

A safe parking place for  
your bicycle in town.

[www.weelo.it](http://www.weelo.it)

## A Safe Parking Place for your Bicycle in Town.

For people who ride around town, for cyclists who want to protect their bicycles from bad weather and for those who want to keep them safe from theft, **WEELO** is the first network of parking stations for private bicycles, for residents and tourists. Here you find shelter, video surveillance, night lighting, recharge for e-bikes and a place equipped for repairs and tyre inflation. An ecological and practical solution which protects your bicycle and decorates your town.

### Digital mapping.

Download our app, access with your e-mail address and find the nearest parking among our bicycle parking stations all over Italy.

### Modular bike parking stations.

Each WEELO bicycle parking station has the needed size. Long, short, split or joined, to adapt to the aesthetics and needs of every urban space.

### For a smart town.

Did you think it was just for parking? WEELO means also digital communication and technologies for environmental monitoring, completely integrated in your bicycle parking station.

Weelo's mission is to inspire people to improve their lives and their living spaces with environmentally sustainable solutions which are good for their health. Like riding a bicycle!

## Five good reasons to saddle up.

**Live better:** riding a bicycle is an amazing method to fight stress and calm your mind.

**Save money:** Can you imagine reducing your petrol expenses? With Weelo your wallet will smile too!

**Stay fit:** 10 minutes of bike riding every day will boost your metabolism and help your blood circulation!

**Have more time:** how many things can you do in the time spared from looking for a parking place or finding a solution for a delayed train?

**Smile more!** Riding a bicycle is an excellent way to produce endorphins, the neurotransmitters of happiness.

## We put a stop to what is wrong.

Bicycle theft greatly discourages people who want to get around by bike. **Weelo** is the first circuit of bicycle parking stations that helps cities to get a new look thanks to **orderly parking** and a **neat** and **sustainable street furniture**, encouraging at the same time people who prefer to use two wheels rather than four..

## Weelo thinks from now to 2030.

Did you know that **Weelo** is a way to help reach the 17 sustainable goals of **UN's 2020-2030 agenda**? We believe in the importance of more livable cities and happier communities and work hard to create them! For more information visit [sdgs.un.org](https://sdgs.un.org).

**Weelo HUB**

**Weelo HUB** is our modular solution for cities and towns, conceived for all the places where it is important for you to find a parking place for your bike, e.g. at the railways station, in front of a school or at the university. You can park your bicycle here in complete safety with many other bikes: it will be monitored by video surveillance 24 hours a day.

<b>SIZE HUB 80</b>	6.05 X 11.80 METERS
<b>USAGE AREAS</b>	INTERMODAL NODES AND HIGHLY FREQUENTED AREAS.
<b>NUMBER OF BICYCLES</b>	UP TO 80
<b>VIDEOSURVEILLANCE</b>	YES

**Weelo BOX**

**Weelo BOX** is our bicycle parking space for city streets. It is as convenient as bus stops, because you find one every 300 or 500 meters and it takes up little space: just the one needed for your bicycle. And on top of that, Weelo BOX makes your town more beautiful and orderly! Did you know that a car parking place takes up the space of 8 bicycles?

<b>SIZE</b>	CAR PARKING PLACE
<b>USAGE AREAS</b>	CITY CENTER
<b>NUMBER OF BICYCLES</b>	8, 12, 16, 20
<b>VIDEOSURVEILLANCE</b>	YES

**Weelo IN**

**Weelo IN** is the tool that allows you to park your bike in total safety in existing bicycle parking stations, accessing with our system.

You can count on a Weelo parking place where and when you want by reserving it from our app. And you are immediately in!

**Weelo HUB** is our modular solution for cities and towns, designed for all the places where it is important for you to find a parking place for your bike, e.g. at the railways station, in front of a school or at the university. You can park your bicycle here in complete safety with many other bikes: it will be monitored by video surveillance 24 hours a day.

<b>SIZE HUB 40 PLACES</b>	cm 605 X cm 605
<b>SIZE HUB 80 PLACES</b>	cm 605 x cm 1.180
<b>BEARING STRUCTURE</b>	Steel profiles
<b>INFILLS</b>	Glass, expanded and full metal sheet panels
<b>BICYCLE RACKS</b>	High density on 2 levels
<b>SYSTEMS</b>	Variable density LED lights, videosurveillance, emergency intercom, UPS
<b>USAGE AREAS</b>	Intermodal nodes and highly frequented areas

**Steel and  
glass**

**MODULARITY**

The Weelo HUB is made up of repeatable modules that are very easy to assemble. It results from the planimetric union of several square modules of 5750x5850 mm. Thanks to its regular shape, each module allows several planimetric solutions: linear, multiple rows, L-or cross configuration. Modules are connected to each other thanks to the **simple connection system** between counter and crosspiece.

The high compositional freedom also allows planimetric changes and the possibility to add up new units over time. The bike racks are positioned following a repetitive pattern of the basic 10 place modules on two levels.

The whole structure, the covering, the infills, the automatic access door and the bike racks can be disassembled and reused: after removing the glass plates, the roofing and the door, all bolts are removed, including those for ground fixing, and the disassembled structure can be put away to be reused when needed.

