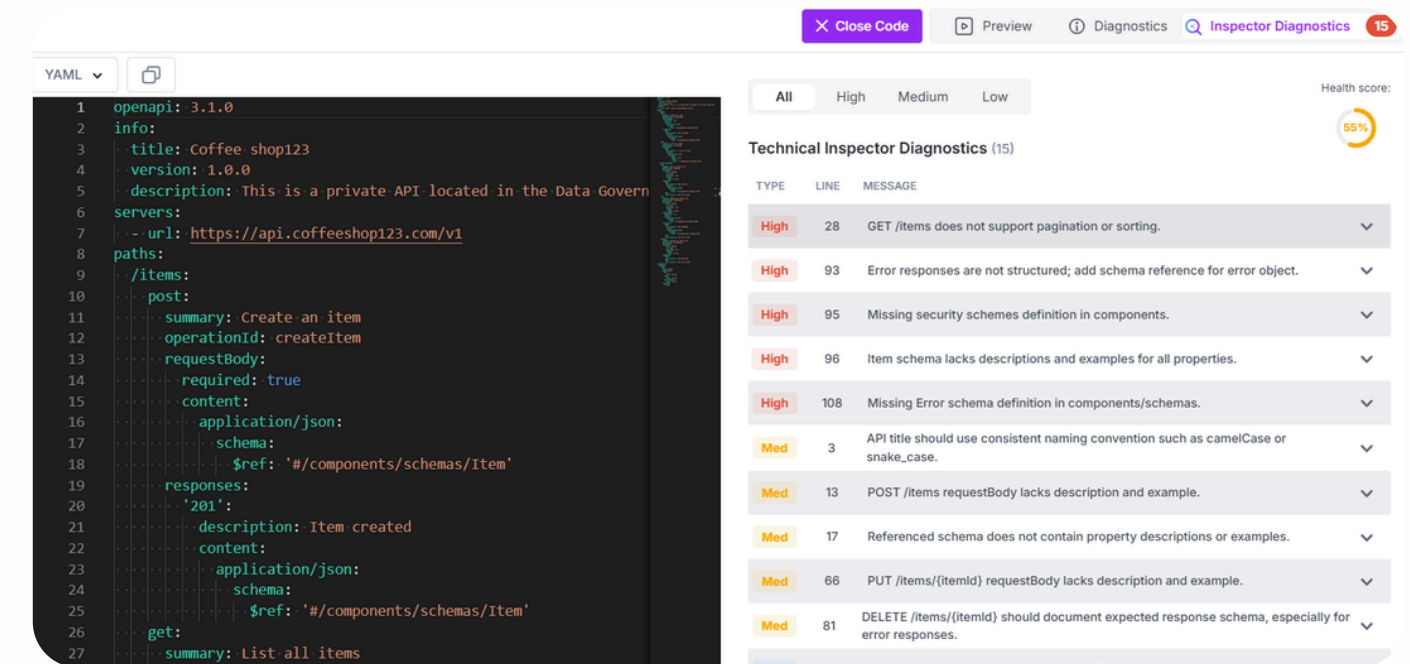

Xapi Copilot

Conversational AI assistant that helps teams explore APIs, generate change requests, and manage tasks.

03

Xapi Magic Tool

Automatically enhances data forms with semantic metadata and user-friendly design.

