

SMART SPACES FOR ACCOMMODATION

Step into the peace of nature

In today's fast-paced world, people don't want to buy things, but to invest in experiences.

The place,
you'll always
want to revisit.

SMART LUCIA

Because nature is a luxury item

WAKING UP fully rested in nature's arms, with the first rays of the sun caressing your face, is a luxury experience you can't put a price on. By being one with nature and achieving a complete peace of mind, you can become the most radiant version of yourself.

SMART LUCIA

More the merrier

LUCIA SMART works beautifully also in a resort setting. Placing several Lucia Smarts side-by-side makes for a never-before-seen wow factor. It's the new way of building a breathtakingly impressive resort. Privacy is ensured with mirrored glasses, half curtains or solid wall materials.

SMART LUCIA

A Smart investment that holds its value

DESIGN

OUR LUCIA SMART products are designed by Finnish designers Teemu Pirinen and Lauri Salo and are made from the highest quality materials. The luxury spaces have mirrored glass walls, so you can see the wildlife up close and truly feel a part of your surroundings.

INVESTMENT

OUR GLASS SPACES are wanted, high-quality products that are made to last and hold their value.

USE

WE PROVIDE DELIVERY for the space to exactly where you want it to be. Our products are modular and they can be divided into two parts, so getting them set up in the chosen spot is easy. The Lucia Smarts are remote controlled, so for example electricity can be turned off remotely, if needed. The maintenance services are available online and our service team will get back to you in no time.

Made to last

OUR PRODUCTS are built from a durable steel frame and electrically heated insulated glass. The materials are made to endure even the most challenging conditions and are much more long lasting than for example wood. All of the materials are always chosen according to the environment. Our goal is to ensure that Lucia Design remains its flawless condition regardless of the location.

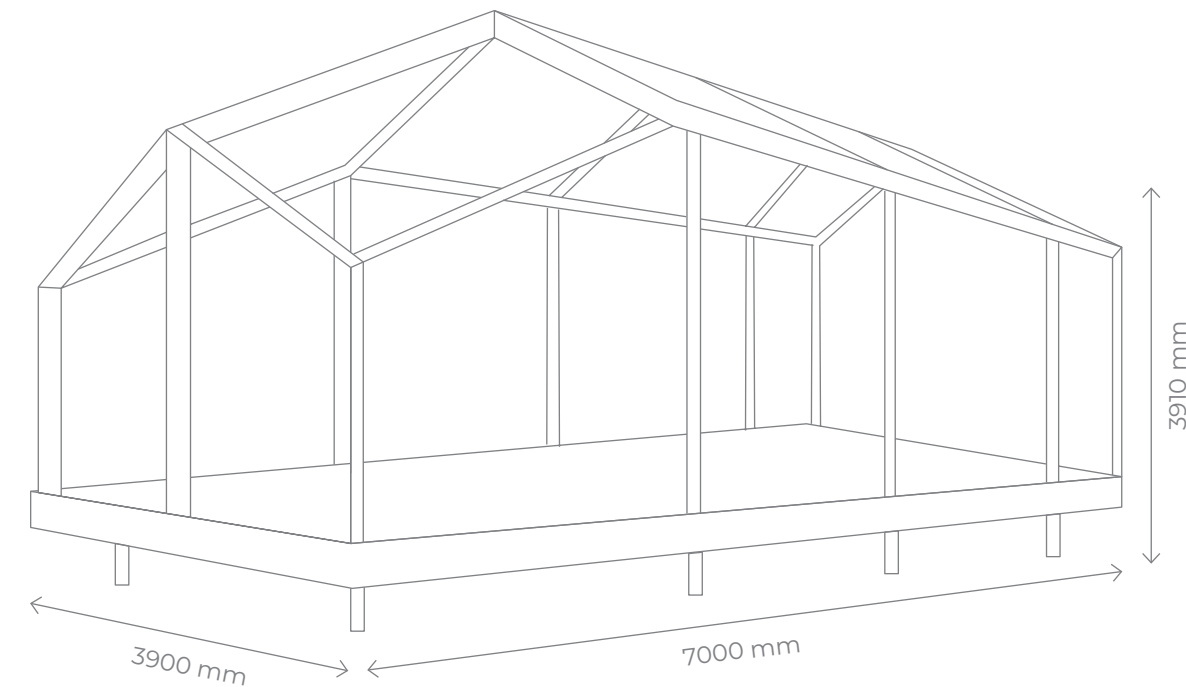

WE WANTED to make sure that Lucia Smart would be an atmospheric place to relax even in freezing weather: the heating on the inside of the walls keeps Lucia Smart warm regardless of the weather and a clear night sky opens up beautifully from the electrically heated glass roof.

WE PROVIDE THREE DIFFERENT SIZES OF LUCIA SMART SPACES:

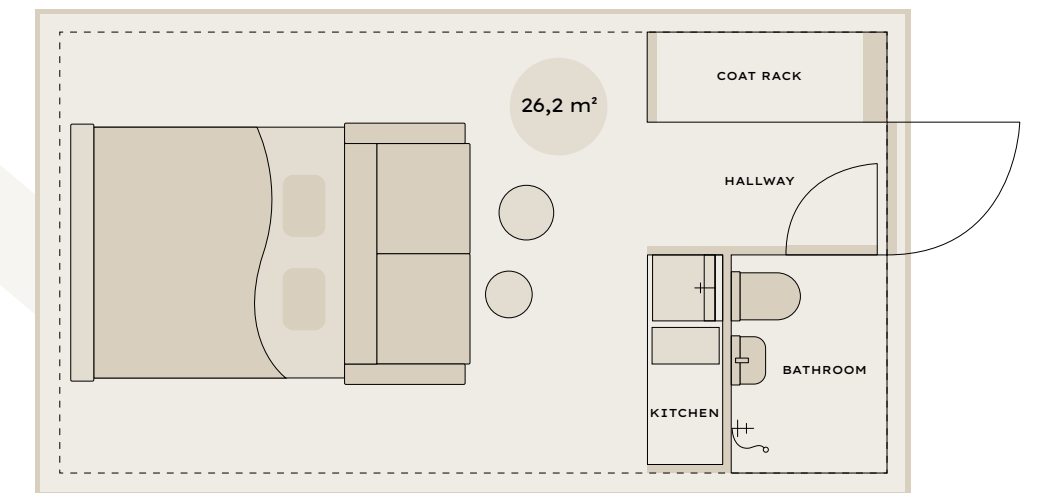

- 19,6 m², 25,5 m² and 26,2 m² (inner dimensions)

WE ALSO OFFER THREE LEVELS OF EQUIPMENT FOR YOU TO CHOOSE FROM:

- Classic, Premium and High Tech

Our products are built from a durable steel frame and electrically heated insulated glass.

Your trusted partner

“

January was the first full month having the Lucia Smart and the use rate was immediately 91%.

PETRI MAKKONEN
Arctic Lakeland Igloos,
Vuokatti, Finland

“

Lucia Smart is perfectly built to withstand strong winds and demanding weather conditions. It's luxurious and furnished to create a relaxing ambience. The best feature of Lucia Smart is that it can be sold for accommodation for all four seasons.

MORTEN NIELSEN
Hotel Arctic, Ilulissat, Greenland

“

It's a space that enables one to experience nature in all its majestic beauty.
