

Who we are?

SET (Science, Entrepreneurship, Technology) University

SET is a technology university established in Ukraine just prior to the full-scale invasion. We were forced to reimagine higher education to accelerate Ukraine's recovery and drive global innovation.

SET University: a full-cycle tech ecosystem

Education

- Master’s Programs
- MicroMaster’s - upskilling for businesses
- Short Courses

Innovation & Startup Support

- SET Accelerator: for student-led startups and external programs
- Spin-offs: 2 embedded cyber security startups

Impact: Third Mission Projects

Building Digital Culture from School to Profession

- EncycLED - Cyber Education for Kids
- DIGARD V4U - Digital innovation for dispute resolution in Central Europe and Ukraine

Our main fields of expertise:

- AI/ML
- Cybersecurity
- Blockchain
- Leadership in Technologies
- Startup building
- Cloud systems
- Data Engineering

SET University transforms frontline cyber experience from one of the world’s most attacked environments into global expertise, helping to strengthen cybersecurity around the world.

We advance cybersecurity talent and drive Ukraine’s post-war recovery through technology, securing its future among the world’s leading innovation nations.

Spin-off:

IRONCYBER

The battle-tested experience scenarios created by Ukrainian cyber defenders

SET University: a springboard for Ukraine's tech innovators

INNOVATE LOCALLY:

We encourage the development tech products to retain value within Ukraine.

GLOBAL COLLABORATION:

We unite the brightest minds in tech, science, and entrepreneurship.

LIFETIME LEARNING:

Through a module-based academic credit system.

Entrepreneurial Mindset and Real-World Focus

Startup over Thesis: Our students create their own startups instead of traditional theses.

We teach the Best practices: Instruction from top managers and founders.

In-house acceleration programs: Through our incubator projects, we connect students with investors.

We are proud to be partners with:

Ministry
of Digital Transformation
of Ukraine

Google for Startups

Tokarev
Foundation

ROOSH

Microsoft

SIGMA
Software

Partner with us to co-create the future of tech education

- Collaborative educational tracks & microcredentials
- Real-world cybersecurity simulations
- Thought leadership through joint research or conference panels
- Co-branded hackathons, bootcamps & talent accelerators
- Industry-led masterclasses and tech talks with your experts

Support our projects and make an impact:

- Engage more top-global experts
- Launch new educational tracks
- Launch labs and cutting-edge cyber range
- Provide Scholarships:
 - Veterans and their families
 - Women who want to pursue deeptech career many of whom now carry Ukraine's economic burden
 - Top tech talents

Let’s build the tech future
together!