Welcome to your Xapi Copilot

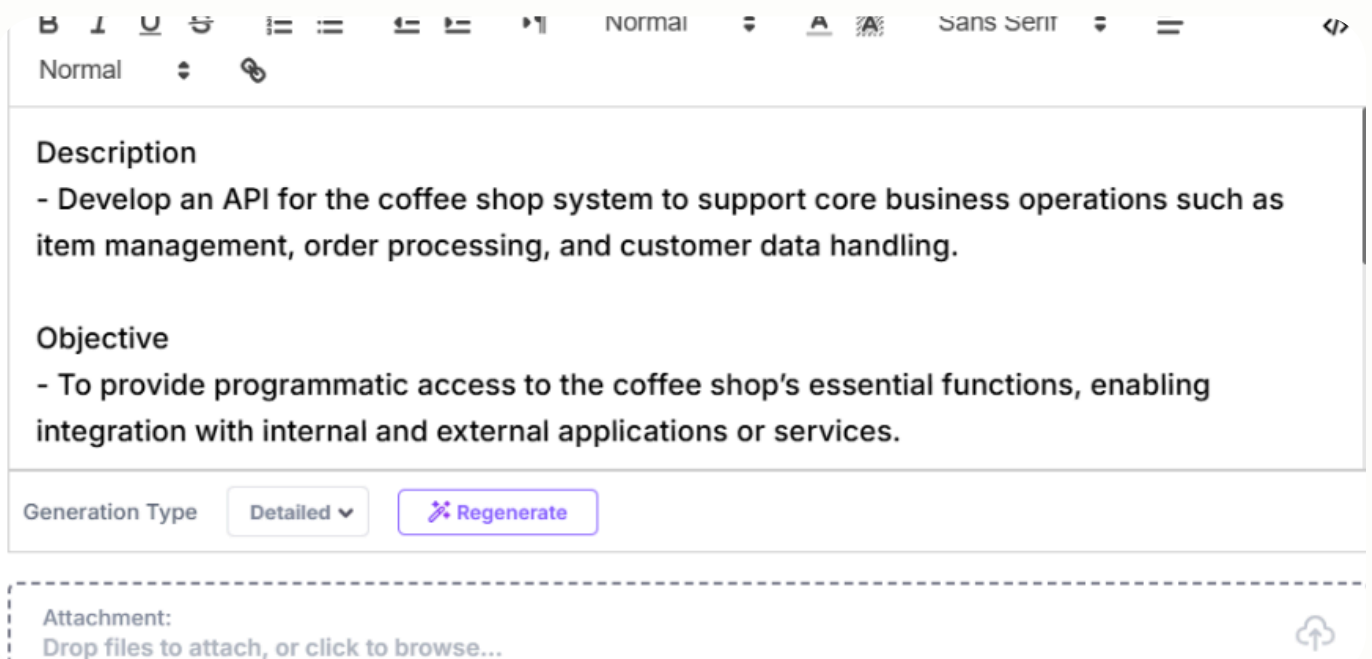

Design faster, solve issues, and explore new ideas with your personal API design assistant.

Ask anything — from creating APIs to fixing OpenAPI errors.

How can I use OpenAPI to generate API mocks for testing?

What are the best practices for writing a good OpenAPI spec?

