Innovative & Digital e-Health solutions

Net Group brings healthcare & tech together

Hospital, clinic and all other healthcare professionals need better access to structured health data & optimized daily workflows. Net Group, as front-runner in digital e-health solutions, have successfully implemented projects with public health authorities, including health data management and HIS integrations, which provide a strong foundation for the digital healthcare of tomorrow.

Our Expertise in Digital Health

01

E-Health platforms

Modern, scalable e-health platforms for hospitals, clinics, and national healthcare—built for seamless growth and better care

02

Personalized Medicine for Better Health

We create AI-based applications that help people monitor and improve their health.

03

Data Analytics and AI

Solutions that help healthcare organizations make data-driven decisions.

04

Interoperations and integrations

Ensuring seamless interoperability across different healthcare providers and systems.

Advancing **Healthcare** with Smart Digital Solutions

We get you, healthcare service providers.

We have seen it all from large hospitals to smaller specialized clinics, diverse medical centers to specialized service providers. Challenge us!

Trailblazers of Estonian e-Health

Shaping Estonia's healthcare future in strategic cooperation with the National Estonian Health Insurance Fund.

Cross-border health data exchange

Expert assessments successfully completed for Ukraine's eHealth system readiness and integration with the EU's MyHealth@EU infrastructure.

Practical solutions built around real needs

Designed hand-in-hand with clinicians to improve process efficiency and enhance care quality.

High-impact national solutions

Used nationwide to support the daily work of doctors and specialists in every hospital.

Innovative digital solutions for personalized medicine

We collaborate with scientists and medical experts, to create AI-based applications that help prevent disease and improve health.

TJT Medication scheme

A free solution for all healthcare professionals that provides a one-page overview of medications taken by the patient, increasing patient safety and improving quality of care.

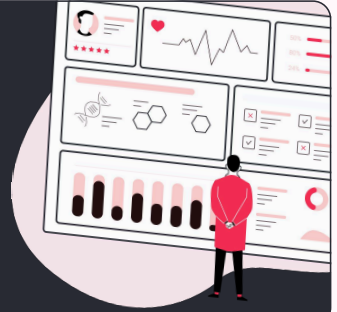

◆ successful project

Medication	Medication name	Medication code	Medication status	Medication date	Medication time
Medication 1	Medication 1	Medication 1	Medication 1	Medication 1	Medication 1
Medication 2	Medication 2	Medication 2	Medication 2	Medication 2	Medication 2
Medication 3	Medication 3	Medication 3	Medication 3	Medication 3	Medication 3
Medication 4	Medication 4	Medication 4	Medication 4	Medication 4	Medication 4
Medication 5	Medication 5	Medication 5	Medication 5	Medication 5	Medication 5

e-HealthRecord/eHR

Requirements analysis, TCO mapping and implementation plan for the central hospital information system of one of the largest hospitals in Estonia. The solution provided an overview of costs, staff and enabled the initiation of international procurement.

◆ successful project

Technology & regulatory compliance

- ✓ **GDPR & Data protection**
Strong security standards to protect patient data.
- ✓ **HL7 FHIR**
A modern standard for health data exchange.
- ✓ **ISO 27001**
Information Security Management System.

Net Group uses the latest technologies and ensures that the solutions comply with EU regulations:

International expansion & German market

Net Group is actively looking for partners in the German health technology market. We have extensive experience with international and European healthcare industry standards, providing:

- ✓ Customizable and scalable e-health solutions
- ✓ End-to-end solutions, from business and systems analysis, development and integration, all the way up to deployment and training clinical personnel
- ✓ Cooperation opportunities for hospitals, insurers and technology companies

Let's connect & Collaborate
