FOR A SUSTAINABLE FUTURE  
OF OUR MANUFACTURING COMPANIES

# GET FASTER TO THE FACTORY OF THE FUTURE WITH 24FLOW

**Factory of the Future is a label awarded by Agoria**, the Belgian federation of tech companies, to manufacturing companies that demonstrate a commitment to promoting a sustainable future for the industry in Belgium. This prestigious label evaluates companies based on seven key criteria:

- Advanced manufacturing technologies.
- Integrated engineering.
- Digital factory.
- Human-centered organization.
- Networked factory.
- Eco factory.
- Smart manufacturing.

This **transformation into a Factory of the Future is essential** to remain competitive in a fast-changing industrial environment. It empowers manufacturers to operate in a more resilient, efficient and sustainable way.

# ALTACHEM A FACTORY OF THE FUTURE

**Altachem**, a subsidiary of the Lindal Group, is a global leader in the production of valves, application tools, and accessories for 1K-PU foam (1 component PU foam) in pressurized cannisters. To maintain its strong market position in a rapidly evolving industry, the company continuously adapts and innovates

**Modernizing production processes, accomplishing efficiency gains, and fostering innovation are crucial to remain competitive.**

Altachem has emphasized continuous improvement and transformation through state-of-the-art assembly lines featuring high levels of automation and data analysis, resulting in a considerable increase in production efficiency.

**Sustainability** and the **employee well-being** are also top priorities for Altachem's management. They introduced a well-being program that improved the health and happiness of its personnel.

These efforts were rewarded with the Factory of the Future label for innovation and sustainable production. Altachem has been a long-time user of the **24Flow** operations platform for digital process monitoring on the shopfloor.

**Altachem proves that even an SME with just thirty employees can excel on a global stage.**

**With an unwavering commitment to technology, customer satisfaction, and employee wellbeing,** Altachem stands out as a remarkable example of a Factory of the Future, a transformation accelerated by **24Flow.**

# 24FLOW AND THE FACTORY OF THE FUTURE

A MODULAR AND HUMAN CENTERED OPERATIONS PLATFORM

Digital technology is the way to the Factory of the Future for manufacturing companies.

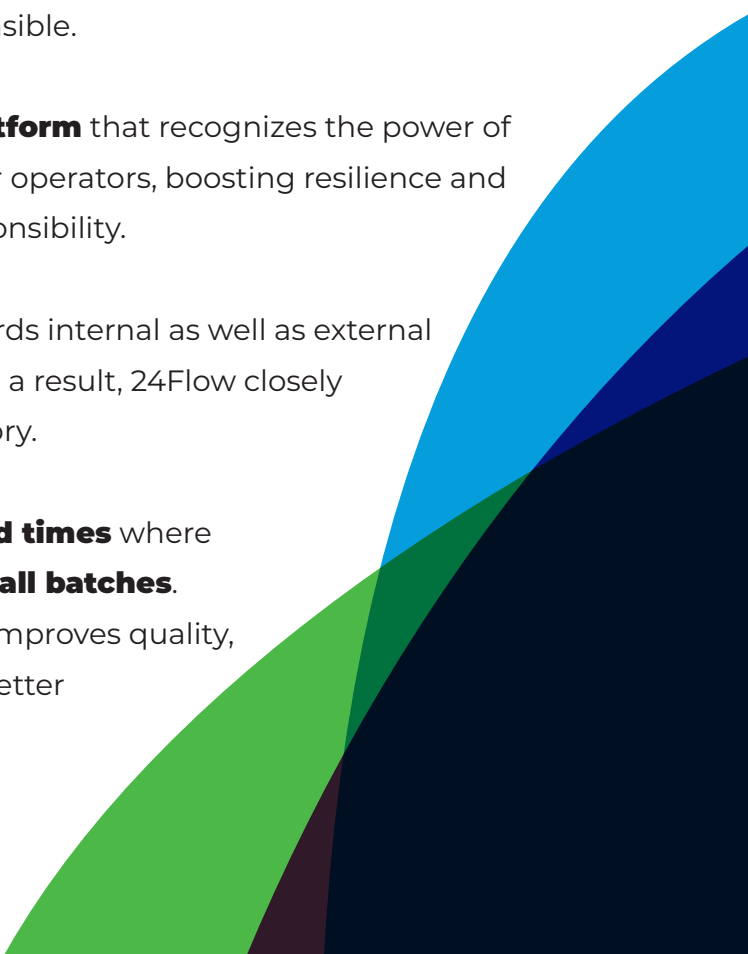

24Flow empowers the **digital factory** by eliminating paper to the maximum extent and digitizing processes wherever feasible.

24Flow is a **human-centric operations platform** that recognizes the power of people. 24Flow creates visibility for shopfloor operators, boosting resilience and encouraging a sense of ownership and responsibility.

24Flow **unlocks shopfloor data**, both towards internal as well as external stakeholders within a broader ecosystem. As a result, 24Flow closely aligns with the concept of a networked factory.

Finally, 24Flow is dedicated to **reducing lead times** where products are produced in a smart way in **small batches**.

This reduces overhead and inventory costs, improves quality, and reduces waste, which contributes to a better **sustainability** of the factory.

# ARE YOU READY FOR THE FACTORY OF THE FUTURE?

**24Flow's** modular operations platform accelerates the road to the Factory of the Future, a prestigious label awarded by Agoria with the goal to promote a sustainable manufacturing future in Belgium.
