Our Solution

Argus Shield Tactical Counter-UAS Protection Layer

Operational Vehicle Protection

- Designed for armored platforms
- Real-time aerial threat detection
- Autonomous tracking capabilities
- Tactical battlefield integration
- Multi-layer protection approach

MeduzaX

The Ultimate Drone Detection Optical Radar

MeduzaX delivers revolutionary EO/IR drone detection through advanced rotating optics, utilizing visual confirmation- the most dependable verification standard to provide defense and homeland security forces with precision threat detection and optimal situational awareness.

See. Understand. Respond.

- Real-time threat visualization
- Target tracking and classification
- Multi-threat management
- Rapid operational decision support
- Built for battlefield conditions

C2 Operational Logic
