

ALARM AS A SERVICE

ELEMENTRIC CONTROL AND MONITORING SYSTEM

PRODUCT SHEET

Elementric's app and SMS alerts offer a convenient way to stay informed and be able to take action in a timely manner.

The drip mat is a unique opportunity to use an innovative, preventative and technologically advanced solution to monitor, quickly detect water droplets and send alerts. All drip mats in all apartments in all properties in one view for the board or manager.

By identifying leaks early, property managers can address issues before they escalate, saving on repair and maintenance costs.

Elementric's system handles encrypted data and is security verified by RISE according to standard SFF1120-1 which covers important areas such as authentication, handling of personal data, encryption, updates, vulnerability policy and other basic security requirements for IoT devices.
