The patient refused to cooperate today and did not eat anything, being too busy insulting the staff.

A.I. ASSISTANT

WHETHER YOU NEED TO NAVIGATE PLATFORM FEATURES, MANAGE INVOICING, OR QUICKLY RETRIEVE INFORMATION ABOUT A RESIDENT, OUR A.I. ASSISTANT IS ALWAYS READY TO HELP.

AN INTERACTIVE CHATBOT ANSWERS QUESTIONS AND GUIDES YOU STEP-BY-STEP.

Hi, I need to record an oxygen saturation of 97% and a temperature of 38°C.
Can you do it for me?

I'll record an oxygen saturation of 97% and a temperature of 38°C. Can you confirm?
Would you like me to add a new clinical note or send a notification to someone regarding these measurements?

Yes, I confirm. Send a notification to the doctor saying that I've recorded the parameters and that the patient shows early signs of fever, so they should be kept under observation. Also, add a new clinical note with the previous sentence.

I'll send the notification to the doctor and save the clinical note.
Is there anything else I can help you with?

SMART DATA EXTRACTION
