

Who we are

IDEA4RC connects rare cancer centres, researchers, patient organisations and technology experts to enable secure, accessible and reusable rare cancer data across Europe.

What we are working on

We built a federated ecosystem enabling centres to harmonise and analyse data locally while researchers run cross-centre analyses without moving patient-level data.

What's the one thing we need next

We need more centres, datasets and a long-term operational framework to make IDEA4RC a sustainable part of Europe's health data infrastructure.

**5 years Mission Cancer:
Stronger Through Connection**