**Weelo Fix for bike repairs.**

**Plug for e-bike recharge.**

**Weelo BOX** is the solution to create a widespread network of safe parking places for citizens' bicycles. It has an attractive design and can be easily installed in the streets and squares of your town, without the need of electrical connections. The space of a car park can lodge up to 8 bicycles!

<b>SIZE</b>	8 places – CM 497 X201 (one car parking space)
<b>USAGE AREAS</b>	Every street or square, in a widespread manner in town
<b>NUMBER OF BICYCLES</b>	8, 12, 16, 20
<b>ACCESSORIES</b>	Videosurveillance, bike lab, air quality sensors, digital billboard
<b>COLOUR</b>	Customizable, RAL colorus

**WEELO BOX**  
AOSTA

**WEELO FIT** has a customizable outer «skin» to adapt to every surrounding context.

<b>SIZE</b>	6 places –CM 360 x 200 c (less than one car parking place)
<b>NUMBER OF BICYCLES</b>	6-8-12
<b>ACCESSORIES</b>	Videosurveillance, bike lab, air quality sensors, digital billboard
<b>MATERIALS</b>	Painted steel doors, painted steel SKIN with RAL of choice, corten steel, stone, adhesive wrapping film.

WOODEN SKIN

Aosta – Piazza San Francesco

### **INTERIOR**

The box interior is equipped with a hook for the helmet, vest or any other personal object and can be decorated on one side with customized graphics showing the deposit rules.

A LED lamp lights up when the door is opened and can be kept on at low intensity also after closing the door, to be able to distinguish the occupied boxes from the available ones.

### **MODULARITY**

The Weelo BOX is versatile and modular: it is possible to add up bike spaces horizontally, or stack up the boxes on two levels, on top of each other. This construction method allows to increase or decrease the number of boxes, according to the flexibility of demand in time.

The bearing structure of the box allows to assemble several modules with stainless steel joint bolts. The inner walls as well are made of painted steel sheet, mechanically fixed to the bearing structure with screws.

### **MATERIALS**

The bike box is entirely made of galvanized and painted pressfolded steel sheet, appropriately sized and of variable thickness. The box is composed by a bearing structure that allows to assemble several modules by means of stainless steel joint bolting.

The access door, a distinctive element of the Weelo design, is composed by a bearing structure of galvanized and painted pressfolded steel sheet and a full/empty infill created by the juxtaposition (thanks to the particular form of the frame) of a smooth sheet and a perforated sheet, that allows to see inside and lets air circulate.

The door of the single bike box has been designed to ensure **the best protection against break-in attempts**: the hinges and the electromechanical lock are in a protected and inaccessible position, so as to guarantee a high security level and a smart design.

Thanks to WEELO IN, every bike parking station becomes WEELO!

**Weelo IN** is the tool that allows to implement a Weelo bicycle parking station anywhere: traditional bike parking stations, garages, shops and other existing spaces.

The Weelo IN device is easy to install and **allows to turn any available space into a Weelo bicycle parking station**, accessible with our app and included in the existing bike parking network.

**Weelo IN can be adapted to every structure** that needs an extra gear to become a complete and secure bicycle parking station. We will examine your structure and integrate it with what is missing: from the automated access to the sensor system, from the software to the entrance devices. We can install all these elements or integrate only the missing parts.

Registered users access the reservation panel, where they can choose the bike place and the day (or days) of the reservation. Reservations can be made for single days or for longer periods. Regular users can benefit from long-term memberships (weekly, monthly etc.), which are back-end configurable; the relevant prices are freely configurable too.

Each bicycle parking station equipped with our Weelo IN is specifically configured so that users are able **to know the number of available places** and, above all, they can **reserve their place** among the available ones choosing directly from the APP. With Weelo IN, **prices can be configured in a completely customized way**: thanks to our Weelo app, users will be able to pay the established price and park their bicycles for the time needed.

### **Weelo Customer Care**

To assist Weelo users in real time, we have created a customer care service operated from Monday to Sunday through WhatsApp messages and on the phone

Because Weelo is a service, not only a bike park.

### **Weelo APP**

Scan the QR CODE and park your bicycle in complete serenity. Designed for tourists but also for regular users, our APP allows to access all our network with the same account, very simply and with your credit card.

Weelo is a project by BIC | Bicincitta Italia S.r.l., a company whose business is the design, planning, production and management of sustainable mobility projects.

## Weelo begins with We.

In the era of sharing economy, we want **sharing mobility** in Italy to be perceived as a **priority asset**.

Our company addresses to all public administrations for the installation of bicycle parking stations and bike sharing schemes, in a transparent way and in integration with other **public transport** services.

We also carry out executive planning, installation, maintenance of the services and the marketing operations needed for the development and the promotion of sustainable mobility. We are present in more than 100 Italian cities and towns!

## ABOUT US.

## Saddle up. Ride with us!

We have started a ride towards change: an **urban** and **environmentally sustainable** change, involving **commuting and travelling habits**. We invest in the well-being of citizens through the redevelopment of spaces and the reorganization of urban mobility, and we offer services that encourage trust, sharing and safety in people. This is an essential goal for us, that we set ourselves every day.

Do you share our vision?  
Contact us to start a project in your town.
