

Hydrogen Car Fuel Tank PCM Stabiliser

Self cooling cans & Multiple Mobile Drink Cooler

Low Energy Chilled/Frozen Distribution Centre Design

PCM Based Cushion Development

Waste Heat Recovery TES and Transport via Road Tankers

Developing Sterile Mosquito Transport and Aerial Release Method

Cruise Ships Secondary Refrigeration Systems

PCM based Passive Cooling Systems

CHP Power Generator / Absorption Chiller supermarket application

PCM based Glass Refrigerated Cabinet Shelves

PCM based Hot/Cold Lunch bag development

Ice Cream Cabinets Energy Saving using Eutectic Plates

Silicon/PCM based Disabled Seat Cushion & Breast care products

Human Mars Mission Heat Block Developments using Eutectic / PCM

IT Centres PCM based Back-up Cooling Products

F1 Car Driver PCM based Drink Cooling System

F1 Car Fuel Tank Stabiliser using PCM based System

Dishwasher/Washing Machine Heat Recovery Heat Exchanger

Thermal Shield using PCM for Multimeters / Data loggers

Aero-Electronic Stabiliser using PCM

Boiler / Heating PCM based Thermal Energy Storage

Cold Stores / Transport Eutectic based Back-up Systems

Electronic Cooling

Passive Cooling Tiling

Data safe PCM Application

Beauty Product Development

PCM in Insulation Foams

Passive Cooling Shelters

Flight Data Recorder Thermal Shield using PCM

PCM based Health Care Product Development

PCM based Electronic Thermal Management

Automotive PCM application

Electronic Thermal Management using PCM

PCM based Thermal Management

Thermal Management

Temperature Controlled Packaging & Shipment

Automotive PCM Applications

Healthcare Product Development

TES Application for HQ

PCM Product / Application Developments

White Goods PCM Applications

Airline Temperature Controlled & Trolley PCM Applications

Hot Water Storage Modules

Thermal Management Application

Ice Pack Development

Various PCM Applications

Thermal Management Application

PCM based Food Thermal Management

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

Temperature Controlled Packaging & Shipment

PCM based Packaging Solution

Defence Related PCM Applications

Space Applications

PCM based Display Counters

Automotive PCM Application

Automotive PCM Application

Consumer Product Development

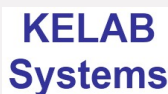

PCM Applications

Various PCM applications & Projects

Cryogenic Ebola Vaccine Transport System Development

Deep Sea Logger PCM based Thermal Stabiliser

Refrigerator PCM Application

Dental PCM Application

Power Free PCM based Frozen Yogurt Sales Trolley

Pipeline Passive Cooling Shelter Development

Ice Pack Applications for Display Counters

PCM based Temperature Shield for Data-logger

Thermal Management for Electronics

PCM Space Applications

PCM based Electronic Passive Cooling

PCM based Applications

Various PCM based Products / Application Developments

PCM based heat engine developments

Airline trolley chill tray developments

Building Cooling Application Development

International Space Station PCM based temperature controlled Ice packs for controlled environment & shipment

Mars mission PCM based heat blocks for electronic control

Cold storage PCM based load shifting systems

Drink dispensing machine development

Temperature controlled shipment cooling elements

Grocery online delivery tote development (chilled / frozen)

Grocery last mile delivery system (ambient / chilled / frozen)

Perishable chilling addition to existing chilled cabinets

Coffee cap heat retaining using PCM

PCM shelf addition for refrigerators

Chilled / Hot lunch box PCM elements

Datacenter Dew Point Cooling Installation

Adiabatic air inlet cooling for Datacenter Cooling Installation
