

**Another
set of eyes™**

From the factory floor to
football pitches —
one platform for every
field of vision.

One platform. Every field of vision.

From high-risk factory floors to fast-paced logistics hubs — and even elite-level sport — our platform adapts to how people work, move, and learn in the real world.

Unlock visual expertise — at scale, across industries.

What makes it work across industries?

→ Smartphone-first delivery

No headsets required. Just immersive, intuitive learning and insight — wherever people are.

→ Eye-tracking insights

Understand where attention goes — and where mistakes happen — to drive performance and safety.

→ 360° video & real-world scenarios

Capture complex tasks, risky environments, and expert workflows in full context.

→ Knowledge capture, not just training

Document, share, and scale what your best people know — without slowing them down.

Designed for operational impact,
not just innovation. Real Impact.
Real Workflows. Real Results.

Solutions **designed to solve real
challenges** — not add complexity.

Flexible, scalable, and designed
for real-world impact.

Delivering results that matter, not
just innovation for its own sake.

Two core products.
One seamless platform.

Smartphone App-Based
Immersive Training.

Eye Tracking data
Based Solutions.

360 by Another set of eyes

Smartphone-based immersive learning platform
(360° video, AR, quizzes).

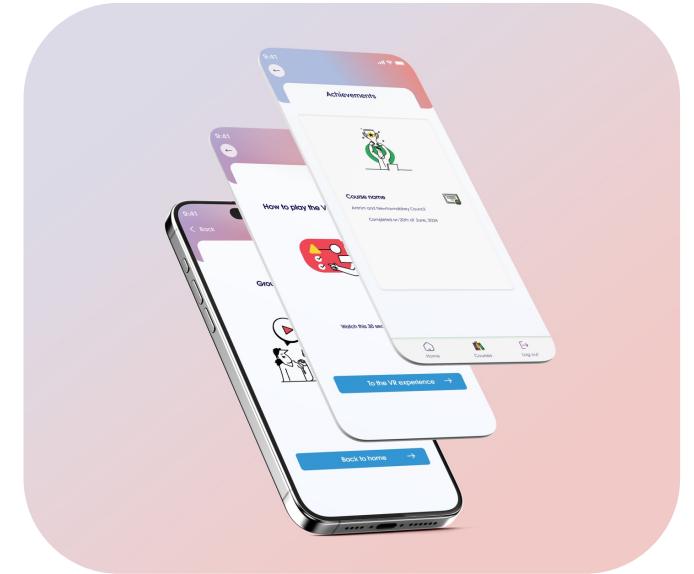

Deployable in <1 month, £20–£100/driver/year

Core capabilities

- Runs on any ios/Android device
- 360° video, AR, quizzes, multilingual support
- Offline mode, real-time performance scores
- Fast deployment, white-label ready

Use cases

- New driver onboarding
- Refresher safety training
- Remote or multilingual workforce
- Custom client-specific scenarios

Vision by Another set of eyes

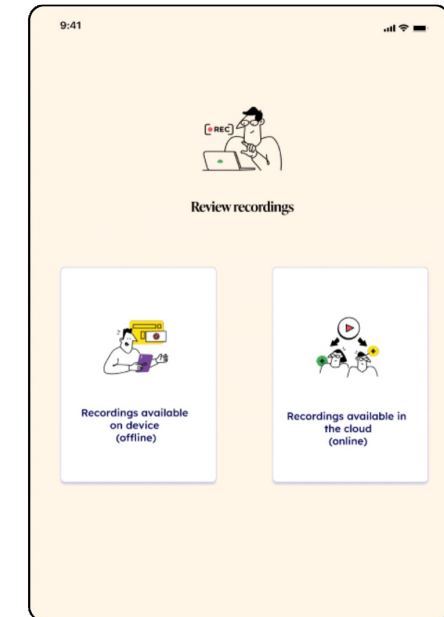

Eye-tracking data reveals how drivers scan, detect hazards, and make decisions — **identifying up to 80% of missed risks, with 25–30% improvement after training.**

Core capabilities

- Compatible with iOS, macOS & Windows
- No training required — simple, intuitive setup
- Record & upload sessions to the cloud in seconds
- Instant gaze mapping & expert-ready video feedback

Use cases

- Driver Risk Assessment
- Onboarding & Pre-employment Testing
- Post-Incident Reviews
- Insurance & Compliance Reporting

Ease of use

No technical skills are required to operate the system or analyse the data.

Cost efficiency and flexibility

No need to purchase any hardware; use it as long and as often as needed.

Customer-Centric Approach

Tailored solutions that adapt to your existing processes without requiring costly hardware.

Global reach; local support

We leverage our partners' global network, ensuring we always have a local partner available to supply the hardware.

Clients

Pilots underway & in discussion

What our Clients says

"Thanks to our new VR app, we have the ability to easily access challenging traffic situations around Vienna's train system and avoid making common mistakes in those spots. Ferenc and his team were always available and very open-minded to changes base on our needs and requirements."

Anastasija Rosic, BA eLearning Specialist – Wiener Linien

From the off you were happy to help and gave us a good insight into what you could offer. The assistance and advice you offered in the procurement of headsets and the type and specifications of mobile devices was invaluable

Geoff Hooton Transport Compliance & Trainer – Harrods
