

**PERFECTLY BUILT  
SHIPS.  
PROFESSIONAL  
WORK ENVIRONMENT.**

"Where Vision Meets the  
Ocean – We Shape the  
Future of Shipbuilding."

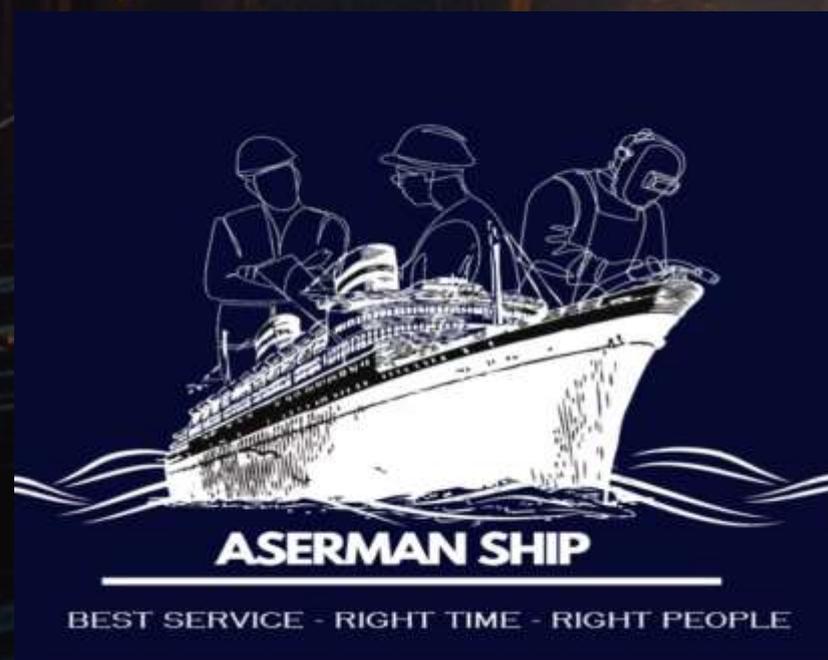

# Who We Are...

We are more than a shipbuilding company - we are dream makers, transforming raw steel into floating masterpieces.

Our strength lies in respect, integrity, and responsibility, combined with the flexibility and reliability that make us the preferred partner worldwide.

Founded in 2005 in Braila, Romania, Aserman Ship is a private company driven by innovation and passion for the sea. Our team transforms steel into engineering marvels - ships that inspire trust, safety, and excellence across the world's oceans.

## We offer the following services:

- Repairs of propelled and non-propelled ships
- Construction of propelled and non-propelled river or maritime ships
- Repairs and reconditioning of spare parts or naval equipment
- Technical assistance for ships at various locations along the Romanian Danube sector

- Construction of ships
- Manufacture of steel, aluminum, or stainless steel constructions
- General, industrial, or naval locksmith operations
- Naval or industrial boiler house works
- Piping manufacturing and installation works

# Comprehensive Ship Services

- Ship block installation works.
- A wide variety of docking-related works: cleaning, painting, bottom outlets, overboard valves, and axial lines.
- Repairs of all types of naval subassemblies and equipment.
- Repairs of main and auxiliary engines, turbine blowers, steering systems, air compressors, grease and fuel separators, injectors, and motor controllers.
- Repairs of centrifugal and displacement pumps.
- Repairs of the entire range of piping, onboard mechanical valves, converters, welding transformers, and rewinding of electrical motors, etc.

- Repairs of vessel energy equipment: fuel recovery boilers, heat exchangers, boiler water pumps, and fire extinguishers.
- Repairs of ship's loading and unloading systems and rescue equipment.
- Repairs of carpentry, rigs, furniture, insulation, casings, pilot stairs, tarpaulins, cargo safety nets, coverings for naval units, and anchors.
- Manufacture and recondition of spare parts through cold processing: turning, milling, smoothing, mortising, redressing, reaming, honing, and metallizing.

**Our company seeks to extend its business collaboration. Our personnel comprises welders, metal construction and shipbuilding locksmiths, naval pipefitters, polishers, foremen, and engineers.**

# TRUSTED BY WORLD CLASS SHIPYARDS

Most of our activity is located within shipyards, mainly in **Europe**:

- France: Chantiers de l'Atlantique Saint-Nazaire
- Sweden: Oresund Dry Docks
- Romania: VARD Tulcea, VARD Braila (both members of Fincantieri Group)

## HIGH QUALITY WELDING

Consistent beads  
Structural strength  
Precision in execution

## TEAMWORK IN ACTION

Skilled professionals  
Safety first  
Human connection

## SHIPBUILDING EXCELLENCE

From design to reality, innovation in every detail.

"Every project we touch carries the mark of passion, precision, and perfection."

Our company seeks to extend its business collaboration. Our team includes welders, metal construction workers, shipbuilding locksmiths, naval pipefitters, polishers, foremen, and engineers.
