# SÓLIDA

We are a leading engineering and consultancy firm specialized in renewables, experts in digitisation, development of multidisciplinary knowledge and adaptation of **innovative solutions** to each market.

# Team of experts focused 100% in renewables

More than 300 professionals exclusively dedicated to renewable energies and electrical infrastructure.

+ 300 employees

from 14 different countries

Photovoltaics

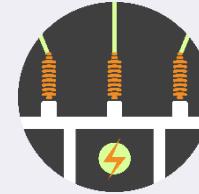

Wind

Biomass

Concentrated Solar

Substations

Power lines

Hybridisation

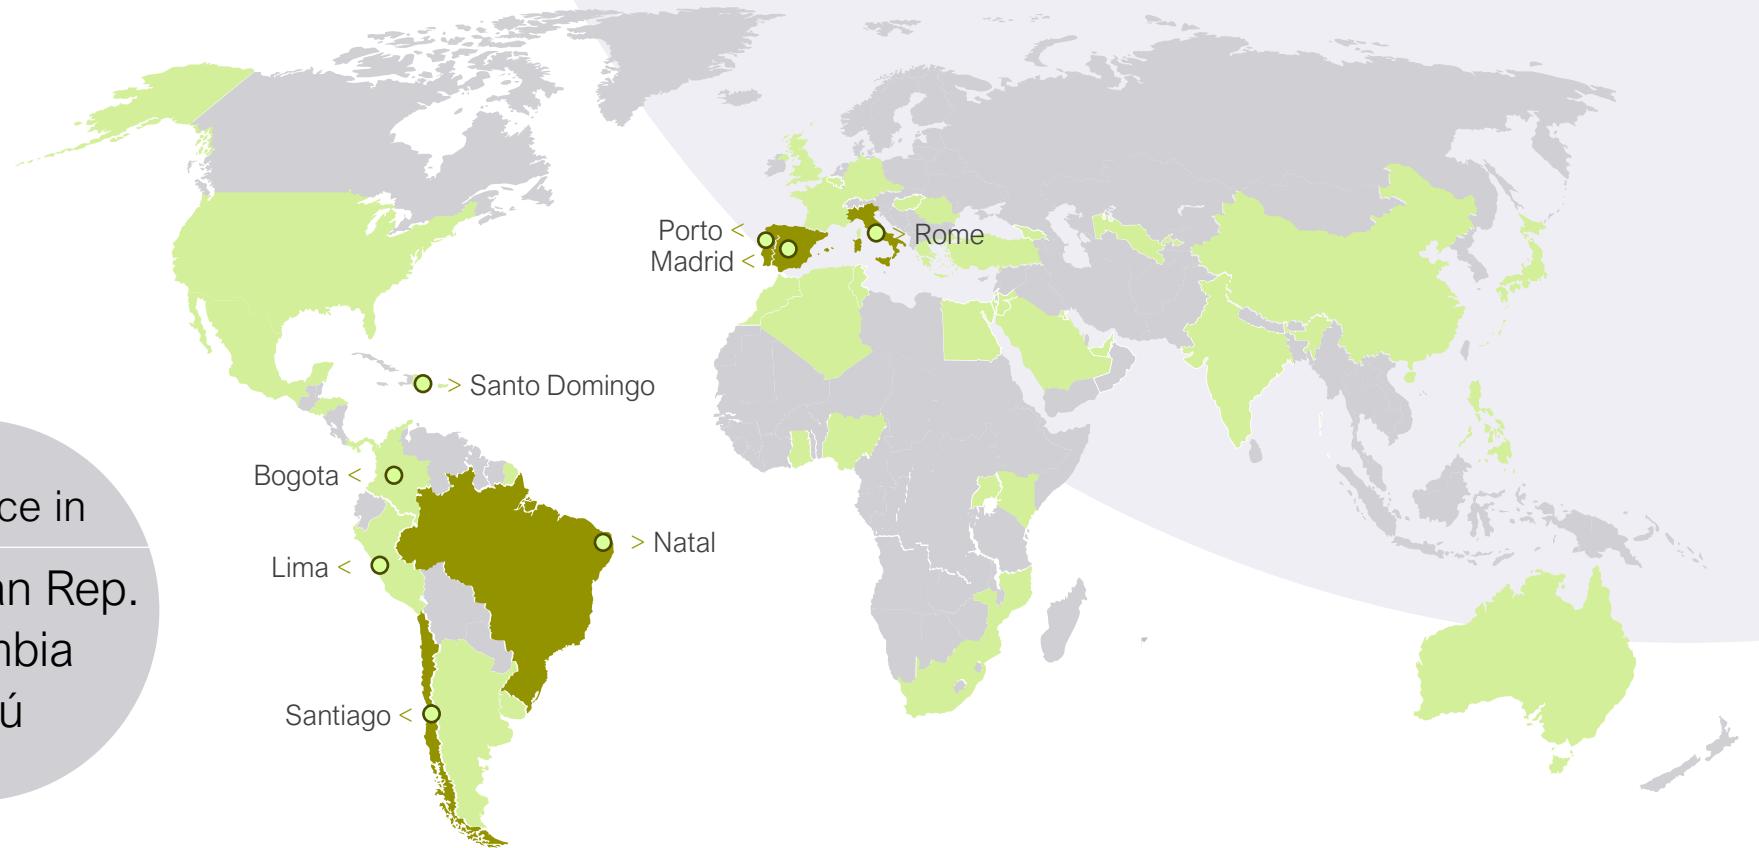

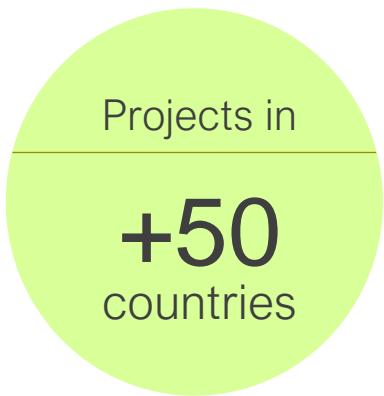

Storage

Hydrogen

# + 180 GW international experience

02.

