

Empowering Digital Transformation in Mobility & Manufacturing

Automotive, mobility, and manufacturing leaders need tailored digital solutions to stay ahead in a world driven by automation, compliance demands, and digital-first operations. DataArt is your strategic partner for driving sustainable growth and enduring success in the digital era.

We Are Your Global Bespoke Software Partner

We combine a hands-on approach with technical excellence to solve your business challenges. Each project receives focused attention and custom solutions.

Client-Centric, Trusted Partners

DataArt's bespoke approach means we take the time to understand each client's unique requirements, creating solutions precisely aligned with your strategic goals - never one-size-fits-all.

Blending Data + AI

We transform raw information into powerful insights using advanced algorithms & intelligent analysis. Our solutions turn complex data into clear, strategic advantages for businesses.

World-Class Experts

When & Where You Need Them

Our global network of elite engineers, designers, analysts, and strategists will exceed all expectations of a data and technology partner. We offer a wide range of capabilities, hiring experts in over 135 different skillsets.

Innovation Labs

Through our 20+ R&D-focused Labs, we cultivate proprietary frameworks, research and PoCs to help speed time-to-value.