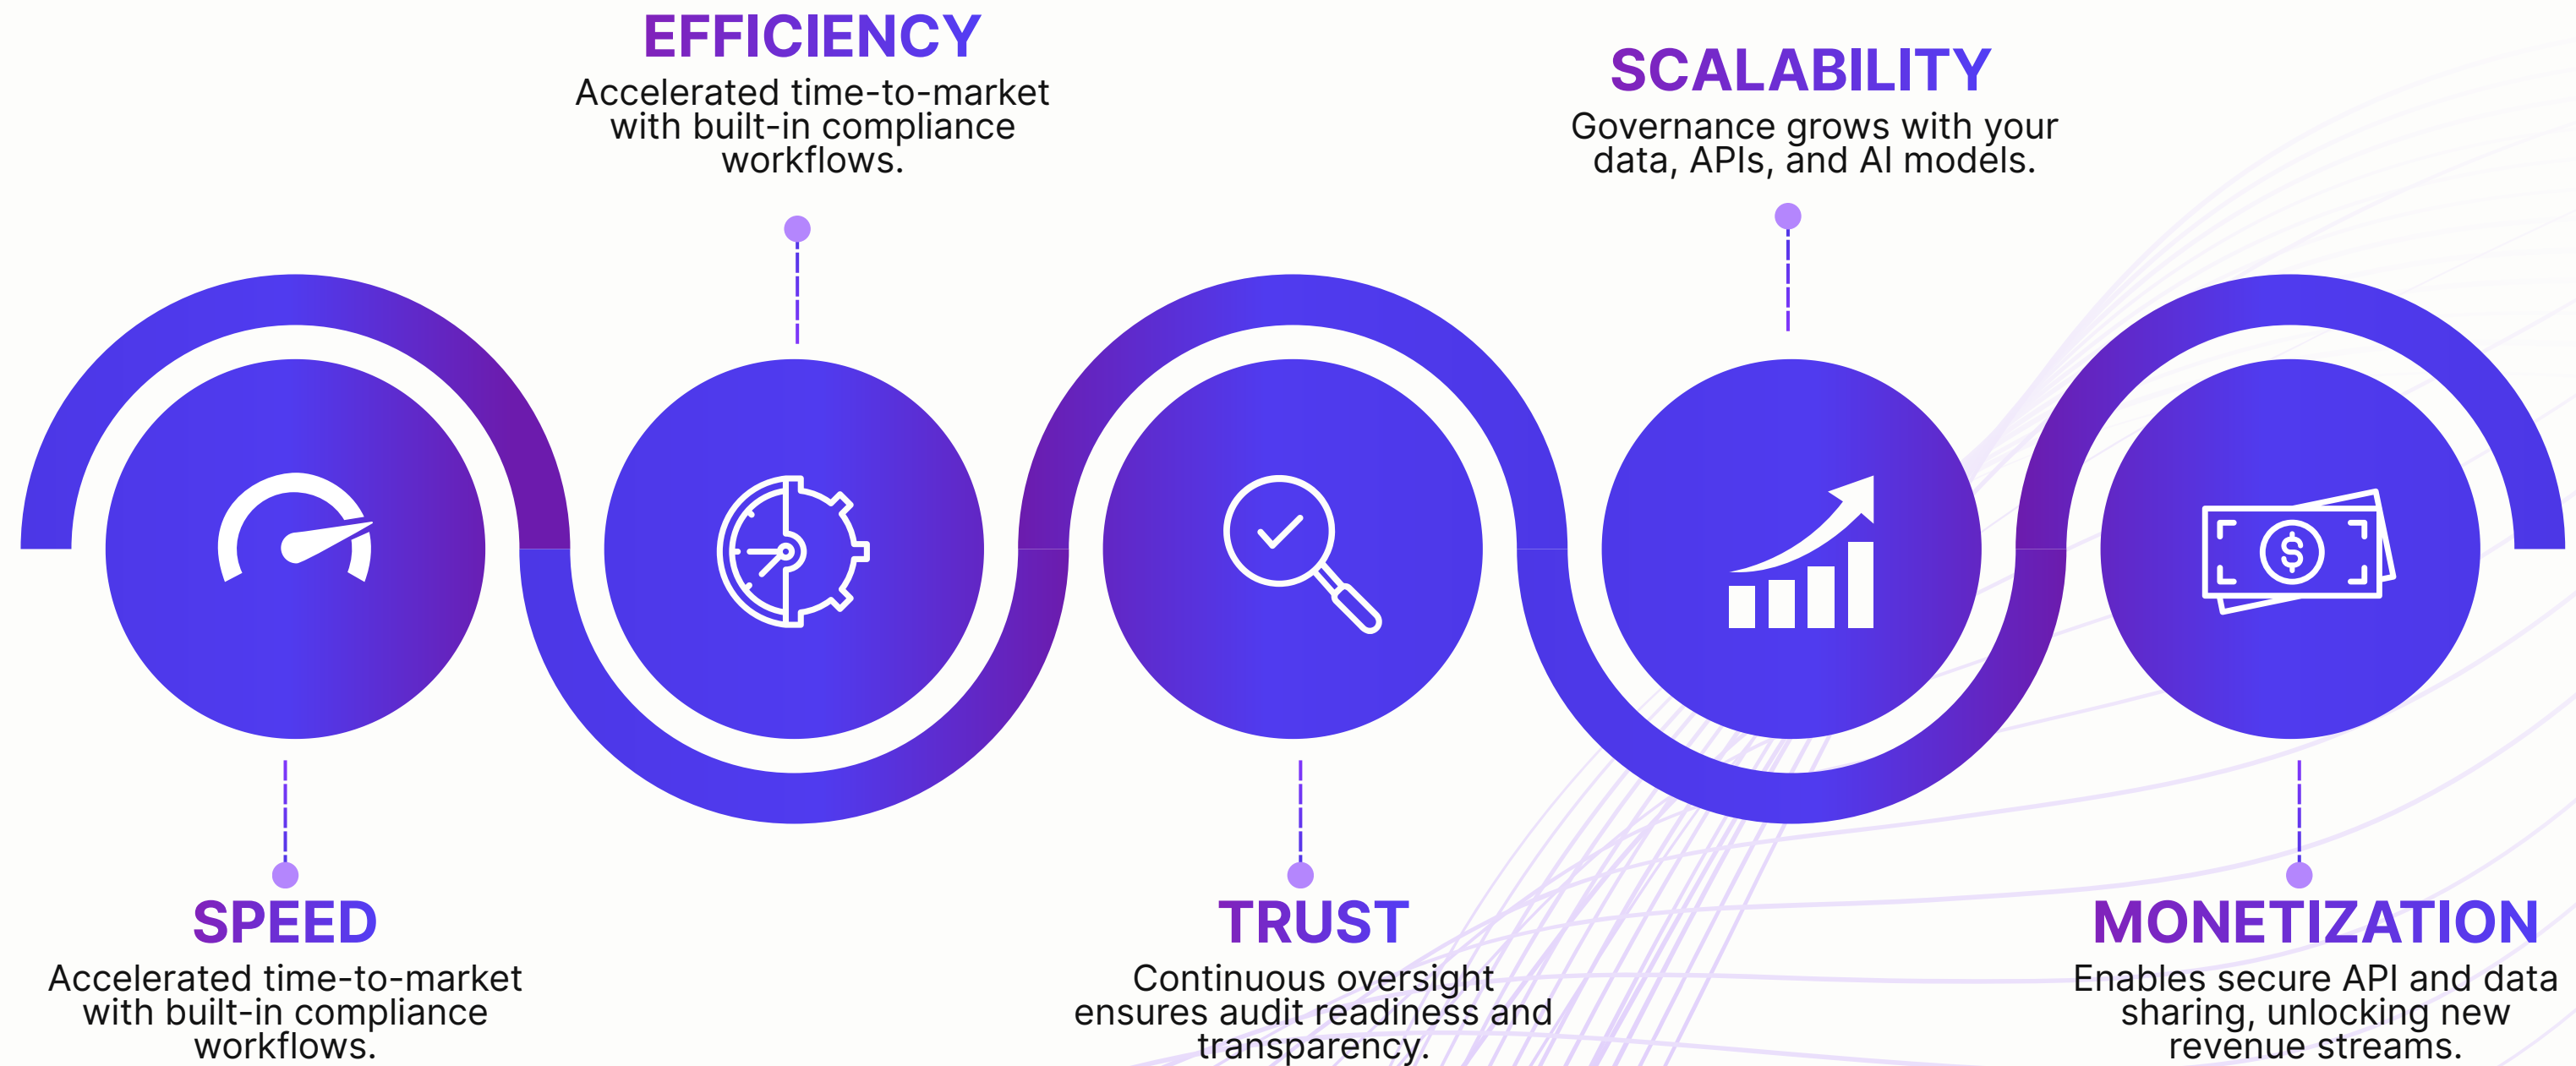

How do I define paths in OpenAPI?

BUSINESS IMPACT

Governance that Drives Growth

XAPI

WHY XAPI?

Designed for the Future Enterprise

UNIFIED PLATFORM

Data, API, and AI governance in one place.

DOMAIN MASTERY

Deep domain expertise across BFSI, Telecom, Logistics, and SaaS.

SCALABLE ARCHITECTURE

Cloud-native, scalable, and compliant with global frameworks.

FUTURE-READY

Evolving continuously with new AI and data regulations.