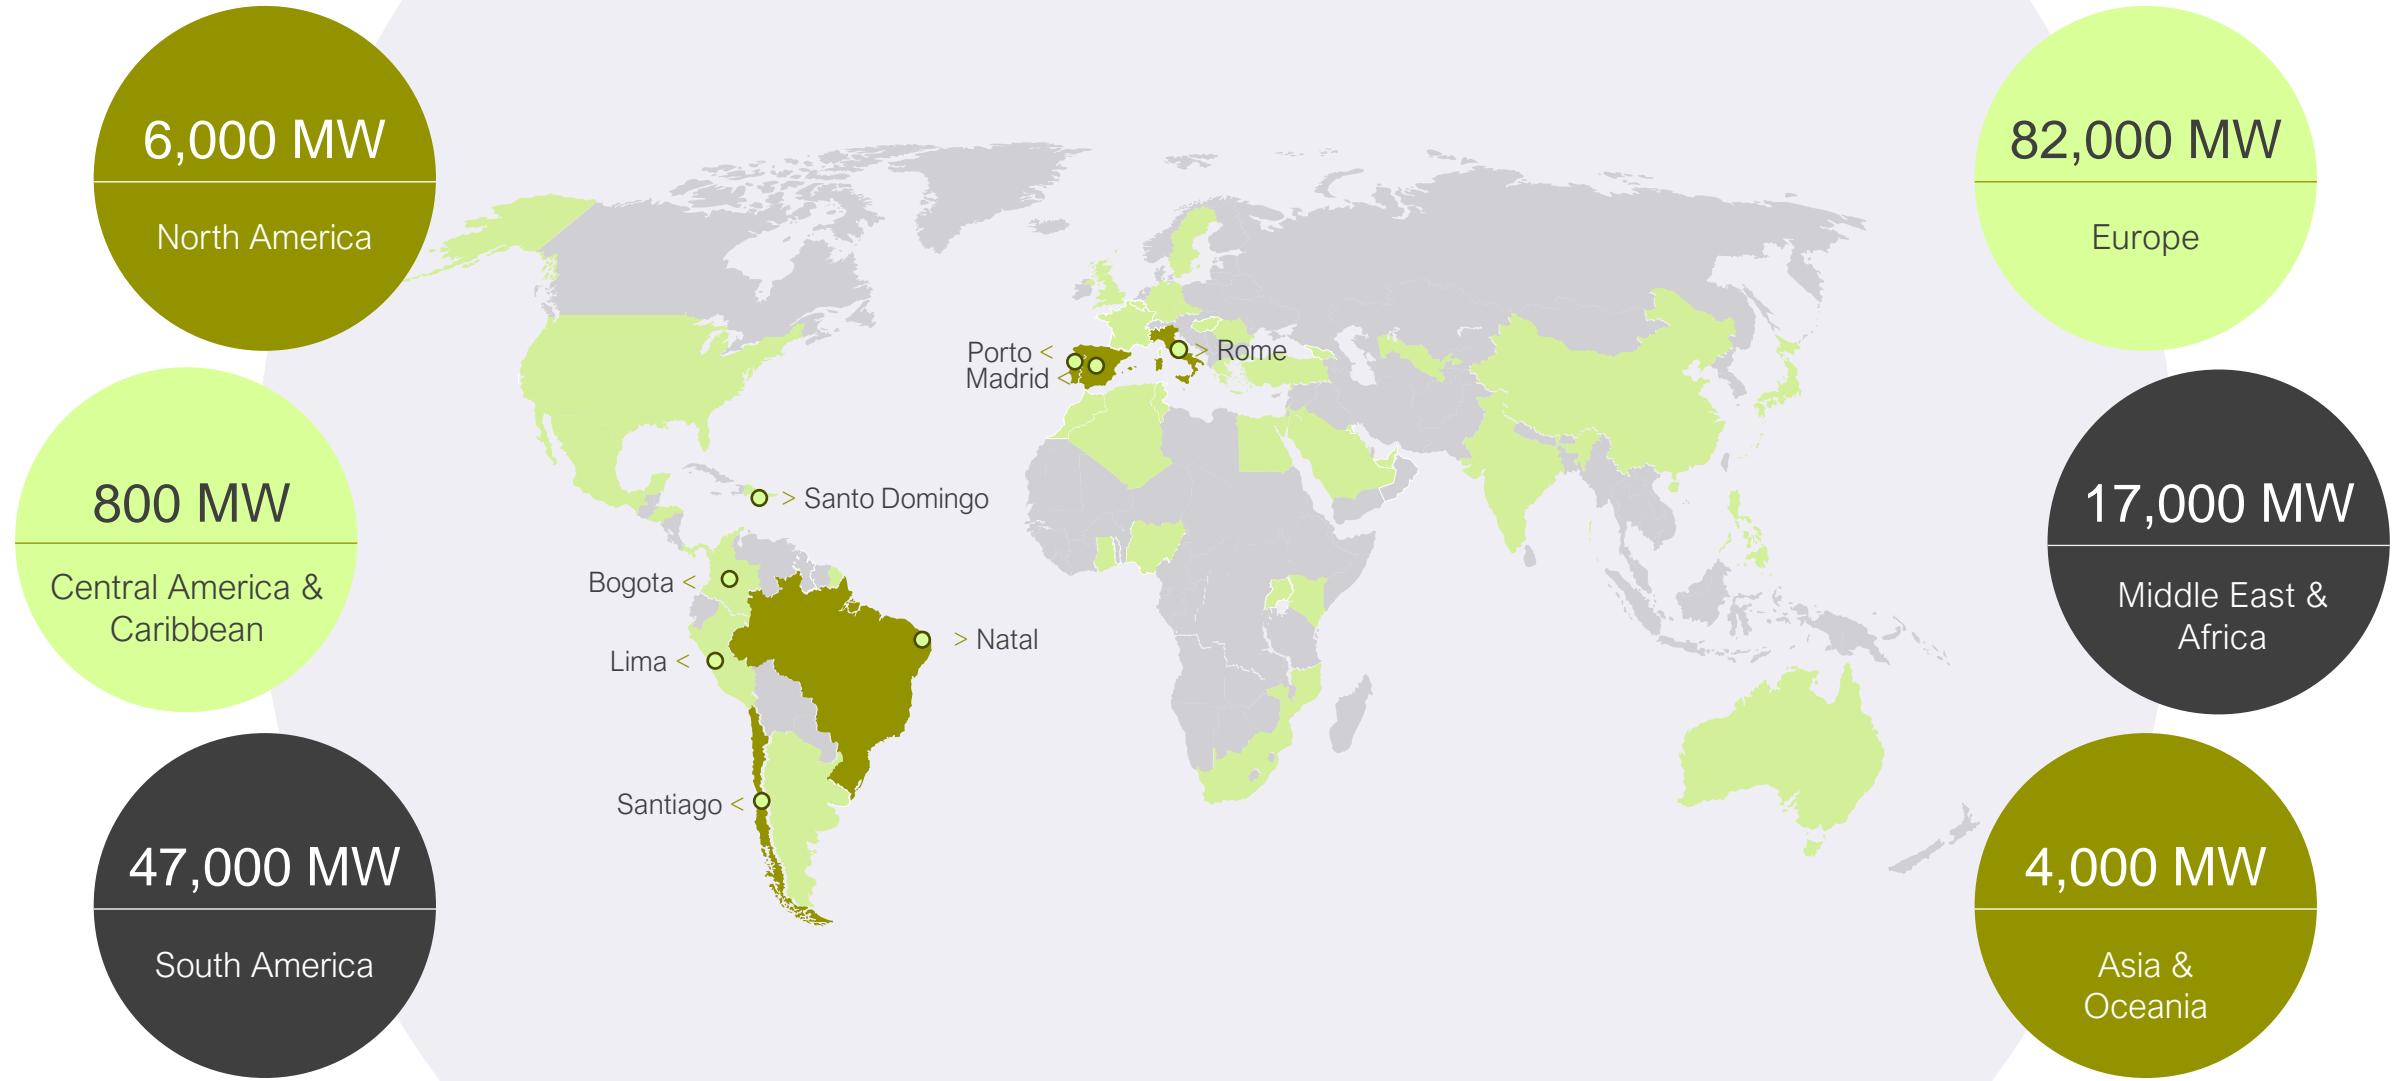

---

+15 years of experience  
at your service

## 02. +15 years of experience at your service

Our leadership is based on more than 15 years of experience in renewables and grid interconnection.

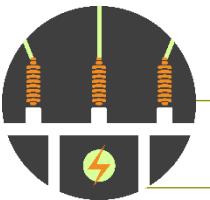

- > We operate in more than 50 countries throughout the entire project lifecycle.
- > We develop digital tools for design optimisation and process automation.

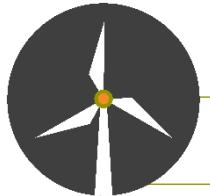

## 02. +15 years of experience at your service

+ 100,000 MW  
Photovoltaics

+ 250  
Substations

+ 36,000 MW  
Wind

+ 2,000 KM  
Power Lines

+ 8,000 MW  
Concentrated Solar

+13,700 MWh  
BESS

We are technical partners of **world class clients**, delivering specific solutions for every profile.

Solutions adapted to  
your needs

360° service: engineering and technical advisory **throughout the entire project lifecycle**, from inception until commissioning.

# Development

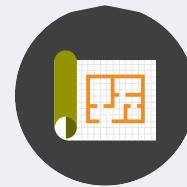

