

Centrum Transferu Technologii – INNOVATIONS Sp. z o.o.
(CTTI)

Key Elements of our Vision

1. **Pioneering Green and Digital Transformation:**

Driving advancements that empower businesses, public administration, and communities to embrace sustainability and digital innovation in harmony.

2. **Bridging Science and Society:**

Creating impactful connections between research, technology, and societal needs through interdisciplinary approaches and collaborative solutions.

3. **Fostering Innovation for Sustainable Development:**

Promoting best practices, cutting-edge methodologies, and actionable insights to address global challenges such as climate change, resource efficiency, and circular economy.

4. **Empowering Collaboration:**

Building strong partnerships with diverse stakeholders—academic institutions, industry leaders, NGOs, and governments—to deliver transformative projects that align with EU and global sustainability goals.

5. **Shaping a Better Society:**

Enabling positive change through the design, development, and implementation of strategic frameworks, environmental solutions, and innovative technologies for a balanced and thriving future.

Our Team
members with 30+
years of
professional and
proven
experience, is
formed by:

researchers & scientists
engineers &
professionals,
economists & financists

Our Services

- Life-Cycle Assessment
(environmental, economic,
social)
- Compliance with the DNSH
principle assessment
- Waste & Material Flow
Management
- Business Model / Plan +
Exploitation Strategy / Market
Research
- Replication & Validation
Strategy
- Transfer Technology /
Knowledge
- Business Intelligence (BI)
- Communication &
Dissemination Strategy
- Project proposal preparation,
incl. Consortium set up
- Project Management and
Implementation

Our Team
members are here
to support you in
developing
successful
strategies today
for a **financially**
secure tomorrow.

- environment, incl. management
- energy (all sector)
- manufacturing (all sector)
- food, bioeconomy & agriculture
- petrochemical / nanotechnology
- transport, incl. automotive & aviation
- buildings / constructions
- energy intensive industries
- home appliance
- pharma / health
- IT / Digital

- Horizon EUROPE
- CBE JU
- EIC call
- Innovation Fund
- EIT call
- European Innovation Ecosystems
- Digital Europe
- EIT HEI Initiative
- ERASMUS+

Our EU projects

ACHILLES

ACHILLES aims to build a trustworthy AI ecosystem with an iterative cycle inspired by clinical trials, focusing on ethics, compliance, and efficiency. It includes a novel ML-driven IDE and real-world validation.

<https://cordis.europa.eu/project/id/101189689>

QUEEN

The EU-funded QUEEN project uses EU-abundant quartz sand to sustainably produce MG-Si, integrating waste materials and refining processes to enhance sustainability and foster innovation in the sector.
