

TIMELEX

Your Legal and Ethics Partner for EU-Funded Projects

Why Timelex

- **Leading niche technology law firm**
Specialised in IT, data protection (GDPR), AI, cybersecurity, intellectual property, and digital regulation
- **EU projects expertise**
15+ years of hands-on involvement in EU-funded projects, from proposal to project completion
- **Proven EU track record**
50+ EU research projects, €15M+ in awarded grants
- **Embedded partner approach**
Acting as part of your consortium, contributing directly to work packages rather than advising from the outside
- **Ethics & compliance by design**
Integrating GDPR, ethics, and regulatory requirements (e.g. NIS2, CRA, Data Act, AI Act etc.) into technical development and project workflows
- **Implementation-driven**
Translating legal and ethical requirements into concrete deliverables, templates, and project outputs

Topics We Frequently Work On

- **Health**
Digital health, medical devices, clinical studies, medical technologies, data-driven care
- **E-Government, Credentials & Education**
Digital public services, digital identities and credentials (eIDAS), inclusion, social research
- **Civil Security for Society**
Cybersecurity, law enforcement technologies
- **Digital, Industry & Space**
AI, robotics, cloud, open data, telecoms
- **Climate, Energy & Mobility**
Sustainability, renewables, smart mobility
- **Culture & Inclusive Society**
Technology-enabled social and economic transformation

What We Help You Deliver

- **Data Protection & Governance**
GDPR compliance and legal input to Data Management Plans (DMPs), including DPIAs, data-sharing models, and data access, reuse, and governance frameworks (DGA, DA, EHDS)
- **Intellectual Property & Exploitation**
IP and access-rights analysis supporting exploitation, dissemination, and long-term sustainability
- **Contractual & Collaboration Aspects**
Legal support for collaboration, including MoUs, NDAs, terms of service, etc.
- **Regulatory & AI Compliance**
EU regulatory analysis embedded in technical work packages (e.g. AI, medical devices, cybersecurity), including AI Act assessments and risk evaluations
- **Ethics Compliance & Ethical Assessments**
Compliance with ethics rules and frameworks, including informed consent procedures and ongoing ethics monitoring
- **Comparative Legal & Policy Analysis**
EU-wide legal analysis and policy recommendations

What We Do In Practice

- **Guiding design and development throughout**
Identifying legal and regulatory requirements early on and guiding the design and development process throughout
- **Evidenced compliance work for pilots and tools**
Turning legal, ethics, and regulatory requirements into concrete processes and outputs, supporting pilots and tool development
- **Customized legal, regulatory and contractual support**
Addressing specific project-level and implementation-related legal and contractual needs as they arise
- **Communication, Dissemination and Exploitation**
Support communication and dissemination from a legal perspective (e.g. articles, blogs, events, policy interactions), as well as exploitation (IPR management, exploitation agreements)
