+4366565124745
Graz, Austria

Enthusiastic and skilled software developer with over 1.5 years of Full-Stack Development experience. Seeking to leverage my skills in a collaborative and innovative development team while pursuing continuous growth in technical leadership.

Work Experience

iOS Developer

Freelance

Aug 2024 - Present

- Developing an innovative iOS application for a retail store, integrating QR code-based item scanning for efficient product information access and streamlined checkout processes. Technologies used: Swift, SwiftUI

Full-Stack Developer

Feb 2023 - Present

GH Informatik - Wotan Monitoring | Graz, Austria

- Led the development of database migration project, ensuring data integrity and system efficiency. Technologies used: PHP
- Played a pivotal role in improving core product functionalities, contributing to increased performance and user satisfaction. Technologies used: PHP, Javascript
- Actively enhanced the user interface (UI), boosting both visual appeal and ease of use, resulting in significantly improved user experience (UX). Technologies used: Javascript

Projects

Handwritten Digit Recognition - Python

Oct 2022 - Nov 2022

- Developed a custom Neural Network library from scratch, supporting fully connected layers
- Implemented a TensorFlow-based solution for comparison with the custom-built model
- Designed and built an intuitive user interface enabling real-time switching between the two implementations, facilitating direct comparison of model performance and accuracy

Core Skills

C, C++, Javascript, Python, PHP, Swift, MySQL, MongoDB, Git, CI/CD, Unit Testing, SCRUM, SwiftUI, Node.js, Express.js

Education

Graz University of Technology

Computer Science

Oct 2023 - Present

High School "Svetozar Marković"

Department for Students with Advanced Mathematical Abilities

Sep 2018 - May 2022

Languages

Serbian (Native), **English** (Fluent), **German** (Upper-Intermediate)