Strategic Partner from origination until RTB, with a clear focus towards project optimisation and the careful observation of local codes and regulation to speed up the consenting process.

More than

**10,000 MW**

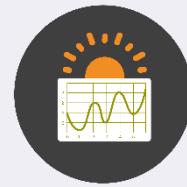

Grid access and connection  
requests in Spain.

More than

**200**

Permitting projects in the past 3  
years in Spain, Portugal, Italy,  
Brazil, Chile and Colombia.

More than

**15,000 MW**

Resource and Yield Assessment  
Studies.

# Construction

---

During the construction stage, developers and EPC contractors engage with SÓLIDA in order to achieve the maximum HSEQ standards and cost control, and meet deadlines.

More than

**8,000 MW**

**Detailed Engineering**

- 105 projects
- 13 countries

More than

**3,700 MW**

**Owner's Engineering**

- 98 projects
- 9 countries

More than

**2,000 MW**

**Site Works Supervision**

- 41 projects
- 6 countries

# Consultancy

We are **independent technical advisors** and risk detectors.

We pay attention to our clients' worries, perform in-depth risk analyses and provide bottomless drill-down capabilities.

We dive into the roots and potential mitigants of any risk, at will.

More than

**48,000 MW**

## Technical Advisor

- 530 projects
- 15 countries

Technical Due Diligence

Lender's Technical Advisor

Independent Witness

Contracts Technical Support

# Innovation

Technology is in our souls. We strive for continuous improvement. In every project, everyday.

Innovation, Digitisation and Process Automation are part of our culture.

## R&D Team

Our R&D Team has mastered Python, Java and C# languages and operates with SCRUM methodology. We permanently develop new tools which provide technological solutions to optimise our engineering processes and design plants more efficiently.

# Innovation

## Success cases

### Innovation by definition:

the software tools we develop provide tangible solutions to complex problems that had not yet been resolved.

