

Name: Dr. Olfa Khalifa

Expertise: 10 years in microRNA / ncRNA expertise for diagnostics and therapeutics in metabolic disorders

Affiliation: Qatar Biomedical Research Institute (QBRI)

Email: okhalifa@hbku.edu.qa

Phone: 00974 66579751

QBRI

- National **biomedical research institute** in Qatar
- Dedicated to advancing **cutting-edge biomedical science** and translating research into **innovative solutions** that improve human health
- **Strategic focus on metabolic diseases**, including Diabetes & Liver disorder with strong emphasis on molecular diagnostics and therapeutics

Country: Qatar

Region: Middle East / GCC

Target Outcomes

For microRNA technology development:

Seeking Diagnostic Platform Partner to Codewelop a High-Throughput miRNA Assay for Liver Disease

For the liver disorder clinical trials:

Clinical research partners and expertise in running biomarker validation, from preclinical models to human proof-of-concept trials

Partners / Collaborators

For Clinical Validation & Trials

We need partners with expertise in conducting biomarker validation studies, from preclinical animal models to human proof-of-concept trials. This includes support in protocol design, regulatory strategy, sample acquisition, and clinical data analysis to qualify our miRNA biomarkers for diagnostic and therapeutic use.

For Commercialization & Implementation

We seek collaboration with organizations experienced in diagnostic commercialization, and clinical pathway integration to ensure our solution meets clinical needs and achieves adoption in healthcare systems.

Thank you !
