Tania Jenkins, PhD

Tania is founder of Cosie, which stands for **co**-creating **science**, impacting **engagement**. Tania did both her undergraduate Biology degree and PhD at Imperial College London During her postdoc in Lausanne she co-founded EvoKE, an organisation with the mission to communicate evolution better to all societal actors. This led to her acting as Chair of the EuroScitizen COST Action and its Citizen Science Working Group between 2018-2023. In 2016, she pivoted towards science communication and citizen science and has since worked for diverse institutions including the University of Lausanne, the Lausanne Zoology Museum, the Swiss Academy of Science and the University of Geneva on projects at the intersection of science- society and policy. She is passionate about co-creation and has applied this methodology to a range of projects. In 2024, she founded cosie because she has made it her mission to support research for societal impact.

In 2025 she was certified as a European Network of Living Labs (ENOLL) “Living Labber”. She is currently advising two consortia on stakeholder engagement and Living Lab methodology in the upcoming Horizon Europe calls.
