

COMPANY PROFILE

LBTP - LABORATOIRE DU BATIMENT ET DES TRAVAUX PUBLICS

The LBTP – LABORATOIRE DU BATIMENT ET DES TRAVAUX PUBLICS is a leading technical body dedicated to ensuring the quality and safety of infrastructure, specialising in studies, laboratory testing, inspection, research and consultancy in the fields of CIVIL ENGINEERING, CONSTRUCTION, ENERGY AND INDUSTRIAL CONTROL.

Through its work, LBTP provides essential technical solutions, particularly in the areas of geotechnical and geophysical surveys, material quality control, electrical installation safety (SECUREL), electrical installation assessments, inspection of pressure equipment, energy efficiency, energy audits and the inspection of existing infrastructure. It plays a crucial role in ensuring the compliance of works, the durability of structures and the safety of installations in demanding environments such as the mining, hydrocarbons and industrial sectors.

Committed to a quality-focused approach, the LBTP's management system is certified to the ISO 9001:2015 standard and its laboratory is accredited to the ISO/IEC 17025:2017 standard. It also contributes to applied research, professional training and the continuous improvement of construction techniques, thereby helping to build local capacity and modernise infrastructure.
