

SEZ KROMPACHY SLOVAKIA

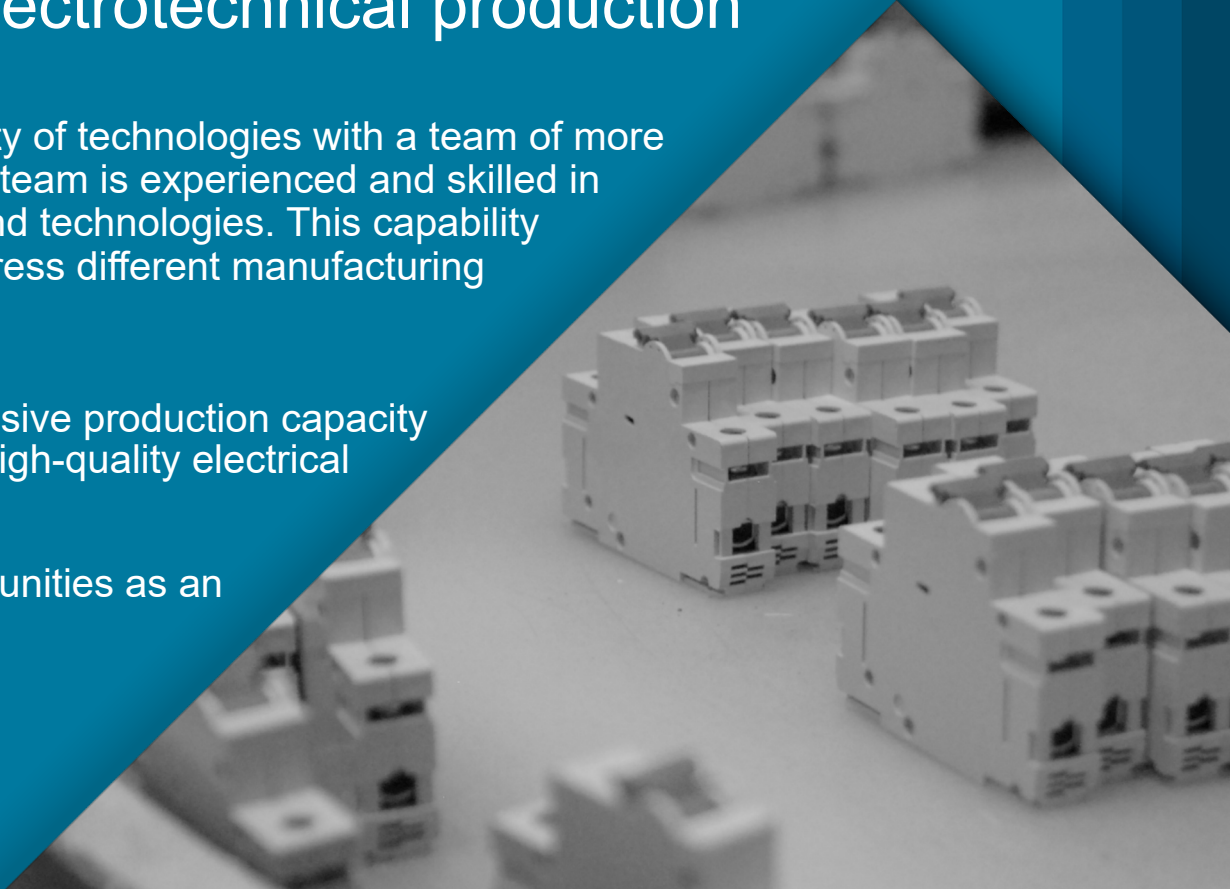

Your partner in electrotechnical production

At SEZ, we combine a variety of technologies with a team of more than 250 professionals. Our team is experienced and skilled in adapting to new practices and technologies. This capability enables us to efficiently address different manufacturing requirements.

Take advantage of our extensive production capacity in Slovakia for reliable and high-quality electrical industry solutions.

Contact us to explore opportunities as an OEM production partner.

About SEZ Krompachy:

A frontrunner in electrical manufacturing, SEZ Krompachy supplies specialized equipment and systems for diverse industries.

Our 76-year legacy emphasizes our dedication to superior electrical components and client-focused solutions globally.

Our commitment is to offer reliable, innovative products that uphold the strictest quality and safety standards.

Our team's deep-rooted expertise ensures personalized solutions to meet our clients' unique demands.

TECHNOLOGICAL POSSIBILITIES

Plastics Injection Facility:

Specializing in injection molding, SEZ offers end-to-end services from mold design to production, ensuring quality control at every step.

Metal Stamping:

Precision stamping services for both internal and client-specific components, featuring in-house design and production for seamless, high-quality results.

Metal Turning:

Offering a wide range of turned parts using advanced machinery, from single-spindled revolver machines to CNC lathes, for precision component production.

Tool Shop:

In-house tool shop crafting precision molds for plastics and stamping, with advanced software and 3D CMM inspection for up to 800x800 mm precision.

Galvanizing, Metal Coating:

Advanced anticorrosion treatments including various types of plating and eco-friendly features, with automated galvanizing for optimal protection.

Other Technologies:

Tin container production with arc welding and diverse welding technologies, plus various coating applications for assembly and finishing.

Your Reliable Manufacturing Partner!

CURRENT PRODUCT OVERVIEW:

MCBs & Accessories:

- Up to 63A with standard characteristics;
- 80-125 A with B,C, D characteristics;
- includes accessories like multiple poles, auxiliary contacts, and more.

RCCBs & RCBOs:

- RCCBs up to 100A in A types, 10kA;
- RCBOs from 2A to 40A with B,C characteristic, A types, 10kA breaking capacity;
- plus accessory options.

Control Gear:

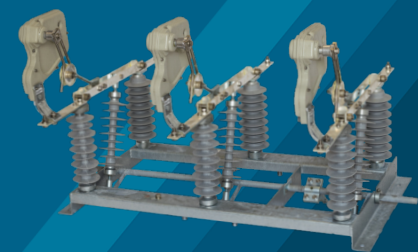

- Mini contactors, industrial contactors, versatile timers, digital time switches, power relays, and motor protection switches up to 32A.

Switches:

- Cam switches from 6A to 160A, rotary switches up to 400A, customizable option available.

Disconnectors & Drives:

- Indoor and outdoor disconnectors, section switches up to 38.5kV, with a variety of accessories and drives.
