What you get with ELEKS' cybersecurity services

IMPROVE INTERNAL SECURITY PROCESSES

We will help you **develop and implement a robust strategy** based on best practices to substantially **improve your corporate security posture**, increase attack survivability, and prevent any future attacks in an ever-evolving threat landscape.

IDENTIFY VULNERABILITIES TO PREVENT SECURITY INCIDENTS

We will detect vulnerabilities in network perimeter and externally facing solutions and offer recommendations for effective remediation. You'll be able to **fulfill compliance requirements for vulnerability scanning or penetration testing** of your products.

PREVENT LEGAL CONSEQUENCES OF NON-COMPLIANCE

Our proprietary compliance automation platform (eCAP) empowers our customers to consolidate and automate compliance efforts. **Reduce the total cost of compliance, resolve issues, and effectively manage changes in regulations** across your entire business ecosystem.

SCALE YOUR SALES BY PRIORITIZING SECURITY

We will guide you through implementing security controls in your software development lifecycle to ensure your products are secure by design. You'll be able to **build confidence in your brand's security practices and meet all compliance requirements**.

SECURE YOUR ENTIRE IT ENVIRONMENT

Our end-to-end hardening service will help provide security and data protection for your entire IT ecosystem. The service includes a **comprehensive cybersecurity audit, security testing, and further implementation of the outcomes** to ensure the effectiveness of your security controls.

What's included in the service

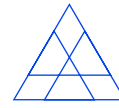

SECURITY CONSULTING

- Defining the target state of cybersecurity for the organization
- Creating the supporting documentation
- Establishing cybersecurity processes
- Execution of cybersecurity controls
- Conducting the internal cybersecurity audits
- Assistance in preparation for formal certification audits

SECURITY TESTING

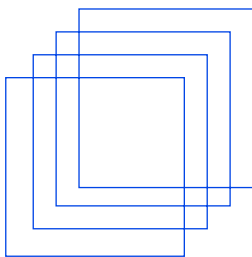

- Mobile, web and desktop penetration testing
- Infrastructure, system and application-level penetration testing
- Static and dynamic security testing
- Adherence to recognized standards including: ISO 27000, OWASP Top 10, SANS Top 25
- Vulnerability assessment
- Threat hunting

HARDENING OF IT ENVIRONMENT

- Audit of architecture, components and configuration against benchmarks/best practices
- Defining, documenting and implementing target state architecture, hardening baselines, etc.
- Providing recommendations on how to remediate issues identified through the security testing and solution audit
- Re-writing the solution source code in line with the security enhancements recommended

ELEKS COMPLIANCE AUTOMATION PLATFORM (ECAP)

ELEKS' Compliance Automation Platform is our proprietary cybersecurity software tool that helps you reduce the total cost of compliance, resolve issues and manage changes in regulations across your entire value chain by consolidating and automating all compliance efforts.

With eCAP you can:

- Cut costs by automation of information security governance activities
- Perform comprehensive security and risk management monitoring
- Improve the efficiency of internal audits and success rate of external certification audits
- Reduce risk of penalty for non-compliance with IS and data privacy regulations
- Reduce risk of cybersecurity incident as the result of more reliable security controls and monitoring

Industries we serve

Though ELEKS offers cybersecurity services across a wide range of industries, we've developed specific expertise in these sectors:

ENERGY

The energy sector is especially vulnerable to cyber risks due to the unique interdependencies between digital systems and distributed physical infrastructure. Our energy consulting services provide an integrated approach to security, safeguarding digital infrastructure and helping ensure sustainable operations.

FINANCE

To win customers' trust and improve customer retention, financial institutions must have security, data integrity and compliance as their top priorities. Our experts will help you build and implement a robust security strategy to put cybersecurity, data protection, and compliance at the heart of your financial business.

HEALTHCARE

Our team of security experts will help you optimize your security processes, identify security issues, protect sensitive patient data, set up effective remediation scenarios, and ensure compliance with the healthcare industry's standards and regulations.

INSURANCE

We use years of experience in cyber security services to help businesses in the insurance industry identify system vulnerabilities, resolve security issues, introduce effective mitigation plans, and reduce the total cost of compliance.

GOVERNMENT

We help federal agencies develop and implement a tailored security strategy, employing advanced government network security tools and robust controls to make sure their sensitive data is fully protected.

Why ELEKS?

END-TO-END SECURITY SERVICES

Our cybersecurity team has all the expertise, capabilities and resources necessary to fill any gaps at your company to support your team with implementing security controls, or even manage the entire implementation process.

BEST-IN-CLASS CERTIFIED SECURITY TEAM

Our specialists have all the essential and widely recognized information security certifications, providing our customers with confidence that our work is in line with current industry best practices. ELEKS has also passed the certification process, as a SOC2 and ISO27001/2 certified company.

ECAP PLATFORM FACILITATING COMPLIANCE MANAGEMENT

Our proprietary eCAP product enables you to build custom workflows and logic to automate your processes and execute security controls. Automating your processes with eCAP can save resources and budget, enhancing your operational efficiency.

ASSISTANCE WITH EMERGING INFORMATION SECURITY RISKS

Our security experts have cross-disciplinary expertise in modern technologies including blockchain, cloud, robotics process automation, and big data. We can successfully deliver even the most complex security projects and resolve security issues that many other vendors aren't equipped to handle.
