The most effective damage
prevention in logistics
buildingconcept.solutions

The bell post increases immediately the protection of your buildings, vehicles and goods.

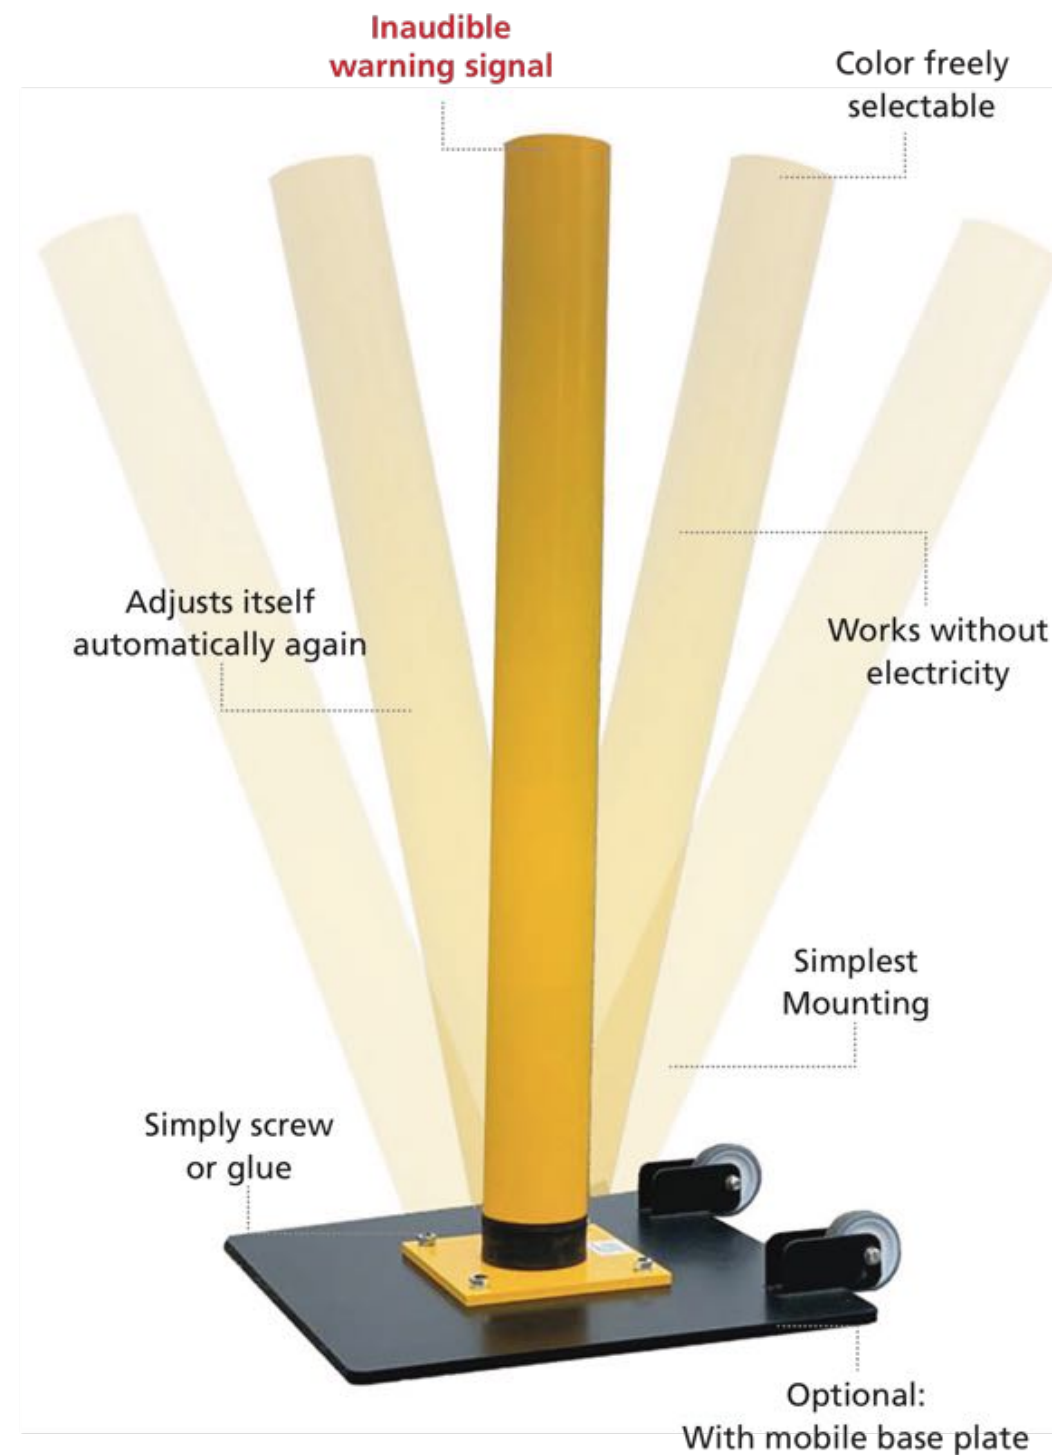

The use of the bell post guarantees at least:

- 50% less collision damage
- 50% increase in safety
- 80% identification of the person who caused the accident
- 100% immediate improvement of driving behavior

Your benefit:

- Prevention of accidents at work and personal injuries
- Cost reductions for repairs on
 - vehicles
 - buildings
 - goods
- Amortization within a few weeks/months
- Reduction of insurance premiums

The bell post is available in three models and is also suitable for outdoor use.

Model 1:

Fixed installation

For use as a fixed boundary in halls, yards, etc.

Model 2:

Mobile version

For use in flexible storage areas.

Model 3:

Hanging variant

For use in front of high storage racks, warehouse doors and canopies.