CASE STUDY

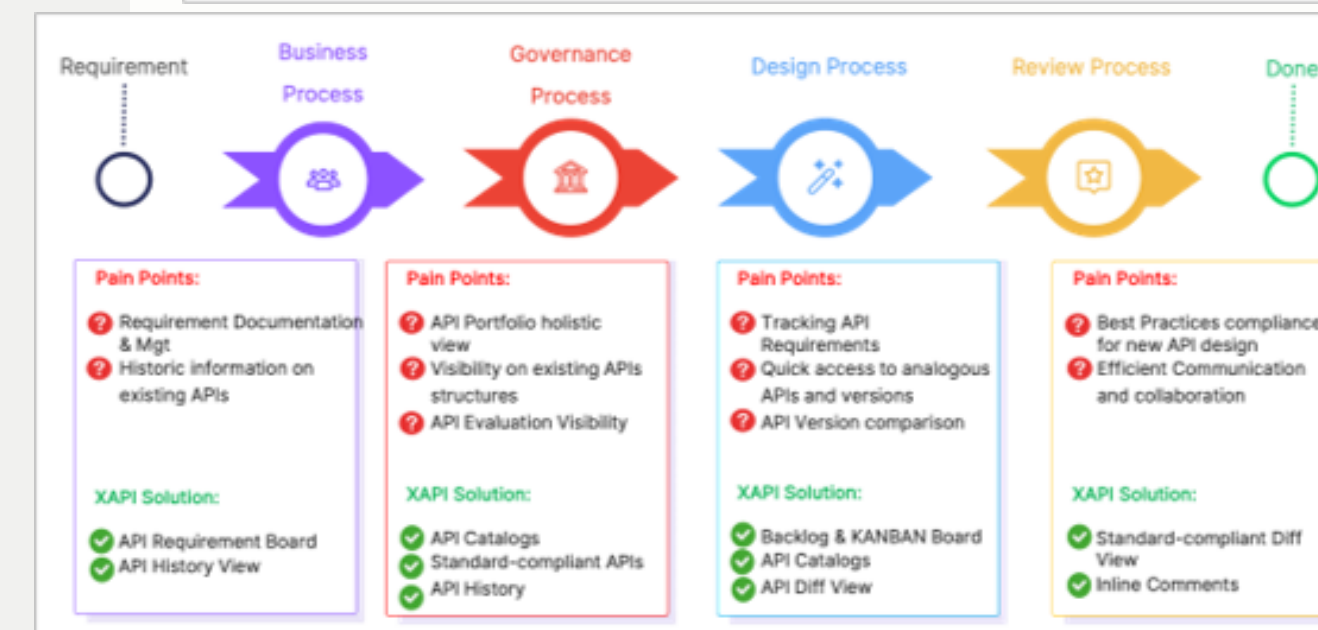

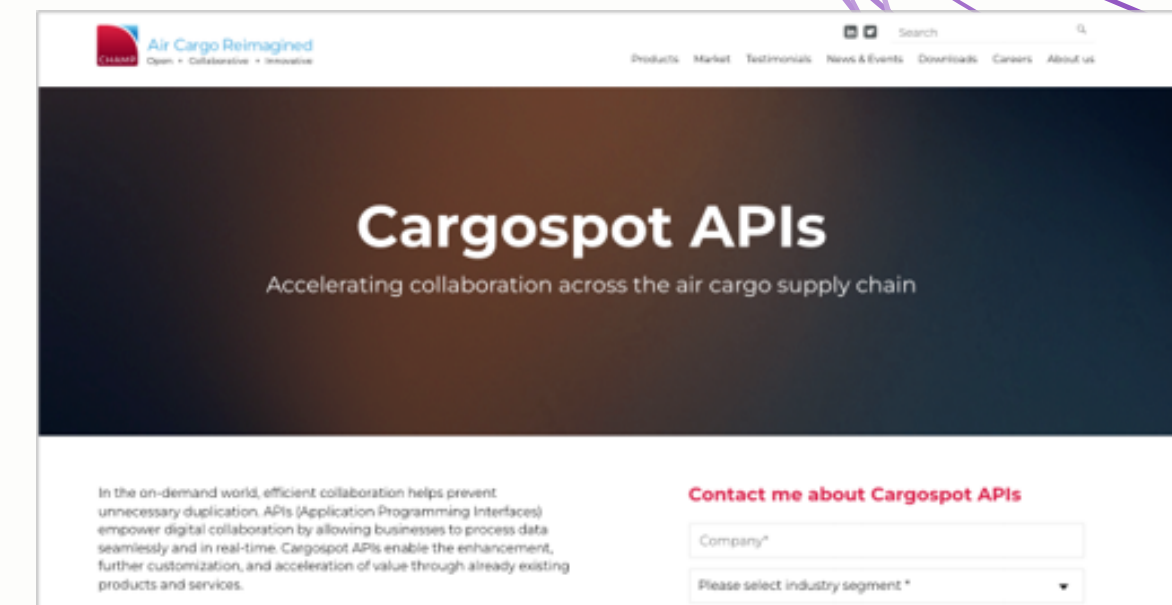

Champ: API Governance Transformation with Xapi

Challenge

One of the world leading AirCargo organization transforming their API design and governance process with Xapi. Our platform will be their key API design and governance platform among 200+ developers who are working on multiple applications and APIs.

Outcomes

- **Efficiency Boost:** Automation and optimization of processes
- **Integration Excellence:** Seamless collaboration between different systems
- **Innovation and Agility:** Faster development and adaptability to changes.
- **Scalability:** Easy expansion to handle increased loads.
- **Cost Savings:** Reduced manual efforts and faster time-to-market
- **Improved Customer Experience:** Personalization and accessibility across channels
- **Data Security and Compliance:** Secure data transfer and adherence to regulations
- **Monetization Opportunities:** Potential for creating new revenue streams
- **Collaboration:** Building an interconnected business ecosystem
- **Analytics and Insights:** Collection and analysis of valuable data for informed decisions

XAPI

THE FUTURE

Effortless Governance, Everywhere

Our roadmap evolves from unified governance toward AI-native compliance automation, continuously introducing deeper visibility, real-time risk scoring, and predictive compliance. The ultimate goal is to make governance invisible yet always-on, transforming it into a true business enabler for digital enterprises.

XAPI

Let's make governance effortless together.
