

TheGreenTech Innovation Fund

Project Idea

TheGreenTech Innovation Fund supports the demonstration and market deployment of innovative low-carbon and net-zero technologies. It aims to accelerate climate neutrality by financing mature, first-of-a-kind projects that deliver significant emission reductions. The Innovation Fund targets financing technologies at TRL 7–9, supporting their final development stages to reach the market. It aims to help projects either create a new company around the innovation or facilitate the sale of the technology to corporates, accelerating commercialization and impact.

Global Clients

TheGreenTech

We push
Innovation and Technology
from Research to Business.

TheGreenTech Innovation Fund

Dedicated investment fund supporting late-stage (TRL 7–9) green technologies sourced from leading European researchers.

Investment Focus:

- Selects 10 high-potential projects from the Innovation Forum portfolio
- Deploys €24 million directly into these ventures, with milestone-based tranches

Goal: Bridge the “valley of death” between lab and market for sustainable innovation

How It Works

Step 1: RTO, Universities and SMEs present technologies at TheGreenTech Innovation Forum

Step 2: Rigorous selection process for fund investment

Step 3: Milestone-based funding (up to €2.5M per project, in three tranches)

Step 4: Support for spin-out company creation or technology transfer to corporates

Step 5: Ongoing mentoring, commercialization support, and access to a pan-European network

Competences / type of partners sought

Why Engage?

For Research Centers, Universities and SMEs:

- Access to capital and commercialization expertise
- Opportunity to scale impact and visibility of innovations

For Corporates:

- Early access to vetted, market-ready green technologies
- Strategic partnerships and co-development opportunities

For Investors:

- Exposure to a curated portfolio of high-growth, high-impact ventures
- Alignment with EU green transition and sustainability priorities
