# RDI'UP

## Introduction

What is RDIUP ?

RDIUP is a French SME specialized in applied R&D and demonstration of interoperable digital solutions, including planning tools, federated digital twins, data spaces, gamification, and blockchain-based rewarding systems. With strong involvement in EU-funded projects (Horizon Europe, Erasmus+, PRIMA, etc.), we offer expertise as a technology partner, pilot provider or data/AI expert. We also provide support in Dissemination, Communication & Exploitation (DCE) and impact assessment (societal, environmental, and economic) through our platform [Eutracker](https://eutracker.rdiup.com)

Strengths & quality

# Why RDIUP ?

RDIUP combines deep technical expertise with real-world experience in European R&D projects to turn complex concepts into scalable, interoperable, and impactful digital solutions. From smart planning tools to AI-driven analytics and digital twins, we co-create innovation with our partners focusing on usability, sustainability, and measurable outcomes. With RDIUP, you get a flexible, reliable, and engaged partner committed to quality and results at every stage.

01

## Personalized tools & Quality of deliverables

RDIUP develops tailored solutions to meet your needs, with 100% of our deliverables validated through a rigorous quality assurance process.

02

## Large local and European network

Our partners trust RDIUP to turn their ideas into reliable, scalable, and sustainable solutions. Together, let's build responsible innovation for the future.

03

## EUTRACKER potential

EUTRACKER is a unique, and user-friendly digital tool offered by RDIUP to monitor all your DEC activities in EU-funded projects and measure the impacts..

RGE

# what can RDIUP offer?

## AI-powered applications

RDIUP develops personalized, intuitive, secure, and affordable Web-platforms and Mobile APPs powered by AI and advanced algorithms

## Cross-domains integration

Based on our experiences in various domains, RDIUP is able to integrate complex solutions in an interoperable way while complying with EU regulations

## Testing and Piloting

RDIUP owns Energy communities, emeters and an instrumented PV pilot for real-setting testing, demonstration and training

## DCE management

End-to-end DCE management from strategic planning and stakeholder engagement to communication campaigns and impact tracking, ensuring visibility, compliance, and long-term exploitation of results

WGs' co-leader

# Companion Mobile APP

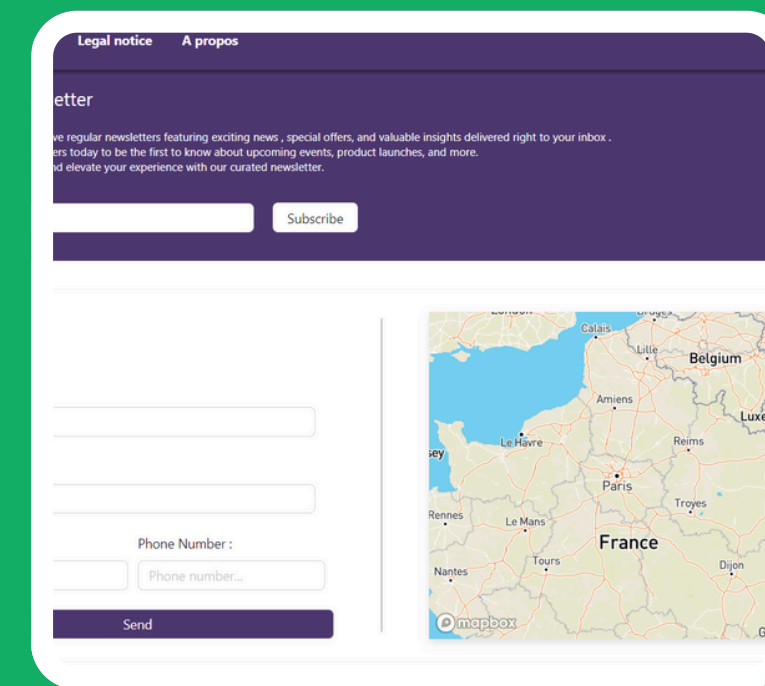

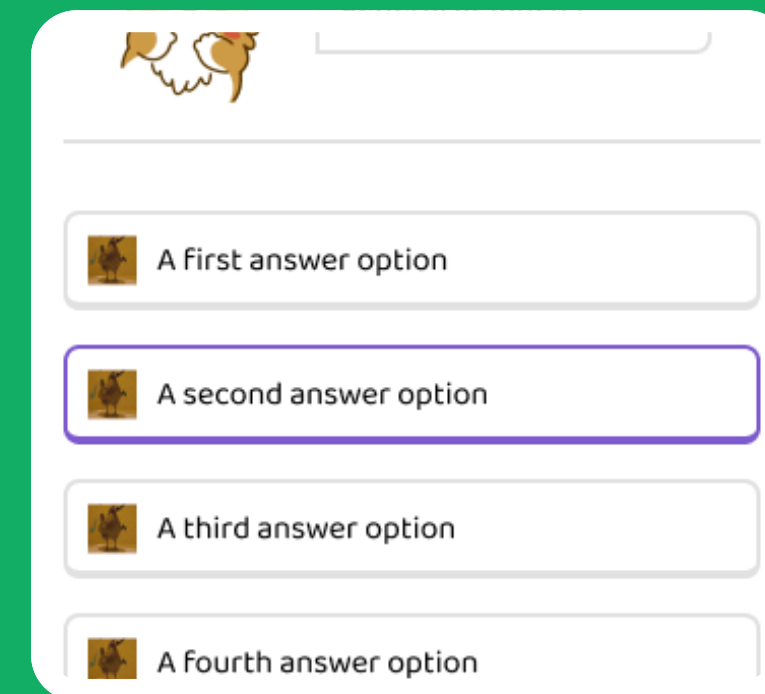

RDIUP is also responsible for the development of the mobile application Companion App, with user management unified through a Single Sign-On (SSO) server.

The purpose of this application is to raise awareness among young people and provide interactive tools to assess their levels of depression and anxiety. A personalized recommendation system complements this approach to enhance support.

In addition, RDIUP leads the design and implementation of the blockchain-based Rewarding System, including the definition of smart contracts and tokenization mechanisms.

Impacts pathway

# EU Tracker

EU Tracker is a freemium, collaborative platform designed for any organisation involved in European projects. It centralises partner collaboration, enabling teams to report on activities, monitor KPIs in real time, and streamline communication, dissemination, and exploitation efforts.

With interactive dashboards and full compliance with EU guidelines, EU Tracker helps project partners to enhance visibility, engage stakeholders effectively, and maximise long-term impact, transforming scattered efforts into a unified, strategic process.
