for Industry

- ✓ Research Fields
- ✓ Service
- ✓ Features

acib is a non-profit research centre that is funded by COMET (Competence Center of Excellent Technologies). Within the broad range of expertise it strives for "**Better Health for all**" as well we to the "**Bio-based circular economy transition**".

Research Fields

Biocatalysis and Enzyme Technology

Enzyme Technologies & Protein Engineering

Microbial Biotechnology

Cell Line Development & Plant Biotechnology

Bioprocess Technologies

Biotechnological valorization of waste streams (bioeconomy)

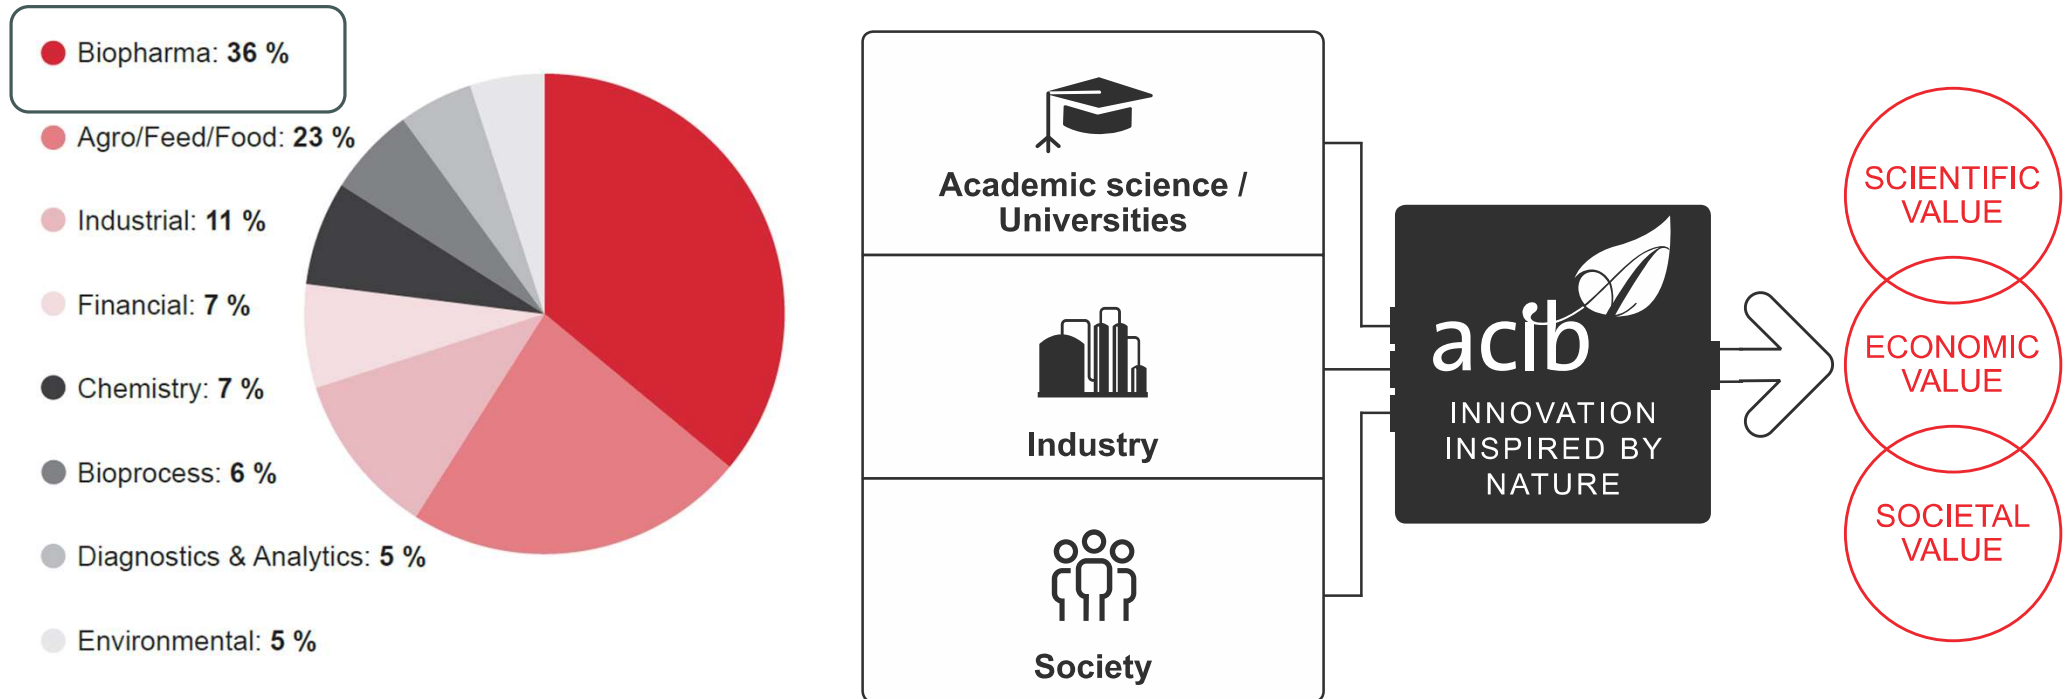

Bioinformatics, modelling & simulation

Sustainability assessment

Academic-Industry Partnership Forms a Strong Network

LEADING OPEN INNOVATION PLATFORM FOR INDUSTRIAL BIOTECHNOLOGY

AUSTRIAN CENTRE OF INDUSTRIAL BIOTECHNOLOGY

INNOVATIONS FROM NATURE

The background of the slide features a complex, three-dimensional molecular structure. It consists of numerous translucent green spheres of varying sizes, connected by thin, light green rods. The spheres have a glossy, reflective surface, giving them a sense of depth and volume. The overall composition is a dense network of these interconnected nodes and edges, creating a web-like or crystalline appearance. The lighting is soft, with some spheres appearing brighter than others, suggesting a light source from the upper left.