#### PV Trackers Optimisation

A tool specifically developed for the optimisation of PV layouts with trackers at complex topographic sites.

#### Earthworks

Cut & Fill quantities are minimised with this tool, which is especially useful at complex sites with wavy topographies.

#### CSP Management

Business Intelligence software implemented at operating CSP plants.

#### PV & CSP Hybridisation

Proprietary model for hybrid PV & CSP plants.

#### Ray Tracing

Proprietary ray tracing model originally conceived for Central Tower Receiver plants. Also used for PV.

#### Shadow Flicker

Proprietary software for Shadow Flicker calculation in Wind Farms.

#### CSP Yield Calculation

Proprietary model for the detailed simulation of CSP plants (parabolic trough and central tower technologies).

#### Operational Strategies

Proprietary model for the implementation of tailor-made dispatch strategies in order to capture best market pricing when storage is available.

# 04.

---

## A joint project: *case studies*

We have overcome great challenges for over 15 years in more than 50 countries, with **renewables at the core of the business**, in markets with a unique nature.

**Utilities, EPC contractors, investments funds and financial institutions**, bespoke requirements permanently handled with SOLIDA's unparalleled versatility. Our **specific solutions** are always adapted to the client's needs, project requirements and country regulations.

# Portfolio Ignis

Technical Due Diligence  
Europe & America

14,000 MW

- **Technology:** Photovoltaics, Wind, Combined Cycle and Hydrogen
- **Nº of projects:** 152 projects in Spain, Italy, USA and Peru
- **Investment:** 625 MM euros
- **Execution year:** 2021

## Client

## Scope

- Red flag analysis and risks pre-screening.
- Full Technical Due Diligence:
  - > Site assessment.
  - > Technical configuration review.
  - > Yield assessment, CAPEX/OPEX estimates.
  - > Permitting status and RTB probability of success.
  - > EPC/O&M contracts review.
  - > Review of financial model inputs.
  - > Risk Matrix.

