

SAUNAORAVA

LEMPEIMMÄT LÖYLYT

WHAT IS ORAVAKAUHA?

Oravakauha is a sauna ladle designed for creating steam, providing gentle, moist, and lingering löyly (sauna steam) in any sauna.

STORY BEHIND THE LADLE

The idea for a new kind of sauna ladle was born where else but on the sauna benches, out of a desire and need to enjoy gentle, moist, and lingering löyly.

Refining the idea and exploring various alternatives has required an incredible amount of test löyly sessions and sweat, but thanks to these shed drops of sweat, we can proudly present the Oravakauha!

A ladle that takes sauna bathing to new dimensions, transforming even dry and harsh small apartment saunas into pleasant, gentle, and moist löyly oases.

HOW TO USE THE LADLE

The ladle has holes at the bottom, which are used to create, not throw, löyly. This results in a more lingering, moist, and pleasant sauna experience.

Using the ladle is simple and straightforward. You scoop water from the water container into the ladle, then bring the ladle over the sauna stones and begin creating löyly.

The ladle can be held in one spot, allowing you to extract löyly from deep within the stones, or you can move the ladle across the entire surface of the heater, creating löyly from the stones on top.
