Contributors

- WINGS is leading the Consortium as technology provider of AI based solutions for the public and private sector. We are active in many EU funded projects both as leader and contributor
- Grant Thornton is a key participant with established presence in the Greek and EU market as consultant and provider of digital solutions to public and private clients
- EKT (Greece National Documentation Centre) is one of the Public Administrations that will provide use case(s)

We are looking for Public Administrations from other EU countries with a proposed pilot/use case that requires GenAI support and falls within the scope and objectives of the current call
