Blockchain
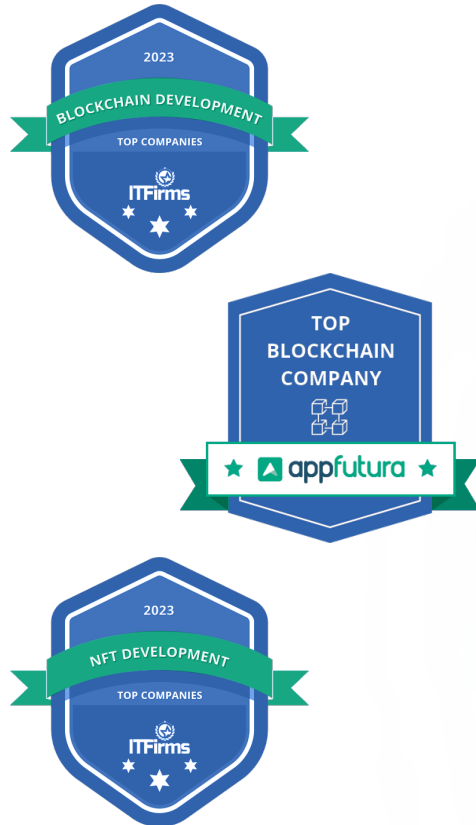

Development

Who are we?

Welcome to Nyoka, where we aren't just observing the Blockchain revolution – we're leading it. Our dedicated team of Blockchain experts, data scientists, and engineers excels in creating cutting-edge Blockchain solutions that drive businesses towards unprecedented achievements. Nyoka's powerhouse team combines a profound understanding of decentralized ledgers, smart contracts, and cryptographic protocols to unleash the transformative potential of Blockchain technology.

3+ years of experience

Trusted by US-based companies

Proven Success in Diverse Industries

Our services

01

Custom Blockchain Development

Our team of experts will design and develop tailor-made blockchain solutions to meet your specific needs and industry requirements, ensuring a secure, scalable, and efficient system.

02

Smart Contract Development and Audit

We create secure and reliable smart contracts, designed to automate processes, reduce costs, and minimize risks. Our team also offers comprehensive smart contract audit services.

03

Support and Maintenance Services

We offer ongoing support and maintenance services to ensure the smooth operation and continuous improvement of your blockchain solutions, providing you with peace of mind.

04

Token Creation and ICO/ IDO/IEO Consulting

Our team will guide you through the entire process of launching a successful token offering, including whitepaper development, token design, marketing, and regulatory compliance.

05

Blockchain Integration with Existing Systems

We will help you seamlessly integrate blockchain technology into your current infrastructure, enabling you to unlock the full potential of distributed ledger technology.

06

Decentralized Application Development

Our skilled developers can create user-friendly, high-performance DApps for various industries, providing seamless integration with your existing systems and a frictionless user experience.

01 PROJECT

Mobile App for Charity

Team

Our team included a blockchain developer, a backend developer, a frontend developer, a mobile app developer, and a project manager.
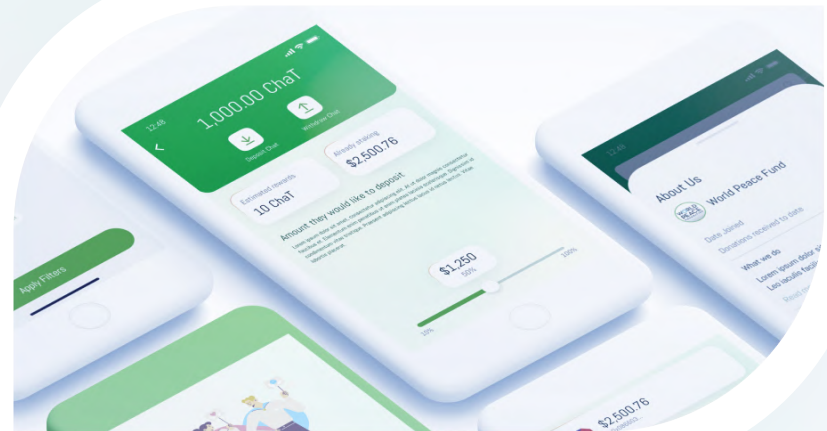

Project Life

The project took 9 months to complete, with further system support provided afterward.

As blockchain technologies continue to evolve in Australia, the client identified an opportunity to revolutionize charitable giving using them. To achieve this, the team developed five smart contracts, complemented by a robust backend and an admin panel to verify registered non-profit organizations. Additionally, they created a mobile application that allows users to donate to specific charities or to all organizations simultaneously.

Results

We developed an admin panel to verify non-profit organizations. Additionally, we created a mobile application for both iOS and Android, empowering everyone to make a positive impact in the world. Ordinary users can donate to charitable organizations, purchase tokens using credit or debit cards via the Indacoin payment system, and exchange tokens.

Crypto Wallet App

Our client, a blockchain startup from Canada, required a robust mobile application that could simplify the process of buying and exchanging cryptocurrencies for their users.

02 PROJECT

Team

Our team consisted of one blockchain developer, one backend developer, one frontend developer, one mobile app developer, and one project manager.

Project Life

We completed the project within 8 months, delivering a highly-functional crypto wallet app.

Results

We developed a cutting-edge crypto wallet app with a range of advanced features. The app is targeted towards users in the blockchain industry who want to make hassle-free transactions using their mobile devices. It allows users to buy any tokens on PancakeSwap with a debit or credit card, track rewards for transactions, and exchange tokens quickly and securely.

Tech Stack Blockchain

|							
React	Vue	TypeScript	JavaScript	NodeJS	Go	Solidity	Rust
PostgreSQL	Redis	Docker	Kubernetes	BNB	Ethereum	Solana	Polygon
AWS	Google Cloud	DigitalOcean	Nest.js				

Business models

WHICH MODEL ALIGNS BEST WITH YOUR PROJECT'S GOALS?

Fixed Price

For budget certainty and well-defined deliverables, consider the fixed-price route.

Time & Materials

If your Blockchain project is dynamic and the scope is uncertain, consider TM for flexibility.

Why choose us?

Scalable team

Proven Track Record

Speed to market without compromising quality

Transparent, Collaborative Approach

Intellectual property rights and security

Experience in Blockchain/NFT

Testimonials

Michael McKinnon

Sales, Genexa

5.0

★ ★ ★ ★ ★

Our experience with Nyoka was overwhelmingly positive.

Howard McIlvaine

V.P. of Operations, Unex Manufacturing, Inc.

5.0

★ ★ ★ ★ ★

Nyoka excelled in project management, meeting deadlines and addressing needs effectively.

James Hallier

General Manager, Kings Heavy Haulage (BRISTOL) Ltd

5.0

★ ★ ★ ★ ★

Their team demonstrated excellent problem-solving and a proactive approach.

NYOKA

We deliver most of our solutions within 4 months, depending on their complexity. You are 4 months away from deployment, just contact us.