# PV Francisco Pizarro

Detailed & Owner's Engineering  
Spain

**590 MW**

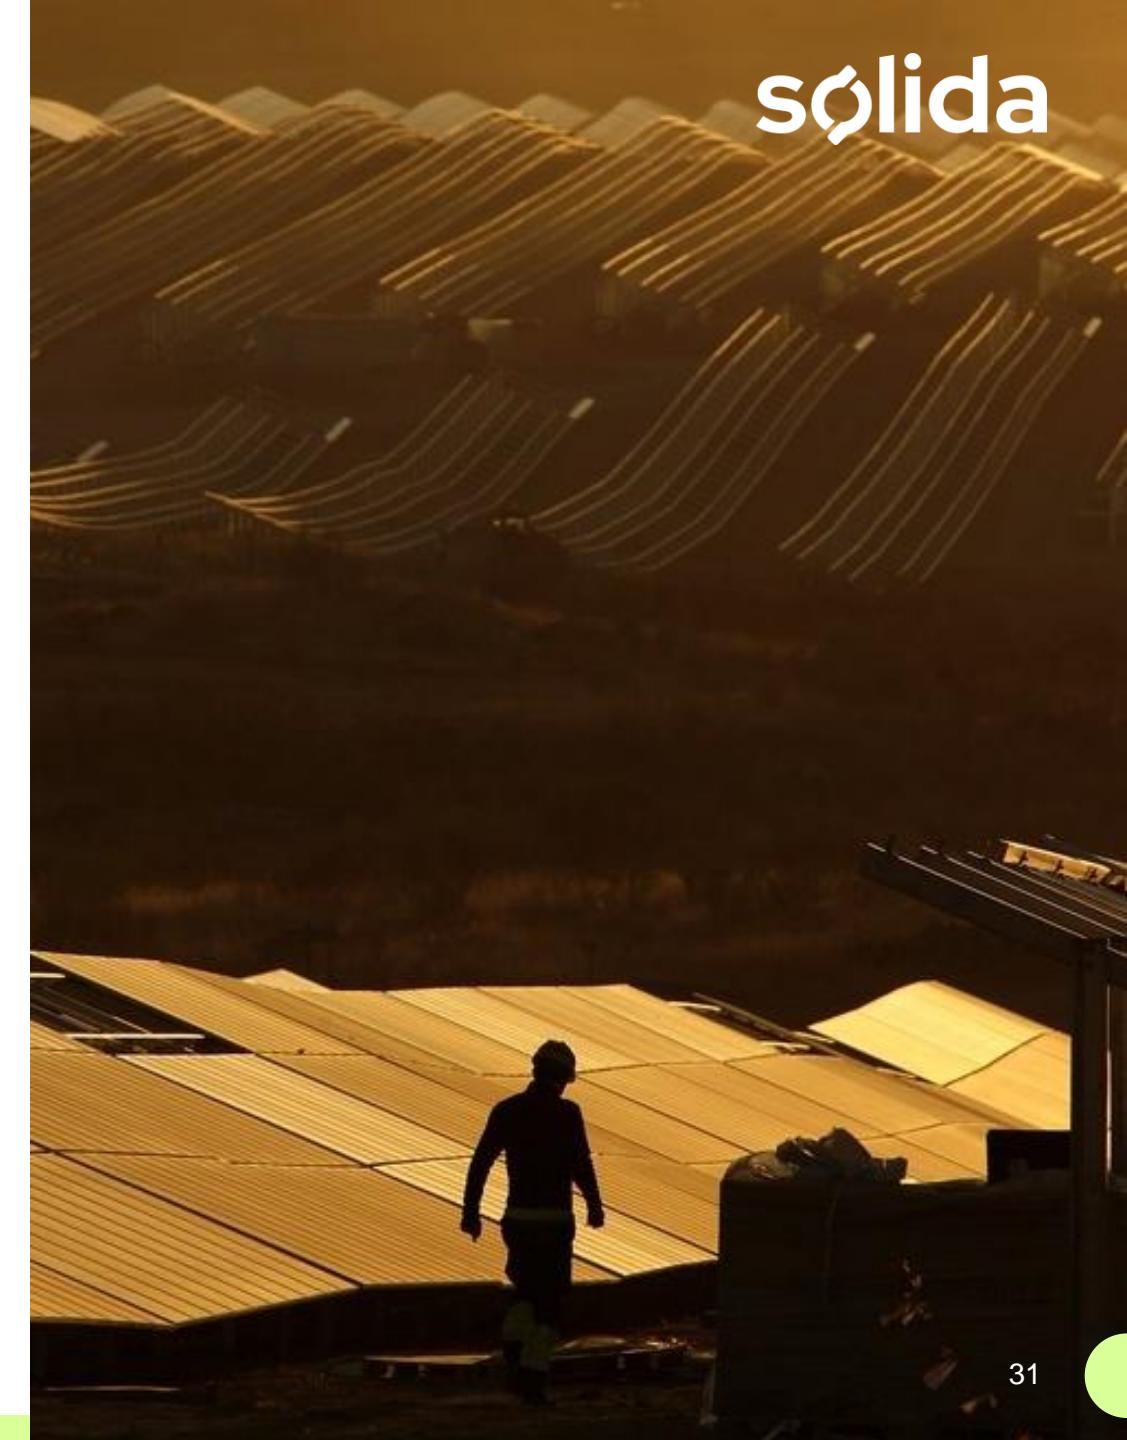

- **Configuration:** monofacial module / single-axis tracker / central inverter
- **Substation:** ST Pizarro 30/400 kV
- **Transmission line:** Overhead 400 kV, 35 km
- **Execution year:** 2020-2022

**Client**

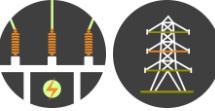

**Scope**

- Basic engineering optimisation.
- Site studies assessment.
- Detailed engineering for construction.
  - > Civil-Mechanical.
  - > Electrical.
  - > Communications.
- Grid code electrical studies.
- Technical assistance during construction.
- On-site management of contractors.

# HV Campanario Node

Permitting and Owner's Engineering  
Spain

**780 MVA**

- **Type of project:** Grid connection infrastructure for renewables
- **Substation:** 132/400 kV
- **Transmission line:** 0,5 KM 400 KV
- **Execution year:** 2020-2021

## Client

## Scope

- Grid Connection Project (+750 MW Wind & PV).
- Executive Technical Project for Permitting.
- Technical support for transformer procurement (780 MVA).
- EPC contract management.
- Substation and line Detailed Engineering review.
- FAT tests Supervision.
- Quality, planning and certifications control.
- Project management.

