The Diia app is the state in a smartphone.

It offers 25 digital services that automate bureaucracy in Ukraine and 14 digital documents that are impossible to be forged or be forgotten. For example: ID-card, Foreign passport, Student Identity Card, Pension Certificate etc.

Among services available in Diia are:

- Convenient online polls that ensure digital democracy
- Transparent support for the government and Armed Forces
- Purchase of war bonds or donations via the UNITED24 platform
- Car sharing with friends or relatives
- Fine payments without the need to go to the bank

Doctor Eleks is a smart, highly customizable, and scalable software designed for healthcare organizations. It effectively combines the medical and administrative aspects of medical practice. It simplifies schedule management, patient registration, and medical documentation, streamlines patient logistics within the hospital, enhances communication and result sharing, facilitates report creation, and manages staff, finances, and inventory. Furthermore, it integrates with medical equipment. Doctor Eleks is the all-in-one solution for meeting all the clinic's needs.