# WF Matafongo

**34 MW**

EPCM  
Dominican Republic

- **Wind Turbines:** 17 WTG 2.0 MW
- **Location:** Dominican Republic
- **Substation:** 55 MVA 30/132 kV
- **Transmission line:** Overhead 132 kV, 10 km

## Client

**INVERAVANTE**

## Scope

- Main contracts negotiation support:
  - > Civil works.
  - > MV and HV electrical installations.
  - > Substation.
  - > Wind turbines supply and assembly.
- Detailed engineering review.
- Construction supervision and commissioning.
- HSE coordination.
- Construction management.

# Noor Midelt

**800 MW**

Technical Advisor  
Morocco

- **Technology:** PV, CSP & Storage
- **Hybrid plant power:** 600 MW PV + 200 MW CSP
- **Location:** Morocco
- **Year of execution:** 2018

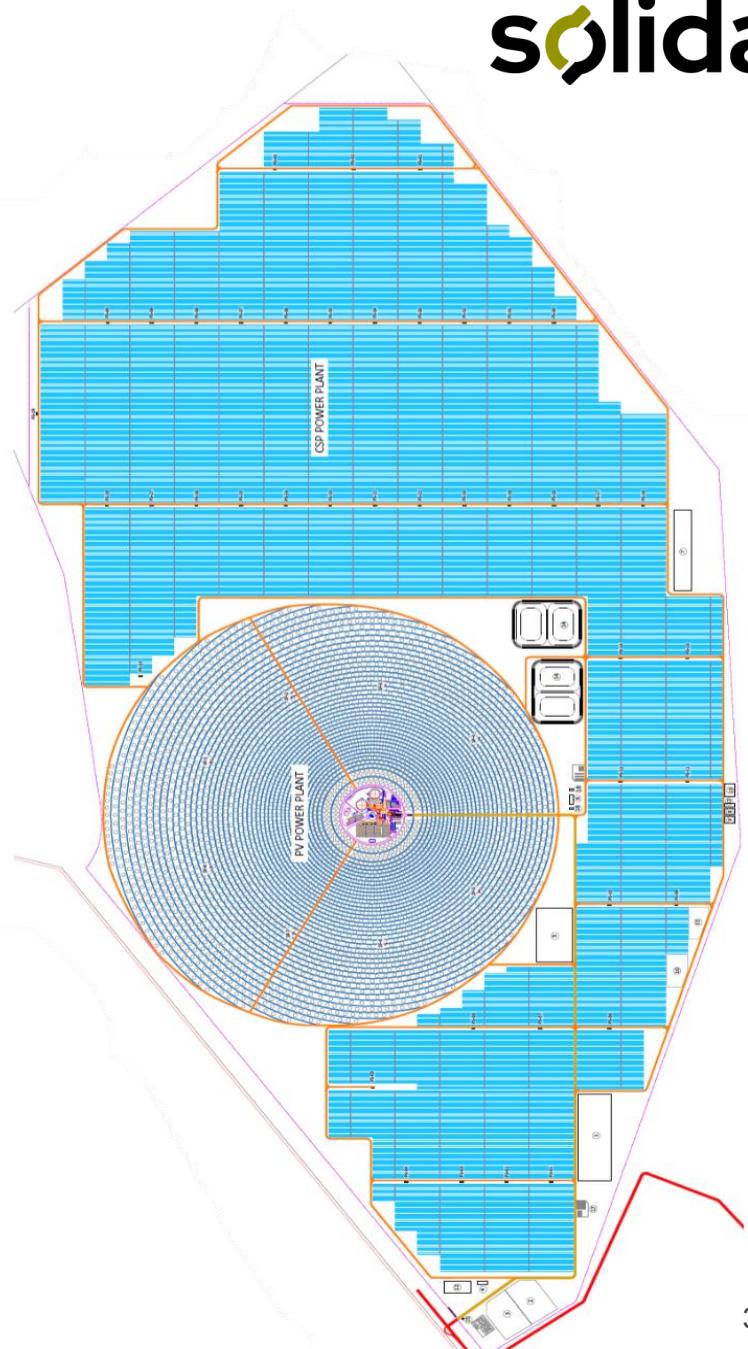

**Client**

**Scope**

Independent technical advisor for the world's largest CSP&PV hybrid plant.

- Pre-feasibility study with multiple configurations.
- CAPEX, OPEX and LCOE analysis.
- Basic engineering optimisation.
- Design of the electrical, civil, control and communications system.
- Yield assessment.
- Performance model design, integrating CSP & PV technologies.
- Technical support for EPC tender.
